This catalog covers all Highway Post Office routes and trips. It utilizes the new chronological Mobile Post Office Society numbering system with an enhancement which includes a unique number for every trip in both directions. This allows collectors to exchange and communicate the specific covers/cancels without errors. The original route numbers are also presented to assist collectors who may already be familiar with the older designations.

Catalog values are based upon current market 'sold' listings but it should be noted that due to the very low quantities of some of these covers the value can be very 'demand sensitive'.

Updates to this catalog will be made periodically, please check back often. If you have any corrections, updates, new images or other information you think would improve this catalog please use the contact form on the Stamp Smarter web site.
