MILITARY POSTS AND STATIONS

Complete list military posts and stations. Post-office supply.
Air University----- Maxwell Field.
Anniston Ordnance Depot----- Anniston.

Refer to the back portion of United States Postal Guide for complete list of military units in other States and United States possessions, also United States National Cemeteries, State Homes for Soldiers, and Navy Department and United States Marine Corps, with correct post-office address.

NOTES

(a) Letters suffixed to the name of the county will indicate the case examination section for regular clerks and if followed by a number the latter will indicate the examination section for substitutes.

(b) Junctions are prefixed (*) and will have the stations and "dis" offices in the same county indented below.

(c) The suffix (n. o.) to a junction indicates that it is not a post office.

(d) The prefix (Δ) indicates discontinued offices and such offices will not be erased until directed in scheme corrections.

(e) The suffix (c. h.) denotes the county seat.

(f) The absence of train numbers in the supply column indicates supply by all trains with the same frequency as the RPO service. If an office is not supplied by all trains with such frequency the trains supplying it, or the exceptions, are shown.

(g) The explanation of the arbitrary symbols and frequency letters in the supply column will be found in the division schedule of mail routes.

(h) The time notes frequency is daily except Sunday unless otherwise stated and when two or more time notes are shown for an office, the note indicating the earliest departure will afford the earliest arrival unless an arrival time note is also shown.

RAILWAY POST OFFICE SEPARATIONS

EXPLANATORY NOTES

(a) Mails distributed by general scheme must be made up at all times, in both letters and papers, as indicated in the separation list below, by lines and offices making direct connection at junction points indicated.

(b) Lines and offices not having direct connection will make up as directed or mass on connecting line if quantity is insufficient.

(c) Offices prefixed "M" will be made up direct, in both letters and papers, if quantity warrants; otherwise mass on connecting line. If the line making the direct connection has less than five pieces for such offices, they should be tied in one package, where more than one make-up is shown, and labeled "Holdouts."

(d) The dividing point includes that particular office and connections and "dis" if any, unless otherwise specified.

(e) When less than 10 pieces of mail are received in a separation for any of the separations beyond, clerks will not check as errors the pieces so received.
