AIR-BRAKE HOSE

Made to stand a mean pressure of 650 pounds to the square inch. We supply the Westinghouse Air-Brake Company entirely, both for the United States and Europe. Their circular, dated July 7th, 1883, to the Railroads, says:

"We purchase our Hose from the **NEW YORK BELTING AND PACKING COMPANY**, of New York. We believe that they make an article that is as good as any that can be purchased; we pay them a much higher price than hose claiming to be as well made is offered for, because our experience has shown *their* Hose to be *Entirely Reliable*.

"We do not mean to say that others cannot make as good hose as the New York Belting and Packing Company, but they certainly will not make the best quality of hose unless a sufficient price is paid to justify them in doing so."

The Westinghouse Air Brake Co.,

PITTSBURGH, PA., U. S. A.,

Manufacturers of the

Westinghouse Automatic Brake.

Westinghouse Automatic Freight Brake.

Westinghouse Locomotive Driver Brake.

Vacuum Brakes (Westinghouse & Smith Patents).

Westinghouse Air Brake.

The "AUTOMATIC" has proved itself to be the most efficient train and safety brake known. Its application is instantaneous; it can be operated from any car in the train, if desired, and should the train separate, or a hose or pipe fail, it applies automatically.

The Automatic Freight Brake is essentially the same apparatus as the Automatic Brake for passenger cars, except that the various parts are so combined as to form practically one piece of mechanism, and is sold at a very low price. The saving in accidents, flat wheels, brakemen's wages, and the increased speed possible with perfect safety, will repay the cost of its application within a very short time. A guarantee is given customers against loss from patent suits on the apparatus sold them. Full Information Furnished on Application.

MANUFACTURERS OF

PLAIN AND AUTOMATIC

PASSENGER and FREIGHT TRAIN BRAKES

AND

DRIVER BRAKES for LOCOMOTIVES.

The EAMES AUTOMATIC BRAKE is a *straight-air* and *automatic* brake combined; the change from one to the other being made by a simple movement of the engineer's brake lever.

It is instantaneous in its application and its release. It does not require to be pumped off, and cannot cause accidents by leaking on.

It is certain in its action. It cannot fail to operate at a critical moment.

It deposits no moisture in the pipes, valves, or any part of the apparatus, requires no draining, and cannot be made inoperative by condensation or freezing.

It is simple in its construction; has no complicated pump or valves to get out of order, costs little for repairs, and does not require a mechanical expert to understand or operate it.

It consumes no oil, uses very little steam and fuel to create its power, and none at all to release it.

It is as *powerful, prompt* and *effective* as any power brake in the market, and in comparison with any other automatic brake possesses an important advantage in its great saving in cost of repairs and consumption of oil and fuel.

Illustrated Catalogues, giving detailed descriptions of the EAMES BRAKES, may be obtained by addressing the Company as above.

SELECT PLANS OF ENGINEERING STRUCTURES, For RAILROADS and HIGHWAYS.

VOLUME I,

PLATES 36,

As actually built and

Published in

48 PLANS,

SIZE 14 X 21 IN.

paid for to Contractors.

Philadelphia, Pa.

By **RICHARD B. OSBORNE, C.E., M. I. C. E. I.**, the Author, and **PERCY T. OSBORNE, C.E.**
302 WALNUT STREET, PHILADELPHIA, PA.

These plans were collected by the author for his own use, to meet a want that was often felt in works of an extended character.

PLATE No. 1 is a drawing of "Black Rock Tunnel" bridge, erected in 1836, under the direction of Mr. Moncure Robinson, Chief Engineer, by Mr. W. Hasel Wilson, Principal Assistant Engineer. Some 250 millions of tons have passed over it, and many floods have tested it. It consists of four spans, 72 feet each, across the Schuylkill River, a little west of Phoenixville. It is a remarkable structure, having cost but \$43,262.84. The Flat Rock Tunnel Portal was by the same engineers.

All the other structures in this volume were built under the direction of the author.

The plans on **PLATES Nos. 2 and 11** are **SKEW-BRIDGES**.—That on Plate 2 is cited by Prof. Haupt, in the American Encyclopedia, as the only arch of the kind built in this country. Both bridges, on Plates 2 and 11, have, however, been constructed with pure spiral twist on Ellipsoidal curves, together with others of like character on the same railroad, the plans of which have been reserved for the next volume.

PLATES Nos. 9 and 10 show plans of **SKEW-BRIDGES** for highways, built in ribs to suit the angles of their respective crossings—one bridge is of brick and one of stone.

There are also **TWENTY-ONE PLANS OF STONE RAILWAY BRIDGES** of one, two, three and six spans, and from 15 to 60 feet above "Neat Lines," with arches, semi-circular, segmental, and elliptical, and of varied rise. **EIGHT PLANS OF ARCHED CULVERTS**, under different depths of embankment, of spans up to 12 feet, with curved, straight, and rectangular wings. There are **FIVE PLANS OF BOX CULVERTS**, single and double. **FOUR PLANS OF TIMBER BRIDGES FOR FARM ROADS** over railroad, complete the first volume.

ALL THE FOREGOING PLANS HAVE THE DIMENSIONS, QUANTITIES, AND COST GIVEN ON EACH.

Should this volume (limited to 1,000 copies) prove acceptable to the profession, it is intended to issue a **SECOND** of the same character, but for different application.

A **THIRD VOLUME** is also proposed, to give the author's experience in the construction of **IRON HOWE BRIDGES**, with numerous plans, dimensions, weight, areas, and cost, of many built by him. He erected, in 1845, the *first* iron Howe bridge, and was associated with Mr. Howe, the inventor; he also introduced it and the Howe arched roof into England. This third volume will also contain **HIGHWAY BRIDGES** in iron and timber, of the Howe, Pratt and Bowstring systems, with dimensions, heights, areas, and cost.

In the **FOURTH VOLUME** it is intended to give railway **TERMINAL BUILDINGS**; also, **WAY STATIONS** for passengers, freight, and water, with bills of materials and cost; also, working drawings of **HOWE-TRUSS ARCHED ROOFS**, from 50 TO 250 FEET SPAN, with dimensions and cost of same.

All the drawings in Volume I, are for structures on a double track railroad with bases of 30 and 26 feet, except the one on the title page and Plate 1, the bases of which are 25 and 21 feet.

VOLUME I. will be ready for delivery in the early part of August, and can be procured from

The patents of this Company are fundamental, and cover the principle of the filtration of air through discharges of Static Electricity, thereby accomplishing *absolute* purification.

No batteries or chemicals of any kind enter into this process.

The machines built by this Company are warranted to generate Ozonized Air in large quantities, imparting to the air the delightful crispness and exhilaration of the atmosphere after a thunder storm or on the mountains.

As a filter of the air it is unrivaled, and in fact the only apparatus of the kind in the market.

We claim for our machines beauty of construction and great durability and compactness.

MAN'F'S OF STEEL RAIL FROGS, CROSSINGS AND SWITCH SETS,
 INDIANAPOLIS, IND.

All our Frog Points are kept from breaking, loosening or spreading, by heavy bars fitted into and filling the cavity of the rail on each side of the point, and in being firmly combined with the point rails, by six heavy rivets.

We make four styles of Frogs, and other kinds also when ordered. We use $\frac{3}{4}$ rivet steel in all our rivets and bolts in the construction of our Frogs and Crossings.

THE HOPKINS Self-Fitting Journal Bearings

FOR CARS AND LOCOMOTIVES.

D. A. HOPKINS,

113 Liberty St., New York,

Inventor, Patentee and Manufacturer of Self-Fitting Journal Bearings,

*Holds Himself Responsible for and Guarantees all Bearings sold
by him.*

The Premium for the Best Bearings was awarded to him
at the late CHICAGO EXPOSITION.

Orders respectfully solicited and very promptly filled by the patentee.

All parties are hereby cautioned against the purchase or use of self-fitting Journal Bearings, unless procured from said Hopkins, or from manufacturers duly licensed by him, whether said bearings purport to be lined with pure lead or not, and whether the lining is secured to the hard metal part of the bearing by soldering or by any other means; also, whether the lining of such bearings is thick or thin, or whether it is made smooth or presents ridges or projections on the journal side of the bearing for receiving the initial pressure of the journal.

[See Hopkins' patent, Nov. 15, 1870, also that of Oct. 16, 1883. Re-issued Dec. 18, 1883.]

REMINGTON Standard Type-Writer.

Probably no invention of this century has done so much to **economize time, reduce expenses** and **facilitate** the dispatch of **office business** as the **REMINGTON STANDARD TYPE-WRITER**.

INTRODUCTION

TO

POOR'S MANUAL FOR 1885.

REVIEW FOR 1884.

THE total number of miles of railroad in the United States at the close of 1884, was 125,379, of which 3,977 miles were constructed during the year—the rate of increase being 3.17 per cent. The number of miles making returns of their share capital and funded and floating debts equalled 125,152, against 120,552 for 1883, the increase being 4,598, the rate of increase being 3.8 per cent.

The share capital of the mileage in operation in 1884 equalled \$3,762,616,686, against \$3,708,060,583 in 1883, the increase equalling \$54,556,103, the rate of increase being about 1.4 per cent.

The funded debts of all the lines at the close of the year aggregated \$3,669,115,772, a sum \$168,235,858 in excess of the total of 1883 (\$3,500,879,914), an increase of nearly 5 per cent.

The other forms of indebtedness of the several companies at the close of the year equalled \$244,666,596, against \$268,925,285 for 1883, the decrease being \$24,258,689. The total share capital and indebtedness of all kinds of all the roads making returns equalled at the close of the year \$7,676,399,054, a net increase in the year of \$198,533,272 over the total of 1884 (\$7,477,865,782), the rate of increase for the year being about 2.6 per cent.

The cost per mile of all the roads making return as measured by the amount of their stocks and indebtedness equalled very nearly \$61,400, against \$61,800 for 1883.

The gross earnings or receipts of all the lines from which returns were received for the year equalled \$770,684,908, of which \$206,790,701 were received from transportation of passengers; \$502,869,910 from transportation of freight; \$7,464,099 by lines the returns of which were so incomplete as to preclude their use in the tables giving the general results—the sources of income, amount of tonnage moved, etc., etc.; and \$53,749,997 from the transportation of mails and express matter, from investments, and from the sales of lands applicable to the payment of interest or dividends.

Statement showing by Groups of States the length of lines owned, share capital, funded and other debts, length of lines operated, gross and net earnings, and interest and dividends paid, by all the railroad companies of the United States for their respective fiscal years of 1879, 1880, 1881, 1882, 1883, and 1884.

NOTE.—The "other debt" for 1883, in the above table, has been reduced by deducting therefrom certain car-trusts and other obligations which are now included in the funded debt. In the present statement the net earnings only are given, not what appeared to be "available earnings" which in previous the Manuals embraced the receipts of leased lines for interest, dividends, etc., etc.

The gross earnings of all the lines for the year ending December 31, 1883, equalled \$823,772,924, exceeding those for 1884 by \$53,088,016, the falling off for the year equalling about 6.4 per cent. The earnings in 1883 from the transportation of passengers equalled \$206,835,456; from freight \$544,509,831;

from lines the operation of which, from the incompleteness in their returns, could not be included in these general tables, \$16,660,047; from transportation of mails and express matter, from investment and from the sale of land applicable to interest or dividends, \$57,667,590, against \$53,749,997 for 1884.

The earnings per mile from which full returns were received in 1884 equalled \$6,663, against \$7,461 for 1883, the decrease equalling \$798 per mile.

The net earnings of all the lines for 1884 equalled \$268,106,258, against \$293,367,285 for 1883, the falling off equalling \$25,261,027, the rate of decrease being about 9 per cent.

The amount of interest paid in 1884 equalled \$176,694,302, against \$173,139,064 in 1883, the increase being \$3,555,238, the rate of increase equalling more than 2 per cent.

The amount paid in dividends in 1884 equalled \$93,244,835, against \$102,052,548 in 1883, the falling off equalling \$8,807,713, the rate of decrease being about 8.8 per cent.

The number of persons transported in 1884 by all the lines was 334,814,529, against 312,686,641 for 1883, the increase for the year being 22,127,888, the rate of increase equalling 7.8 per cent.

The number of passengers carried one mile in 1884 equalled 8,778,581,061, against 8,541,309,674 for 1883, the increase equalling 237,271,387 persons carried one mile, the rate of increase equalling very nearly 3 per cent.

The distance travelled by each passenger in 1884 equalled 26.24 miles; in 1883, 27.32 miles.

The amount received per passenger per mile equalled 2.356 cents in 1884, against 2.422 cents in 1883. Had the passenger rates for 1883 been maintained for 1884, the earnings from this source would have equalled \$212,617,233, a sum \$5,826,532 greater than that received.

The number of tons of freight transported on our railroads in 1884 equalled 390,074,749, against 400,453,439 tons in 1883, the falling off equalling 10,378,690 tons, the rate of decrease being about 2½ per cent. The value of the tonnage moved in 1884, estimating its value at \$25 the ton, equalled \$9,751,868,725.

The number of tons transported one mile in 1884 equalled 44,725,207,677, against 44,064,923,445 tons moved one mile in 1883, the increase of service performed for the year equalling 660,284,232 tons moved one mile, the rate of increase being about 1½ per cent.

The rates per ton per mile for 1884 of freight transported equalled 1.124 cents, against 1.236 cents for 1883, the falling off equalling 1.12 mills per ton per mile. Had the rates for 1883 been maintained for 1884, the earnings from freight would have been \$553,694,042 in place of \$502,869,901, the amount actually received. Had the rates of 1883 for the transportation of passengers and freights been maintained for 1884, the gross earnings of all the roads would have been \$827,525,371, exceeding by \$56,840,463 the amount actually received, and greater by \$3,752,447 than the earnings for 1883. It will thus be seen that the decline in the earnings for the past year was due wholly to the reduction in rates charged.

Notwithstanding the great prostration of business which prevailed, the

tonnage of merchandise distributed in 1884 fell very little short of that of 1883, while it exceeded the tonnage moved in 1882 by 29,583,374 tons. The service performed in 1884 in the transportation of freight was greater than that performed in 1882 by 5,422,998,428 tons moved one mile.

The falling off of the earnings of the railroads of the country is something phenomenal, so far at least as their recent history is concerned. The total earnings of all the lines in operation in 1877 equalled \$472,909,272; in 1878, \$490,103,351; in 1879, \$525,620,577; in 1880, \$613,733,610; in 1881, \$701,680,982; in 1882, \$770,209,899; in 1883, \$823,772,924; the increase in the period of six years equalling \$350,863,652; the ratio of increase for the same period being nearly 75 per cent. In four years, ending December 31, 1883, the increase of earnings of all the roads equalled \$298,152,347, the average rate of increase being over \$75,000,000 annually. This vast increase was due very largely to the enormous expenditure in the period of five years ending with 1883 in the construction of railroads, within which about 40,000 miles of line were constructed at a cash cost of at least \$1,200,000,000. The expenditure was well distributed throughout the country, and gave an extraordinary impulse to trade and production of every kind. In 1884, only about 4,000 miles of new line were constructed, the cost of which did not exceed \$20,000 per mile, and perhaps not over \$15,000 per mile, or a gross sum of from \$60,000,000 to \$75,000,000. From such a decrease in an expenditure which in a single year, 1882, reached \$350,000,000 it was inevitable that a violent shock should be given to all the great interests of the country.

In a country like our own a check has frequently all the effect of a great disaster. The tonnage moved in 1883 by the railroads exceeded that of 1882 by 40,000,000 tons. At \$25 to the ton, the increase of value in one year of the tonnage moved equalled \$1,000,000,000. All the great interests of the country had not only extended their operations in like ratio, but in far greater ratio, under the expectation that 1884 would show an addition of 40,000,000 tons, having a value of \$1,000,000,000, to that moved the previous year. Instead of an increase in 1884, there was a falling off of 10,000,000 tons having a value of over \$250,000,000. In consequence, almost every branch of production and trade was brought to what seemed a complete standstill. Such really was by no means the case. The volume of merchandise moved and distributed in 1884 very nearly equalled that of 1883, while consumption went on very nearly at the rate of the previous year. As provision had been made for an increase in 1884 equal to that of 1883, the result was a complete glut of every kind of products, hardly any one of which could be sold at a price that left any satisfactory profit to the producer.

Of the 40,000 miles of line built in the five years ending with 1883, no small part was built on speculation, and for that very reason paralleled already existing lines. The most striking examples of the kind, examples so often adduced, are the *West-Shore* and "*Nickel-Plate*" lines. The general demoralization which has prevailed in railroad circles is due more to the construction of these two, and to the ill fortune which attended them, than to any other cause, or it may be said to all other causes. Their effect has been to stop altogether the payment of dividends which had been paid for a long time at high rates by the *Lake Shore* and *Michigan Central*, and to reduce those paid on the *New York Central* from two

per cent. quarterly to one-half of one per cent. quarterly. The stoppage or reduction of dividends on these great lines created profound apprehension and distrust as to the value of all railroad properties. The earnings of other great trunk lines suffered in like manner if not to the same extent. A general disruption of the relations previously existing between the Companies was the inevitable result. They seemed to be set wholly adrift without chart or compass. In the distrust and incoherency which prevailed, the various lines, especially the great trunk lines, struck out on their own account, and bid wildly for business with very little reference to rates or to the result. Pools were dissolved almost as soon as they were entered into, as they always will be dissolved whenever there is not enough business to go round.

Although *West Shore* and "*Nickel-Plate*" seemed to be the occasion of the great catastrophe of 1883 and 1884, the real causes had been long at work in the wonderful success of signal instances of "watering" of which the *Pacific* lines, the *New York Central* and *Lake Shore* are striking examples. The real catastrophe occurred when these waterings took place. Incited by their success our whole people became wild upon the subject of railroad construction, believing that two or three dollars could easily be made for every dollar put up, either by the success of their ventures, or by the sale of their securities. In this mania or delusion the capitalist and the adventurer alike shared. The promoters of *West Shore*, men of capital, put up their money in good earnest under the idea that they were embarking in an honorable and meritorious enterprise. The promoters of "*Nickel-Plate*" built their line on speculation and for the purpose of selling it, securities being issued at the rate of two or three dollars for every dollar of cash paid. No small portion of the 40,000 miles constructed in the five years ending with 1883 was built upon the same plan and with the same object. Whatever their fate, a large number of them became competitors for a business for which ample provision had already been made by existing lines. Railroads, unfortunately, seem to reverse the rule of "the survival of the fittest," to "the survival of the unfittest." They can be used but for one purpose, and when they go into the hands of receivers, they are to be run so long as the operating expenses can be paid. If the earnings are not sufficient for this purpose they are to be eked out by "Receiver's Certificates."

The country is now at about its lowest depth so far as railroads are concerned. The evil done, the remedy has now to be applied. It is not the case for the sponge. Non-competing lines must await the steady and certain increase of the general business of the country; the competing ones must be taken up by the lines they parallel, and used as side tracks, or made serviceable in some other manner as best they may. The process of recovery is already going on. We cannot long remain as we are. It is not consistent with the disposition or genius of our people to be always under the harrow. They have the gift of soon working their way out of the difficulties that surround them, no matter what these may be; and, from long experience, they are well trained in the very matter in hand. All that is now wanting to a vigorous and widely extended movement in the right direction is some striking example of success—a satisfactory solution of some one of the most knotty problems that beset them. Such an example seems

likely to be set them in the speedy adjustment of the West Shore imbroglio. It now seems probable that this line must fall into the hands of the New York Central, in which it will at least be impotent for mischief as a rival line. With that disturbing element out of the way, the Central could well hope to resume dividends, certainly not on the scale of the past, but upon a scale satisfactory to the shareholders, who will feel a much keener delight in receiving dividends at the rate of five or six per cent. than they ever felt in receiving them at the rate of eight or ten per cent. The solution of the West Shore problem means peace between the Central and the Pennsylvania Companies. When these two great companies are on amicable terms, real and substantial progress will have been made toward a restoration of rates that will give to capital not what it once received, but a fair and satisfactory return. A composition between the Central and West Shore will soon be followed by compositions similar in kind between other great lines and their rivals that are now competent only for mischief. The weak will be disarmed, and the strong lines, left masters of the field, will gradually work out of their embarrassments and difficulties. If they cannot, in the rates of their dividends, repeat the past they will be able to pay as much as money is likely to yield in the general investments of the country. It is to be remembered that the rates of interest paid by the railroad companies on their bonds equal 6, 7 and 8 per cent., 7 per cent. being a very common rate. These bonds are now rapidly falling due. They will be replaced by bonds bearing interest at the rate of $3\frac{1}{2}$, 4 or 5 per cent., the reduction in rates inuring wholly to the benefit of shareholders.

The chief sufferers by the recent decline of earnings have been the great trunk lines between Chicago and the seaboard, the decline with these being in part due to the large falling off in our exports of breadstuffs and provisions; the Union and Central Pacific, and the lines traversing the mining States and Territories. The volume of tonnage of the Union Pacific has been well maintained, but its great apparent success for a time was due to a monopoly of the business of its route which enabled it to charge nearly twice the average rates for the country. That monopoly is now well-nigh lost, and with it the rates once maintained. The managers of Central Pacific have destroyed the monopoly it once enjoyed as a through route, by constructing a rival line of their own in which their interests are now mainly concentrated. Mining, particularly of gold and silver, is at best a very uncertain business, and the railroads built to accommodate it are subject to similar extreme fluctuations.

The general volume of business in 1884 very nearly equalled that of 1883. In extensive sections, mainly free from the influences which have affected the lines described, the earnings in 1884 compare favorably with those for 1883. The earnings of the railroads in the New England Group in 1884 were \$58,558,913, against \$59,155,763, for 1883 the falling off being only \$596,850. The earnings of the ten States comprising the Southern Group were \$71,861,795 in 1884 against \$69,844,273 for 1883, the increase for the year being \$2,017,522. The earnings of the six great lines within the territory lying to the south and west of Lake Michigan were, in 1884, \$74,253,296, against \$75,564,744 in 1883, the decrease for the year being only \$1,211,448. The number of tons moved by these lines in 1884,

was 32,573,518 against 31,663,979 in 1883. The rate per mile was 1,251 cents in 1884 against 1,308 cents in 1883. These lines were mainly free from the competition which so disastrously affected many Eastern ones, each of the former having a large local business of its own. With the exception of the class of roads referred to in the preceding paragraph, which embrace a comparatively limited number of lines, rates and business for 1883 were fairly maintained. With the recovery by the Trunk lines of their business—a slow but certain process—which is not to be relatively on the scale of the past, our whole system will again assume something of its wonted prosperity. It is not to be forgotten that a great change has taken place the world over in the abundance of capital compared with that of former years. The rates for money, in this country at least, are to be very much less in the future than they have been in the past, so that a 5 per cent. investment will be looked upon as quite as desirable as was an 8 per cent. a few years ago. We give, in this connection, to illustrate the general progress of the country and of the business of railroads, a series of Tabular Statements showing their freight movements, and the earnings from that source, from 1870 to 1884 inclusive, of six great lines entering Chicago from the West and South-west. During this whole period, their mileage has been greatly increased, but the increase of mileage was very slight from 1883 to 1884.

Statement showing the earnings of, tons of freight moved, and tons of freight moved 1 mile, and the rates per ton per mile charged by, the Chicago and Alton, the Chicago, Burlington and Quincy, the Chicago, Milwaukee and Saint Paul, the Chicago and Rock Island, and Illinois Central Railroads, from 1870 to 1884, inclusive.

The cause of the recent falling off in the earnings of our railways was a reduction in rates equal to only a little over one mill per ton per mile. An increase of net earnings equal to only one mill per ton on the freight moved by the New York Central would have added \$1,970,087 to the net earnings of that line. An additional charge equal in the average to one mill per ton per mile on all the tonnage transported by the railroads of the country for 1884 would have added over \$44,000,000 to their net earnings.

It would seem natural, when the tide turned, that the expenditure of \$1,200,000,000 upon 40,000 miles of new line, in the period of five years, ending with 1883, would have been followed by an extraordinary monetary stringency similar to that which followed the great movement in the five years ending with 1873, during which fully 27,000 miles of new line were constructed. At the close of the five years, ending with 1873, the condition of the country was only a little short of bankruptcy, in which the banks and the great producing and commercial interests were alike involved. The earnings of our railroads which, in 1873, equalled \$526,419,935, fell off in 1874 to \$520,466,016; in 1875 to \$503,065,505; in 1876 to \$497,257,959, and in 1877 to \$472,909,272. It was not until 1878 that there was any indications of recovery, the railroad earnings for that year being \$490,103,351, an increase of \$17,194,079 from the previous one, the gross amount still being \$36,316,584 below those of 1873.

It is not necessary here to enter upon the causes of the long period of depression which followed 1873. Its most striking feature was the lack of money—of capital for carrying on the ordinary operations of the country. The most striking feature which so far has followed the period ending with 1883 has been the abundance of money—of capital. The railway movement ending with 1873 was a most exhaustive one. The labor of years of our people was then required to restore the waste and exhaustion that had been suffered. In the period which followed 1883, in the face of a recent expenditure of \$1,200,000,000 on new lines, capital has been far more abundant than at any previous period in our history, showing how much stronger the ground upon which the country now stands than that upon which it stood in the period following 1873. For the period of five years, ending with 1883, the earnings of railroads were excessively stimulated by the extraordinary expenditures that had been made upon new lines. When this stimulus

was withdrawn there was an excessive falling off of earnings. The falling off in 1884, equalling \$52,988,016, or at the rate of 6.5 per cent. From 1873 to 1874, however, the earnings, which then had not received such extraordinary impulse, fell off to the extent of only \$5,953,919, or at the rate of 1.1 per cent. The decline in earnings from 1874 to 1875 was \$17,400,511, or nearly threefold greater than for the previous year, showing a much greater degree of depression for 1875 than for 1874. The earnings of the railroads for 1885 will not be much below those of 1884. There is every reason to believe that in 1885 railway earnings will reach their lowest ebb, and that in 1886 they will show a decided increase over those for the current year, or even over those for 1884. The periods preceding and following 1873 and 1883 have many similar features, but they are wholly unlike in this, that in the period which preceded 1873, the capital of the country was thoroughly exhausted in the construction of 27,000 miles, and that the losses sustained had to be restored in the period that followed, which was one of great commercial and industrial depression and distress; while in the period which preceded 1883, capital steadily increased in abundance in face of the enormous expenditures that had been made, so that the period when it closed, instead of ending as did that closing in 1873 in a great crisis in which all interests were alike disastrously involved, closed with a capital greater in abundance than when it was entered upon. The evils, if they can be called such, under which the country now apparently labors, is a plethora not an absence of capital. The problem now before the people is not a restoration of the waste of the past, but some disposition of its vast accumulations.

The vast magnitude of the operations of the country in railways, in the period of five years, ending with 1883, is well shown by the annexed tabular statement of the amount of the listings of the share capital and bonds of the railways of the country at the New York Stock Exchange for a period of six years, ending with 1884. Their gross amount for six years equalled \$3,361,017,293; for five years ending with 1883, \$3,030,762,319. A portion of these listings were the stocks and bonds of reorganized companies, such as Erie, Wabash, and others, and were so far relistings under new names and forms. Estimating the relistings at \$500,000,000 the amount of new securities listed in the five years equalled \$2,530,762,319, the average being over \$500,000,000 annually. The listings equalled something over \$60,000 to the mile of new lines. In addition very large amounts of securities were issued, which were not listed at the Stock Exchange. In addition, in the period of five years, large amounts of securities of new lines were listed at the Stock Exchanges of Boston and Philadelphia. It was inevitable that operations conducted for years on such a colossal scale should be followed by a violent and excessive reaction—a reaction not caused by any want of capital, but showing itself in an almost entire cessation in the construction of railroads and in the creation of new securities. The listings up to July 1, 1885, have equalled only \$39,515,466. The following statement of the amount of exports and imports of the country from 1864 to 1883, inclusive, divided into periods of five years each, strikingly illustrates the material progress of the country in the twenty years. The balance of trade against the country in the ten years ending with 1873 was \$1,047,069,219. In the period of ten years ending with 1883, the balance of trade in its favor equalled \$1,306,543,249. The actual change in the last ten years over the previous ten has been \$2,353,612,463. The progress of the country in wealth has been in a ratio even greater than the increase of its exports over its imports. For 1884, the exports of merchandise from the United States equalled \$740,503,000;

NOTE.—The "annual increase of mileage" usually represents the net increase within the year named. For construction in 1884 reference should be made to the statement appended hereto. In 1880 the record of construction showed a total of 7,174 miles. In the following year a readjustment and correction of the mileage of all the States, and the elimination of certain mileage which had been abandoned reduced the total more than 200 miles, all of which has been temporarily deducted from the construction of that year pending the completion of a careful revision of the table, so as to credit to each year the exact mileage thereof.

In 1883 the total mileage was reported as 121,592 miles. Corrections during the year made a net reduction of 133 miles. The construction of the year, 3,977 miles, would bring the total up to 125,569 miles, but this has been further reduced 170 miles by corrections, etc., as follows :

Mileage of Middle Group in 1883, 18,806 miles; add construction in 1884, 462.03—total, 19,268.03 miles. Deduct New York, Ontario and Western track taken up during 1884, 27.78 miles; Hudson Connecting (duplicated), 5.50; New York and Greenwood Lake (not in operation), 5.33; Shenango and Allegheny (now treated as side-track), 5.60; Pitts-burgh and Western (now treated as side-track), 5.50; sundry corrections, due to more accurate returns, 15.17—total, 64.85 miles, leaving mileage December 31, 1884, 19,203.15 miles. Mileage of Southern Group in 1883, 18,846 miles; add construction in 1884, 1,103.37—total, 19,951.37. Deduct lumber roads in North Carolina eliminated from records, 37.50 miles; in Georgia, the Ocmulgee and Horse Creek Railroad eliminated from records, 33 miles; the Etowah and Deatons, rails torn up, 9 miles; and the Memphis Branch, abandoned, 5 miles—total to be deducted, 84.50 miles, leaving 19,866.87, to which add 22 miles of Pensacola and Mobile not previously reported, and 5.81 miles for sundry increases. Mileage of Western Group in 1883, 68,284 miles; add construction in 1884, 1,845—total, 70,169. Deduct Cleveland, Painesville and Ashtabula (8 miles), and Rocky River (5.53 miles), both now included in New York, Chicago & St. Louis; Ohio Inclined Plane and Private Railways, 20.29 miles, now eliminated from the records; Valley Railway of Ohio, 3 miles of mine branches, now treated as side-tracks—total to be deducted, 36.82 miles, leaving 70,132.18, to which add 42.37 miles, mileage of St. L., D. M. & N. not previously reported; and 57.36 for corrections in measurements, etc., making total December 31, 1884, 70,231.91. The difference in the New England Group, about 2 miles, is wholly from greater accuracy in returns, and in the Pacific Group (a net increase of 8 miles) to sundry corrections, less Black Diamond of California, 6 miles, abandoned. Of the decrease in the year, 14.1 miles was in road now treated as side-track, 10.8 miles duplicated, 64.3 miles taken up, and 90.8 miles of private track eliminated from record. This makes a total of 150 miles against a net decrease of 170 miles, showing that the correction in measurements increased the total previously reported by 10 miles.

STATEMENT showing the amount and description of securities listed at the New York Stock Exchange during the six years ending December 31, 1884.

NOTE.—The entries to which the asterisks are affixed include, in whole or in part, securities previously listed, but appearing in new forms in the reorganization of companies, or otherwise; or represent a total provision of issue not yet fully made. The statement does not, consequently, show the total amount of new securities created in the period which it covers. The amount, however, of old securities appearing in a new form bear only a very small proportion to the aggregate amount of listings. For explanation in the special cases see MANUAL OF RAILROADS.

ATLANTIC AND ST. LAWRENCE RAILROAD.

Line of Road.—Portland, Me., to Island Pond, Vt. 149.37 miles.
 Berlin Falls Branch: Junction to Berlin Falls, N. H. 1.25 miles.

Total A. & St. L. RR. proper (Me., 82.55; N. H., 53.27; Vt., 14.80) 150.62 miles.
 Sidings, etc., 29.23 miles. Gauge, 4 ft. 8½ in. Rail (steel, 149.37 miles), 65 lbs.

Chartered in Maine, February 10, 1845; in New Hampshire, July 30, 1847; and in Vermont, October 27, 1848; authority being granted in the latter State for the construction of the line from the New Hampshire State line to the Canada boundary. Construction commenced July 4, 1846, and road opened from Portland to Island Pond, Vt., on the 20th of January, 1853. On the 5th of August, 1853, under sanction of the several State Legislatures, the line was leased to the Grand Trunk Ry. Co., of Canada, for 999 years, the lessee assuming

all outstanding obligations and guaranteeing 6 per cent. on the stock. At the time of making this lease the section from Island Pond to the Canada line (15.83 miles) was unfinished. In 1854, under an agreement between the Grand Trunk Ry. Co. and the Atlantic and St. Lawrence RR. Co., that section was built by the former company, which, in order to provide the necessary means, created a 6 per cent. sterling bond for £90,000, which was indorsed by the Atlantic and St. Lawrence RR. Co. During the fiscal year 1882-83 these bonds were paid off.

Operations for year ending June 30, 1884.—Trains run (passenger, 180,216; freight 489,-411; mixed, 177,174), 816,801 miles. Total engine service, 1,132,568 miles. Passengers carried, 257,691; carried one mile, 11,080,837. Freight moved, 767,751 tons; moved one mile, 89,501,360 tons.

Net earnings (16.27 per cent.), \$173,347.68; rents received, \$2,063.76; total net revenue, \$175,411.44. Dividend charge under lease, \$330,684.80.

Financial Statement, June 30, 1884.—Capital stock, \$5,484,000; funded debt (City of Portland bonds, 1st mortgage 6s, due November 2, 1888, \$787,000; 2d mortgage 5-20 bonds of October 1, 1864, £309,900, or \$1,499,916; 3d mortgage 5-20 bonds of May 1, 1871, £147,-000, or \$712,932; balance due on exchange of bonds, \$152), \$3,000,000—total representing cost of road, etc., \$8,484,000. Par value of stock: Currency, \$100; sterling, £100, or \$484. The \$3,000,000 bonds are all held by the Grand Trunk Ry. Co., which issued against them its 5 per cent. perpetual debenture stock.

The sinking fund for the redemption of the City of Portland bonds amounted July 31, 1884, to \$519,175.84, invested as follows: City of Portland bonds, \$367,500; county bonds, \$5,000; United States bonds, \$10,000; loan, Portland bonds as collateral, \$19,000; real estate, \$16,000; deposit on interest, \$101,675.84—total, \$519,175.84.

Annual meeting, first Tuesday in August. Dividends, of which 57 semi-annual have been paid to date, are payable February and August, at Portland, Maine, on \$ shares, and March and September at London, England, on £ shares.

The Grand Trunk Railway Act of 1884 gave that company power to redeem the rental payable to the Atlantic and St. Lawrence Co. by the issue of 4 per cent. debenture stock.

LEWISTON AND AUBURN BRANCH RAILROAD.—Lewiston, Me., to Auburn, Me., 5.50 miles; total track, 5.75 miles. Chartered in 1872; opened in 1873, and leased to the Grand Trunk Ry. BANGOR AND PISCATAQUIS RAILROAD.

Line of Road.—Oldtown, Me., to Blanchard, Me.....62.80 miles. Sidings, etc., 3.50 miles. Gauge, 4 ft. 8½ in. Rail (steel, 2 miles), 56 lbs.

Chartered March 5, 1861; road opened from Old Town to Dover in December, 1869; to Guilford, November, 1871; to Abbott, December, 1874; to Blanchard, in May, 1877. On opening of this road to Abbott, in 1873, it was leased to the European and North American Ry. Co., which operated it until December 1, 1876, when the company resumed possession, default having been made in rental due October 1, 1876.

An extension from Blanchard to Greenville on Moosehead Lake, 13.7 miles, was completed and opened for business July 14, 1884. To provide the means for its construction a new issue of \$300,000 10-30-year bonds, dated April 2, 1883, interest 5 per cent., payable semi-annually April 2 and October 2, was made. These bonds have precedence of the city of Bangor loan.

Rolling Stock (December 31, 1883).—Locomotive engines, 5. Cars—passenger, 4; baggage, mail, etc., 2; freight (box, 42; platform, 58), 80—total, 86.

 { *Eastern Maine RR.*. 18.90
 { *Maine Shore Line RR.*. 41.16—224.27 miles.

Total operated October 1, 1884 (owned 303.20; leased, 224.27). 527.47 miles.
Sidings, etc. (owned, 59.45; leased, 28.49), 89.94 miles. Gauge, 4 ft. 8½ in. Rail (steel, owned, 240.00; leased, 155.26 miles), 58 and 60 lbs.

The Androscoggin and Kennebec RR. Co., was chartered May 28, 1845. Its road, extending from Danville Junction, on the Atlantic and St. Lawrence RR., to Waterville, 54.6 miles, was opened November 27, 1849. The Penobscot and Kennebec RR. Co. was chartered April 7, 1845, and completed its road from Waterville to Bangor, 54.9 miles, in August, 1855. On October 28, 1862, these two companies were consolidated under the name of the Maine Central RR.

Co., the capital stock of the new company being placed at \$1,125,762.02—about equal to the stock of the two original companies. The Androscoggin Company had outstanding \$179,457 bonds issued prior to 1860, \$1,100,000 issued in 1860, \$710,000 convertible into stock, and a floating debt of \$170,990.37. On the Penobscot road there were outstanding \$800,000 City of Bangor bonds; \$300,000 second, and \$150,000 third, mortgage bonds. Interest on the two last issues being in default, an arrangement for the re-adjustment of the bonded debt resulted in the creation of a mortgage to secure an issue of \$400,000 8-year bonds by the M. C. Co., of which \$75,000 were applied to payment of certain liabilities of the P. & K. RR. Co., and about \$240,000 were issued at par in exchange for overdue coupons on P. & K. 2d mortgage bonds, and at 40 for bonds and overdue coupons of P. & K. 3d mortgage bonds.

In 1869 it was proposed to acquire by consolidation the line of the Portland and Kennebec RR. Co., but, failing to receive legislative sanction, the project was temporarily abandoned. The Portland and Kennebec RR. Co. was a reorganization, and in 1862, of the Kennebec and Portland RR. Co., which was originally chartered April 1, 1836, and completed its road from Portland to Augusta, 63 miles, with branch from Brunswick to Bath, 9 miles, January 1, 1851. In addition to its own road the Portland and Kennebec Company operated under lease the Somerset and Kennebec RR., extending from Augusta to Skowhegan, 37.4 miles. In 1870 an agreement for the lease of these lines was entered into, and on the 13th of November, 1871, the M. C. Co. completed and opened an extension of its road from Danville Junction to Cumberland Junction (P. & K. RR.), 18.3 miles, the object being to secure an independent line into Portland. The cost of this extension was covered by an issue of \$496,500 6 per cent. gold extension bonds. By the terms of the lease of the P. & K. RR. the Maine Central RR. Co. issued its stock to the amount of \$1,716,600 in exchange for the stocks of the P. & K. and the S. & K. RRs., making the total stock at that time, exclusive of stock-bonds, etc., \$3,400,500. The increase in stock between 1862 and 1870, was principally in exchange for convertible bonds of A. & K. RR. Co. The bonded debt up to 1868, had been correspondingly decreased. In that year provision was made for an issue of \$1,100,000 30-year bonds to retire outstanding bonds at their maturity. The lease of the P. & K. RR. added to the bond account the bonds of that company and of the S. & K. RR. Co., aggregating nearly \$2,000,000.

On June 29, 1871, the Androscoggin RR., Brunswick to Leeds Junction, 34.9 miles and Crowley's Junction to Lewiston, 4.7 miles, was leased for 999 years, the M. C. Co. assuming all liabilities, amounting to \$565,000, and issuing to the Androscoggin Co. \$200,000 stock and \$333.33 cash. By this lease, which was virtually a consolidation of the two companies, the M. C. Co. also acquired control of the Leeds and Farmington RR., an extension of the Androscoggin from Leeds Junction to Farmington 36.3 miles, which was leased to that company. By the contract with the L. & F. Co. the M. C. assumed payment of interest and principal of the latter's bonds, in consideration of which the stock of the L. & F. Co. was transferred in trust for the benefit of the M. C. Co.

On March 19, 1872, pursuant to Act of February 7, 1872, the directors voted to issue \$9,000,000 consolidated bonds, of which \$8,053,595 were reserved to retire prior issues.

By Act of February 26, 1873, a consolidation was effected between the Maine Central, the Portland and Kennebec, the Somerset and Kennebec, and the Leeds and Farmington RR., companies forming the present corporation, the consolidation going into effect November 16, 1874. Since that time no increase has been made in mileage except through the acquirement of lines under lease, of which full particulars are given in the statements for the respective companies.

On June 23, 1884, the Mount Desert branch was opened for traffic. This line was built under the charter of the Maine Shore Line RR. Co. (*which see*) by the Maine Central RR. Co., the latter making an issue of 5 per cent. collateral trust bonds for that purpose.

Rolling Stock.—Locomotive engines, 82. Cars—passenger, 93; baggage, mail, etc., 38; freight (box, etc., 796; platform, 1,029), 1,825—total, 1,956. Also 48 service cars, 21 snow-plows, 15 flange-scrappers, 27 platform construction-cars, and 101 leased freight cars.

Operations for year ending September 30, 1884 (average 494.52 miles).—Trains run (passenger, 925,345; freight, 743,540), 1,668,885 miles. Total engine service, 2,314,163 miles.

Passengers carried, 1,214,380; carried one mile, 49,615,166; average per mile, 2.42 cents. Freight moved, 758,937; one mile, 61,632,003 tons; average per mile, 2.39 cents.

* The Bangor City Loan was issued to aid in the construction of the European and North American Ry., and is a lien on the portion of that line extending from Bangor to Winn, 55 miles. By the terms of the lease the M. C. R. R. Co. assumed this issue, together with \$19,000 old first mortgage bonds of same company which became due August 1, 1883, and were paid off.

The consolidated bonds of 1872-1912 are divided into four classes, A, B, C & D. Of Class A there are outstanding \$975,000; Class B, \$1,515,500; Class C, \$1,414,600; Class D, \$110,000. Class B will be further increased by the consolidation of the Maine Central issues; Class C by the Portland and Kennebec bonds and stocks; and Class D by the Androscoggin and the Leeds and Farmington issues. The trustees are to reserve an amount sufficient to retire all other issues. Bonds of Class A are also reserved for the purchase of equipment and the funding of the floating debt.

The interest on all classes of bonds (except City of Bangor bonds) is payable at the Treasurer's office and First National Bank, Portland, Me., and Second National Bank, Boston, Mass. Interest on City of Bangor bonds is payable at Merchants' National Bank, Boston.

Since close of fiscal year the board of directors has authorized an issue of \$600,000 10-20 6 per cent. gold bonds, with a sinking fund in the Portland Trust Co., proceeds to be applied to payment of floating debt.

BELFAST AND MOOSEHEAD LAKE RAILROAD.—Belfast to Burnham, Me., 33.10 miles. Incorporated February 28, 1867, to build a road from Belfast to Moosehead Lake via Newport. Company organized July 3, 1867. On June 10, 1869, the company entered into a contract to lease its road to the Maine Central R. R. Co. at an annual rental of \$48,000, it being provided that said road should be completed on November 1, 1870. Contract let for construction of road from Belfast to Newport July 8, 1868, and on July 12, said contract modified changing terminus to Burnham. Road completed in September, 1870, but M. C. R. R. Co. refused to accept it under the lease above referred to. On April 27, 1871, a new lease was made to the M. C. R. R. Co. for a term of 50 years, from May 10, 1871, at an annual rental of \$36,000, payable semi-annually May 10 and November 10, lessee paying all taxes, etc. Capital stock (\$267,700 preferred and \$380,400 non-preferred), \$648,100; funded debt, \$150,000 6 per cent. first mortgage 20-year bonds, due November 15, 1890, interest August and February; \$87,900 City of Belfast loan note (balance), due 1885—total, \$886,000. Toward payment of City of Belfast loan note the company has a sinking fund of \$82,163.25, and is

holding that sum and its balance of future earnings after the payment of interest and expenses subject to order of the Supreme Judicial Court of Maine (see below). The City of Belfast holds 3,604 shares of non-preferred and 1,396 shares of preferred stock. Individual stockholders hold 1,281 shares of preferred stock, and the town of Brooks 200 shares of non-preferred. The subscription contract with all subscribers to stock is conditioned that—"No mortgage or other encumbrance shall ever be placed upon the road." By the 18th by-law the preferred stock is entitled (from net earnings) to 6 per cent. The non-preferred is then entitled to 6 per cent., if earned. Upon all net beyond, the two share equally. The rental received up to May, 1878, was applied to the payment of interest on bonds and debt, the liquidation of floating debt, and the reduction of the loan note. From May, 1878, to November, 1882, it was applied to payment of interest on bonds, semi-annual dividends of 2½ per cent. each on preferred stock and accumulation of sinking fund. Individual preferred stockholders claim to be entitled to semi-annual dividends of 3 per cent. each, and to be exempt from the burden of interest and principal of indebtedness. The City of Belfast claims that indebtedness (principal and interest) is a common burden on both classes of stockholders, and that balance of earnings after payment of interest and expenses shall be withheld by company to pay the principal of the company's indebtedness at maturity. The question is now in litigation to determine the respective rights of each class of stock. Income year ending September 30, 1884—Rental, \$36,000; interest and other receipts, \$2,499—total, \$38,499. Expenses, \$138.50. Paid interest on bonds and city note, \$14,274. Balance, surplus, \$24,086.50. ISAAC M. BOARDMAN, *President*; John H. Quimby, *Treasurer*, Belfast, Me.

DEXTER AND NEWPORT RAILROAD.—Newport to Dexter, Me., 14 miles. Chartered 1865; opened 1868. Leased December 1, 1868, for 30 years from November 25, 1868, to the Maine Central, at an annual rental of \$18,000, or about 6 per cent. on the cost of the road, \$297,000 represented by \$122,000 stock and \$175,000 bonds. C. SHAW, *President*; George Hamilton, *Treasurer*, Dexter, Me.

EASTERN MAINE RAILROAD.—Bangor, Me., to Bucksport, Me., 18.10 miles; total track, 20.68 miles. Gauge, 4 ft. 8½ inches. Rail, 56 lbs. Chartered as Bucksport and Bangor RR. in 1871. Road opened December 12, 1874. Leased on opening to European and North American Ry. Co. at 40 per cent. of its gross earnings. In November, 1876, the rental was reduced to 35 per cent. The company making default on its first mortgage 7 per cent. bonds, amounting to \$380,500, the road was sold under foreclosure in March, 1879, and purchased on account of the bondholders, who reorganized the company under its present name February 1, 1882. On the first of May, 1883, the road was leased in perpetuity to the Maine Central RR. Co. at an annual rental of \$9,500. Rolling stock not included in lease. Financial Statement, January 31, 1885—Capital stock, \$551,690. Construction, \$552,952.50; equipment, \$25,000. The original cost of the road was \$615,096.52. A bill is before the Legislature for reduction of capital stock to \$200,000. EUGENE HALE, *President*, Ellsworth, Me.; G. W. Kimball, *Treasurer*, Rockland, Me.; L. A. Emery, *Secretary*, Ellsworth, Me.

EUROPEAN AND NORTH AMERICAN RAILWAY.—Bangor, Me., to Vanceboro', Me. (steel), 114.10 miles. Chartered August 20, 1850; road opened in 1871; leased in perpetuity, April 1, 1882, to the Maine Central RR. Co. at an annual rental of \$125,000. A grant of about 500,000 acres of land was donated to the company by the State of Maine in 1868. In December, 1869, the European and North American Railway of New Brunswick was completed, and in December, 1872, the two roads, forming a continuous line from Bangor, Me., to St. John, N. B., 205.5 miles, were united under one management. In 1875, default in interest having been made, the companies separated. The New Brunswick division was reorganized as the St. John and Maine Railway. The Maine division was surrendered October 2, 1876, to the trustees of the Land Grant Mortgage, by whom proceedings for its foreclosure were begun September 1, 1877, and terminated October 4, 1880, when a new company, with the name of the old, was formed under the laws of the State of Maine, which provide that mortgage bondholders of railroads, upon foreclosure of the mortgage, may become stockholders in a new company under the old franchise, to corresponding amounts. The total amount of Land Grant bonds outstanding at the date of present company's organization was \$2,000,000; overdue interest on the same, \$660,000—a total of \$2,660,000, of which all but \$14,630 had been converted into stock up to September 30, 1884, or retired by the operation of the sinking fund. Capital stock, \$2,446,000; Land Grant bonds and coupons, \$14,630—total, \$2,499,330. Construction, \$3,255,570.23. Under the lease to the Maine Central RR. Co. the latter assumed payment of the \$1,000,000 Bangor City bonds and the \$19,000 first mortgage bonds. The last named bonds have since been retired. The rolling stock was transferred to lessee. Dividends (each 2½ per cent. on total capital stock of \$2,500,000) paid at office of treasurer, on April 1 and October 1. NOAH WOODS, *President and Treasurer*; Charles P. Stetson, *Secretary*, Bangor, Me.

MAINE SHORE LINE RAILROAD.—Penobscot Switch, Me., to Mount Desert Ferry, Me., 41.7 miles. Chartered March 4, 1881; charter amended January 24, 1883. Authorized to construct a railroad from some point on the St. Croix River in Calais to Bangor.

Of this line there was completed and opened June 23, 1884, the section as above. This section, known as the Mount Desert Branch of the Maine Central RR., was built by the latter company under the terms of a perpetual lease, dated July 16, 1883. By this lease it was stipulated that the Maine Central Co. should receive from the Maine Shore Line Co. bonds to an amount not to exceed \$750,000, secured by a mortgage on this line of road. These bonds, which bear 6 per cent. interest, payable June and December, and mature in 40 years, are deposited with the American Loan and Trust Company of Boston as security for an issue of a like amount of Maine Central Collateral Trust bonds, payable in 40 years, and bearing 5 per cent. interest. The Maine Central RR. Co. assumes the payment to the Trust Co. of the interest on the Maine Shore Line bonds. From the amount thus received the Trust Co. is to pay the interest on the Maine Central 5 per cent. Collateral Trust bonds, and to apply the remaining 1 per cent. to a sinking fund to retire said Collateral Trust bonds. When these bonds shall have been so retired, the title to this branch road will become vested in the Maine Central RR. Co. Capital stock authorized (\$10,000 per mile), \$2,500,000; paid in, \$10,000. The portion of this road extending from Hancock to the St. Croix River has been surveyed, and will probably be constructed by the Maine Shore Line RR. Co. JOSEPH N. GREENE, *President*, Bangor, Me.; H. E. Hamlin, *Treasurer*; L. A. Emery, *Secretary*, Ellsworth, Me.

Consolidation (1873) of the Boston, Concord and Montreal RR. Co. (chartered December 27, 1844; opened to Wells River in 1853) and the White Mountains RR. Co. (chartered December 24, 1848; completed to Eitleton in 1853). The White Mountains RR. was sold under foreclosure February 1, 1859, and on reorganization leased to this company, which in 1872 purchased the road, extended it to Northumberland, and in 1874 constructed the branch to the base of Mount Washington. The Portland and Ogdensburg Railroad Co. uses the tracks of this company between Fabyan's and Scott's Mills, 20.5 miles. The Pemigewassett

Valley Railroad is leased for 99 years at an annual rental equalling 6 per cent. on its cost. Surveys have been made for an extension from Northumberland to Colebrook.

Since close of fiscal year, this road and its leased line passed under the control of the Boston and Lowell RR. Co., under lease. See statement for Boston and Lowell RR.

The Vermont Central R.R. Co., was chartered October 31, 1843, to build a line of railroad from Windsor to Burlington, Vt., which was completed and opened throughout its entire length on the 31st of December, 1849. On the 31st of October, 1845, the Vermont and Canada R.R. Co. was chartered to build from Essex Junction, Vt., to the Canada line practically an extension of the Vermont Central R.R. The construction of this line progressed slowly. On August 24, 1849, the road was leased to the Vermont Central R.R. Co. for twenty years (subsequently, on January 11, 1850, extended to fifty years) at an annual rental equal to 8 per cent. on its cost, the Vermont Central R.R. Co., creating a mortgage on its own property as security therefor. In 1851 the road was completed, its cost having been \$1,348,500, on which the rental would be \$107,880. In 1851 the Vermont Central Co. made an issue of \$2,000,000, first mortgage bonds, and in 1852, \$1,500,000, second mortgage bonds. Shortly after the latter issue the company becoming embarrassed, its roads and property were placed in the hands of the trustees of its first mortgage bonds. On the 1st of November, 1854, default was made in the payment of Vermont and Canada R.R. rental, and on the 1st of December following in pay-

ment of Vermont Central bond interest. Under a provision of the lease, the Vermont and Canada Co., in May, 1855, acquired control of the roads as receiver, and operated them until May, 1856, when the overdue rental having been liquidated, the road was surrendered to the trustees who were then given the powers of receivers.

The capital stock of the Vermont and Canada RR. Co. was increased to \$2,000,000 under an arrangement sanctioned by decree of the Court of Chancery in Vermont, dated January 19, 1864, whereby the past due rentals were reduced and then funded. This arrangement also provided that sufficient of the income of the property after payment of rental should be appropriated to the construction of the Swanton branch, and in pursuance of this, there was issued an additional \$250,000 stock, making the total \$2,250,000. In 1867, \$250,000 additional was issued for similar purposes, and in 1871, \$500,000 stock, increasing the total to \$3,000,000, was issued and used to fund a debt of \$114,500 due the Vermont and Canada, and to pay dividends and extinguish trust liabilities.

In 1867 the trustees purchased the Stanstead, Shefford and Chambly RR., from St. John's, P. Q., to Waterloo, P. Q., 43 miles, paying therefor \$500,000. On the 1st of January, 1871, they took a lease for 20 years of the Rutland RR., including its Addison branch, and on the 1st of December, same year, leased the New London Northern RR. for a like period. For terms see statements for those roads. The Montpelier and White River RR. is operated upon terms not stated. The Brattleboro' and Whitehall RR. is also leased. The operations of the New London Northern RR., proper (100 miles) are not included in the following statements.

On the 2d of November, 1872, the Central Vermont RR. Co., was organized, and took charge of the roads as receiver, operating them as such from July, 1873, until January 17, 1884, when the receivership was terminated.

The relations of the Vermont Central and Vermont and Canada roads were a source of almost constant litigation. A decision was rendered in 1881 in the Supreme Court of the State, to the effect that the V. & C. RR. Co. had subordinated its claim for rental to the rights of the creditors of the Central Vermont, to the amount of some \$8,000,000, or to whatever might be found due them by the master to whom the matter of ascertaining the amount was referred. Upon the payment of the sums proved due, the Vermont & Canada RR. Co. to be entitled to possession of the roads of the former company. In August, 1883, the Supreme Court of Vermont rendered a final decision in the suit to establish the priority of the claims against the two roads. This decision was to the effect that the debt contracted by the receivers was a first charge upon the property, and was in the nature of an equitable mortgage on the Vermont Central and the Vermont and Canada Railroads, and ordered that the latter company, and the first and second mortgage bondholders of the former, should discharge the debt within the time limited by the court, or be forever after debarred of all right and title to the property.

In April, 1883, the Consolidated RR. Co. of Vermont was organized to carry out a plan which had been proposed for ending the litigation, and settling with all classes of security-holders. This plan provided for an issue of \$7,000,000 5 per cent. 30-year bonds, dating from July 1, 1883, interest payable January and July, and secured by a first mortgage on the Vermont Central and the Vermont and Canada Railroads, with an additional allowance of three months' interest from April 1 to July 1, 1886, to all bondholders who agreed to the proposed reorganization before April 1, 1883. Of these bonds \$1,000,000 were exchanged for the stock (\$3,000,000) of the Vermont and Canada RR. at 33½ per cent. of its par value, and \$4,357,000 exchanged for a like amount of "Equipment," "Income and Extension" "Guaranteed," and "Stanstead, Shefford and Chambly" trust bonds, dollar for dollar, holders of such bonds relinquishing all claims for overdue interest on the same. The balance after such payments (\$1,643,000) to be issued to retire the floating debt, estimated at \$1,000,000, and the other indebtedness of the trust, including the claim of the Central Vermont RR. Co., estimated at \$643,000, not including stock owned by the trust. The plan also provided for an issue of 7,500 shares of \$100 each, of preferred capital stock in exchange for the "first and second mortgage bonds" of the Vermont Central RR. Co., at the rate of 20 per cent. of the face value of the former, and 10 per cent. of the face value of the latter, without overdue interest.

This stock is entitled to 6 per cent. dividends annually, if earned but not cumulative, in preference to the common stock of the said company.

Under the provisions of this plan the reorganization was completed, and the property taken out of the hands of the receiver, January 17, 1884, the courts retaining control until July 1, 1884, when it was turned over to the Consolidated RR. Co. of Vermont. On the same day, that company executed a lease of the property for 99 years to the Central Vermont RR. Co., a new company organized for that purpose.

A reorganization (July 1, 1880) of the Vermont Division of the Portland and Ogdensburg RR. Company. Road completed in 1877, and in October of that year placed in the hands of a receiver. It is connected with the Portland and Ogdensburg RR. of New Hampshire and Maine by the Boston, Concord and Montreal RR.

At a meeting August 9, 1882, the stockholders voted to approve the lease by this company, in conjunction with the Montreal, Portland and Boston Co., of the Canada Junction RR. It was also proposed to transfer the interest to be acquired by this company, under the lease, to the Montreal, Portland and Boston Co.

Rolling Stock.—Locomotive engines, 15. Cars—passenger, 7; mail and baggage (combination), 3; freight (box, 135; hay, 5; butter, 5; stock, 8; bark, 10; flat, 127), 290—total, 300. Also, 2 derrick cars, 9 snow-plows, 31 hand, and 30 iron cars.

Operations for year ending June 30, 1884.—Trains run (passenger, 155,957; freight, 186,383; mixed, 52,099), 394,439 miles. Total engine service, 435,439 miles. Passengers carried, 87,773; one mile, 2,417,177. Freight traffic—not reported. Earnings—passenger, \$63,190.05; mails, etc., \$11,572.96; freight, \$215,707.50—total \$390,470.51. Operating expenses, \$228,642.76. Net earnings (21.29 per cent.), \$61,827.75; on hand from last year, \$80,684.34; available revenue, \$142,512.09. Paid interest and taxes, \$48,538.04; surplus, \$93,974.05.

Financial Statement, July 1, 1884.—Capital stock, par \$50 (preferred, \$1,298,500; common, \$2,550,000), \$3,848,500; funded debt, 1st mortgage, 6 per cent. 30-year gold bonds (interest April and October at Boston), due July 1, 1910, \$628,000; receivers' certificates, \$9,100; bills and accounts payable, \$449,346.86; profit and loss, \$93,974.05—total, \$5,028,920.91. *Contra* : Construction and equipment, \$4,508,690.05; unissued capital stock, \$256,450; steamboat and dock property, \$60,779.71; supplies, etc., \$123,693.19; accounts and balances, \$40,603.75; cash, etc., \$38,704.21.

On March 20, 1884, the stockholders authorized an issue of consolidated 30-year gold mortgage bonds limited to \$16,000 per mile, \$600,000 of which bear interest at 6 per cent., and are reserved to retire prior lien bonds. The remainder, which bear 5 per cent. interest and are to be used in improving the road, etc., are restricted in issue so as to be dependent on increased earnings. There have been issued of the latter \$400,000 payable April, 1914, interest (gold) payable January, April, July and October.

Boston Safe Deposit and Trust Co., of Boston, trustee of bonds. Interest paid by same. Annual meeting second Wednesday in August. Preferred stock entitled to dividend up to 6 per cent. before common stock. Both classes listed on on Boston Stock Exchange.

VERMONT VALLEY RAILROAD.

Line of Road.—Bellows Falls, Vt., to Brattleboro', Vt. 24 miles.
2d track, 2.5 m.; sidings, 1.00 mile. Gauge, 4 ft. 8½ in. Rail (steel, 24 m.), 56 lbs.

Chartered November 8, 1848; road opened in 1851. Leased May 12, 1865, to trustees for

10 years, at an annual rental of \$60,000. Lease transferred to the Rutland RR. Co. January 23, 1871, and operated by that company until April 5, 1877, when the road was surrendered to the Vermont Valley RR. Co. of 1871, which has since operated it under arrangement with the Connecticut River RR. Co. Toward the close of 1880, the V. V. RR. Co. purchased the Sullivan County RR., and to provide means for such purpose made an issue of \$800,000 30-year bonds dated October 1, 1880, interest 5 per cent., payable April and October. These bonds are secured by a first mortgage on the line of the V. V. RR. and by a collateral pledge of the \$500,000 capital stock of the S. C. RR. to the Boston Safe Deposit & Trust Co., trustee of the mortgage. The dividend declared on the Sullivan RR. stock pays the interest on the bonds. On June 1, 1881, the V. V. RR. Co. took formal possession of the road.

Second track, 211.37 ; sidings, etc., 222.15 m. Total track owned (steel, 524.09 ; iron, 210.96), 735.05. Gauge, 4 ft. 8½ in. Rail, 60 to 72 lbs.

Of the Athol Branch, 1.30 miles are operated by the N. Y. & N. E. RR. Co.

The Boston & Worcester RR. Co. was chartered June 23, 1831, to build a line from Boston to Worcester, 44.63 miles, which was completed and opened July 4, 1835. Second track laid in 1843. Branches opened to Milbury and Saxonville in 1846 ; to Lower Falls, Milford and Brookline in 1847 ; to Framingham Centre in 1849.

The Western RR. Co. was chartered February 15, 1833, to construct a line from the terminus of the Boston and Worcester RR. to Springfield and thence to the western boundary of the State. The entire line was completed and opened September 13, 1841. The extension of this line in New York State, from the Massachusetts State line to Albany, 39.30 miles, was built by the Albany and West Stockbridge RR. Co., a corporation chartered May 5, 1836, and the road of which was constructed with means supplied by the Western RR. Co. of Mass. In November, 1841, it was leased by the latter company for the term of its charter, fifty years from April 13, 1840. The construction of the road was begun in 1838, and on December

24, 1840, the first section of road, extending from Albany to Chatham Four Corners, was completed. The remainder of the line was not completed until September 12, 1842, the company using in the mean time the track of the Hudson and Berkshire RR. Co. from Chatham Four Corners to the State Line, so as to complete its through line between Albany and Boston. On March 21, 1854, the Hudson and Boston RR., the whole line of which extended from Hudson to the Massachusetts line, was purchased in the interest of the Western RR. Co., and immediately thereafter that portion of the road between Chatham Four Corners and the State line was abandoned, it being parallel and contiguous to the Albany and West Stockbridge road. On September 4, 1867, the two Massachusetts corporations—the Boston and Worcester and the Western—were consolidated under the name of the Boston and Albany RR. Co., and on December 28, 1870, the latter corporation consolidated with itself the organizations controlled in New York State—the Albany and West Stockbridge, and the Hudson and Boston—forming the present company.

The line of the road was extended to the harbor at East Boston, through the purchase, in 1866, of the Grand Junction RR., which was opened to connect with the Boston and Worcester RR. in 1856. The Springfield and Northeastern RR., chartered in 1869 and opened December 3, 1873, was purchased on the 8th of July, 1880, for \$439,064.92, and is now operated as the Athol Branch.

Rolling Stock.—Locomotive engines, 243. Cars—passenger, 225; baggage and postal, 51; merchandise, 5,520; coal, gravel, etc., 637—total, 6,433. Snow-plows, 13.

Operations for year ending September 30, 1884.—Trains run (passenger, 1,949,970; freight, 3,531,108), 5,481,078 miles. Total engine service, 5,680,060 miles. Passengers carried (through, 94,721; way, 8,699,691), 8,794,412; carried one mile, 167,402,441; average rate, 1.91 cents. * For ten months only.

The South Boston Flats, formerly owned by this company, were sold to the New York and New England RR. Co., July 15, 1880, for \$30,000 in cash and \$300,000 in notes, payable at the option of the makers at any time within ten years from February 7, 1879; with interest at 2 per cent. for five years and 4 per cent. thereafter. The final transfer of the property not to be made until the notes are paid.

The funded debt consists of \$5,000,000 7 per cent. bonds, payable February 1, 1892, interest February and August at Boston; \$2,000,000 6 per cent. bonds, payable July 1, 1895, interest January and July at Boston; and \$3,858,000 5 per cent. bonds, payable April 1, 1902, interest April and October at Boston.

The new 5 per cent. bonds were issued to purchase the \$2,411,500 of stock held by the State of Massachusetts, at the rate of \$160 per share. The State is not now represented in the board of directors. On the 27th of September, 1883, the directors voted to distribute 17,588 $\frac{1}{2}$ of the shares so purchased to stockholders of record, at that date, in the proportion of one share for each ten shares owned.

 2d track, 26.75; sidings, 50.33 m. Gauge, 4 ft. 8½ in. Rail (steel, 78.47 m.), 60 lbs.

Chartered June 8, 1830; road opened June 26, 1835. Second track laid in 1841. The Middlesex Central RR. was leased from its completion, in 1873, at \$15,000 a year. During 1883 it was purchased with an issue of \$250,000 4½ per cent. bonds of the Boston and Lowell RR. Co. The Lowell and Lawrence and the Salem and Lowell Railroads were consolidated with the B. & L. RR., June 18, 1879. The Nashua and Lowell RR. (*which see*) was leased for 99 years from October 1, 1880. The Stony Brook, the Wilton and the Peterborough RRs. were acquired from the Nashua and Lowell RR. Co. for the unexpired terms of their respective leases.

On June 1, 1884, this company took a lease for 99 years of the roads of the Boston, Concord and Montreal RR. Co., and the Northern RR. Co. of New Hampshire, and their controlled lines, the Pemigewasset Valley, the Concord and Claremont and the Peterboro' and Hillsboro' RRs. By the terms of the lease the Boston and Lowell pays as rental to the Northern a sum

equal to 5 per cent. per annum on its capital stock; and to the Boston, Concord and Montreal a sum equal to 25 per cent. of the gross earnings of that road, the Pemigewasset Valley RR., the Northern (N. H.) RR., the Concord and Claremont RR. and the Peterboro' and Hillsboro' RR., less \$200,000 yearly, with a guarantee that this sum shall be sufficient to pay all interest charges of the Boston, Concord and Montreal RR. Co. and 6 per cent. on preferred stock for the first year of the lease, and 5 per cent. yearly thereafter. The Boston and Lowell RR. Co. also guarantees interest on the bonds of the Concord and Claremont and Peterboro' and Hillsboro' RRs., and agrees to provide for their payment at maturity on receiving bonds to an equal amount and of a like rate of interest which bonds will also be guaranteed by it.

On July 1, 1884, a five-years' traffic arrangement was made with the Concord RR. Co., the terms of which have not been made public. Under this contract the Manchester and Keene and the Nashua, Acton and Boston RRs. (*which see*) have been transferred to this company for the term of the agreement.

Rolling Stock.—Locomotive engines (owned, 101; leased, 46), 147. Cars—passenger (owned, 112; leased, 33), 145; parlor, 5; baggage, mail, and express (owned, 68; leased, 12), 80; freight, =8 wh. (owned, 2,198; leased, 803), 3,001; other (owned, 21; leased, 10), 31—total (owned, 2,404; leased, 858), 3,262.

Operations for year ending Sept. 30, 1884 (average 318.53 miles).—Trains run (passenger, 1,305,150; freight, 610,162), 1,915,312 miles. Total engine service, 2,511,181 miles. Passengers carried, 4,979,943; carried one mile, 61,343,056. Average rate per mile, 2.12 cents. Freight moved, 1,477,058: one mile, 59,427,991 tons. Average rate, 2.33 cents.

MANCHESTER AND KEENE RAILROAD.—Keene, N. H., to Greenfield, N. H., 29.55 miles; sidings, 1.67 miles. Gauge, 4 ft. 8½ in. Rail, 50 and 56 lbs. Chartered June 22, 1864; road opened November 29, 1878. When completed to Manchester the length will be about 46 miles. Placed in the hands of trustees April 1, 1880, and operated by Connecticut RR. Co. from October 1, 1880 until October 20, 1881, when the road was sold under foreclosure and bought on account of bondholders by S. W. Hale for \$125,000, the purchaser also assuming \$57,436 liens for repairs, etc. Early in 1882 the Boston and Lowell and the Concord RR. Cos. purchased the entire issue of bonds of this company—each one half. The road was then operated by the Boston and Lowell RR. Co., that company and the Concord sharing equally in its receipts and liabilities until July 1, 1884, at which time the Concord leased its share to the Boston and Lowell RR. Co. for a term of five years. The total cost of the property to the present owners, including original purchase, bonds and improvements to September 30, 1884, equalled \$525,190.64.

NASHUA, ACTON AND BOSTON RAILROAD.—Nashua, N. H., to Acton, Mass., 20.21 miles; total track, 22.74 miles. Opened July 1, 1873. Leased to the Concord RR. for ten years from January 1, 1876, at an annual rental of \$11,000; transferred to Boston and

Lowell RR. Co., July 1, 1884, for term of 5-year contract entered into with Concord RR. Co. In 1880 the Concord RR. Co. purchased a controlling interest in the road for \$250,000. Capital stock, \$500,000; funded debt, 1st mortgage 6 per cent. 20-year bonds, due October 1, 1895, interest April and October at office of Fitchburg RR. Co., Boston, \$500,000; bills payable, \$114,619.55; unpaid coupons, \$296,973—total, \$1,411,592.55. *Contra*: Construction, \$1,057,031.20; sundry dues, \$2,750; profit and loss, \$351,811.35. J. Consolidation (January 1, 1842) of the Boston and Portland, chartered in Massachusetts, March 15, 1833; the Boston and Maine, chartered in New Hampshire, June 27, 1835; and the Maine, New Hampshire and Massachusetts, chartered in Maine, March 12, 1839. Road opened from Wilmington, Mass., to South Berwick, Me., February 23, 1843. Between Wilmington and Boston the Boston and Lowell RR. was used until July 4, 1845, when an independent line was opened. The Methuen Branch was completed in 1849, and since its opening has formed the connecting link between the Manchester and Lawrence (to which it is leased) and the B. & M. RRs.

The extension to Portland, Me., was opened February 15, 1873. Two series of 7 per cent. bonds, \$3,500,000 in all, were issued for its construction.

On December 22, 1883, this company and the Eastern RR. Co. entered into an agreement dating from October 1, 1883, and to run for 54 years, by the terms of which the Eastern RR. Co. transferred to this company under lease all its property, rights, franchises and assets of every description, subject to mortgage dated June 22, 1876. By the terms of the lease it is agreed that the Boston and Maine RR. Co. shall operate the two systems to the best advantage of each, and shall make such improvements upon the properties as may from time to time become necessary. To meet the cost of such improvements the lessee shall issue improvement bonds, to run for the longest period allowed by law, and to be secured by a sinking fund of not exceeding 1½ per cent. per annum. The combined earnings of the two companies, from all sources, including dividends from investments, etc., shall be used to pay:

- (1) All expenses of operating both companies, such expenses to include ordinary operating expenses, taxes, interest and sinking fund of improvement bonds, interest on car trust and on loan for improvement of East Boston Wharf property, and \$10,060 yearly, payable quarterly, for organization expenses of Eastern RR. Co., such \$10,000 to include \$3,000 to be paid to the trustees under its mortgage.
- (2) Rentals of leased lines and interest on permanent debt of both companies.
- (3) From the surplus remaining, the Boston and Maine RR. Co. shall retain \$630,000 for its own use.
- (4) All surplus then remaining up to \$100,000 shall be paid to the Eastern RR. Co.
- (5) All surplus up to \$70,000 shall be retained by the Boston and Maine RR. Co.
- (6) All surplus up to \$336,000 shall be paid to the Eastern RR. Co.
- (7) Any surplus then remaining shall be applied to permanent improvements upon the properties of both companies, *pro rata*, according to mileage, including branches and leased roads,

so far as such improvements may be required; and the remainder, if any, may be applied to the purchase of the improvement bonds. Improvement bonds not paid at maturity by the sinking fund provided therefor, shall be paid from the proceeds of other improvement bonds to be issued by the lessee, of a like character and similarly secured by a sinking fund. Principal of car trusts and East Boston wharf improvement loan shall be paid from the proceeds of improvement bonds. Dividends on investments, mentioned above, do not include Portsmouth, Great Falls and Conway, and Wolfeborough RRs.

The Kennebunk and Kennebunkport RR. is leased to this company for 99 years from May 15, 1883, at a rental equaling 4½ per cent. per annum on the cost, \$65,000.

CENTRAL MASSACHUSETTS RAILROAD.

Line of Road.—Cambridge, Mass., to Northampton, Mass.....103.50 miles.
West Deerfield Branch: Amherst, Mass., to West Deerfield..... 13.20 miles.

Total length of railroad as projected.....116.70 miles.
Completed: Cambridge, Mass., to Jefferson, Mass..... 44.03 miles.
 Sidings, 3.13 miles. Gauge, 4 ft. 8½ in. Rail (steel, 47.16 miles), 60 lbs.

The Massachusetts Central RR. Co. was chartered May 10, 1869. Opened from Cambridge to Hudson, 23.50 miles, October 1, 1881; to Jefferson's, in December, 1881.

On July 1, 1882, the company made default in the payment of interest then due, and the trustees under the mortgage took possession of the property May 4, 1883. The operation of the road was suspended May 16, 1883, and still continues so. Sold under foreclosure September 1, 1883, and purchased on behalf of the bondholders, who organized the present company November 10, 1883. By the terms of the charter of the new company, preferred stock is to be issued dollar for dollar in payment of the mortgage debt of the old company, this stock to have entire control of the affairs of the company until such time as the road shall earn two semi-annual dividends of 4 per cent. each in any one year. Common stock to be issued share for share for the stock of the old company. It also authorizes the extension of the road from Bondville, Mass., to the New York State Line, and the leasing to or consolidation with the Poughkeepsie, Hartford and Boston, or any other road connecting with this line in Massachusetts or New York.

At the annual meeting October 29, 1884, it was stated that nearly all the old bonds and stock had been exchanged for new stock under the plan outlined above.

It was the intention of the company to have completed the road to Northampton by October 1, 1884, and with that end in view an engineer was appointed early in that year, under whose direction an examination of the road was made with a view to estimating the cost of the extension. The completed portion of the road was declared to be in good condition, and it was estimated that it would require about \$1,500,000 to complete and equip the road to Northampton. This money the company tried to raise by proposing that the preferred stockholders should subscribe to that amount, 1st mortgage 6 per cent. bonds, but as few subscriptions have been received it is not thought probable that the plan will succeed.

Financial Statement, September 30, 1884.—Capital stock paid in (common, \$3,393,900; preferred, \$3,852,088), \$7,245,988. Amount of other liabilities, etc., cannot be ascertained at the present time. The financial condition of the old Massachusetts Central Railroad Co., May 4, 1883, was as follows: Capital stock, \$3,500,000; funded debt, 1st mortgage (gold) 6 per cent. 20-year bonds, due January 1, 1900, interest January and July, \$3,500,500; unfunded debt, \$354,006.76—total, \$7,354,006.76. *Contra*: Cost of road, etc., \$7,003,763.98; cash and cash assets, \$1,436.66; profit and loss, \$348,806.12.

Directors (elected October 29, 1884).—Samuel N. Aldrich, Marlboro', Mass.; Elisha S. Converse, Malden, Mass.; Lyman Hollingsworth, Cohasset, Mass.; Wm. M. Gaylord, Northampton, Mass.; Henry F. Hills, Amherst, Mass.; J. Edwin Smith, Worcester, Mass.; William T. Parker, Thomas H. Perkins, Moses W. Richardson, Henry Woods, Samuel Atherton, Boston, Mass.

DEERFIELD RIVER RAILROAD.

Line of Road.—Hoosac Tunnel, Mass., to Sherman Station, Vt.....8 miles. Gauge, 3 feet. Rail (steel), 30 lbs. per yard. Projected to run from Hoosac Tunnel, Mass., to Readsboro', Vt., 11 miles, of which 8 miles, as above, are completed. The road is being built by the Deerfield River Co. to reach its wood pulp mills at Readsboro', Vt. It will be used chiefly for hauling wood pulp from the mills and material to them.

This company was formed by the organization, in 1873, of the holders of Berdell mortgage bonds issued by the Boston, Hartford and Erie RR. Co. That company was chartered in May, 1863, and was a consolidation of several small lines. It undertook the construction of a new railroad route from Boston to the Hudson River, and to a connection (by ferry) with the Erie Railway at Newburgh. To furnish the means therefor, bonds known as the Berdell

bonds, to the amount of \$20,000,000, were issued, secured by a mortgage on the lines built and to be built. Of these, \$5,000,000 were guaranteed by the Erie Railway Company, and \$3,600,000 were taken by the State of Massachusetts, the State issuing its own bonds in payment. The whole issue only sufficed to discharge underlying liens on the several consolidated lines, and to partially construct about 100 miles of new road. The B., H. & E. RR. Co. failing to pay the interest on its bonds, the present company was organized—the holders of the \$20,000,000 of bonds being allowed to become stockholders to equal amounts in the new company. The New York and New England RR. Co. took possession of the road from Boston to Willimantic, and from Brookline to Woonsocket in July, 1875, and of the road from Providence to Waterbury in October, 1878. To complete its road, purchase lands in Boston, construct stations, provide equipment, etc., etc., a new mortgage was issued to secure bonds to the amount of \$10,000,000.

On July 24, 1881, the Hudson River Extension of the road was opened from Waterbury, Conn., to Brewster's, N. Y., 190.36 miles from Boston, and on December 12, 1881, to Fishkill on the Hudson, 228.56 miles from Boston. Of this line the company owns from Boston to Hopewell Junction, N. Y., 215.04 miles. Between that point and Wicopee, 11.02 miles, it uses the line of the N., D. & C. RR. From this last point to Fishkill the company built 1.80 miles of line. A connection is made (by ferry) with the N. Y., L. E. & W. RR. at Newburgh, N. Y.

During the fiscal year 1883 the mileage of the company was reduced by the sale of 5.34 miles of the Woonsocket Branch to the Boston and Albany RR. Co., and the taking up of 1.39 miles of the Dedham Branch.

For historical statement showing the growth of this company's system, see MANUAL for 1884, page 69.

The Norwich and Worcester RR. is leased and operated as the Norwich and Worcester Division of this company's road, but all accounts are kept separately. Through the lease of this line the company also controls the Norwich and New York Transportation Company's line of steamers. The N. Y. & N. E. RR. Co. is also joint owner with the N. Y., N. H. & H. RR. Co. of the New England Transfer Co., which transfers passenger and freight cars from Jersey City to Harlem by steamers.

During 1882 the company made an arrangement with the New England Car Trust Association, under which there was purchased the following equipment: 50 locomotives, 18 coaches, 2 baggage, 4 express, 36 caboose, and 1,220 freight cars. The cost of this equipment was provided for by the Car Trust Association, the railroad company issuing thereto its notes to an amount equivalent to such cost, less the first instalment of 10 per cent., which under the agreement was paid in cash. These notes are held by the Car Trust as collateral to secure an equal amount of Car Trust certificates, which are a lien on the equipment furnished. These certificates bear 6 per cent. interest, which is guaranteed by the railroad company as rental, the principal being payable in semi-annual instalments of 5 per cent. each, payable April and October. The interest paid on April 1, 1884, was received in full of all demands on the receiver up to that date, and the instalment which should have been paid then was extended until October. On the 1st of October a like proposition was made to the Car Trust Co., that they allow a further extension of payment on account of principal and accept the interest in full of all demands against the receiver up to date. To this the Car Trust objected, and after several plans of compromise had been submitted and rejected, one was adopted, the gist of which is as follows: The New England Car Trust Association to be merged into the New York and New England RR. Co., the latter company to issue an equal amount of 2d mortgage bonds in place of the \$1,241,000 Car Trust certificates outstanding; to pay in cash the interest due on the certificates to February 1, 1885, in lieu of all claims on the receiver, and to settle any small bills outstanding belonging to the trust. The 2d mortgage bonds are due August 1, 1902, and bear interest from February 1, 1885, at the rate of 3 per cent. per annum for five years, 5 per cent. per annum for the following two years, and 6 per cent. per annum thereafter.

Funded Debt: 1st mortgage 7 per cent. bonds (interest January and July), due January 1, 1905, \$6,000,000; 1st mortgage 6 per cent. bonds (interest January and July), due January 1, 1905, \$4,000,000; 2d mortgage 6 per cent. 20-year bonds, due August 1, 1902 (interest February and August), \$2,833,000.

The debt to the State of Massachusetts is for three lots of land in Boston, 12, 25, and 50 acres respectively, is payable by annual instalments in ten years, and bears interest at 4 per cent. The debt to the B. & A. RR. Co. is for a lot of 60 acres, and bears 2 per cent. per annum for the first five years, and 4 per cent. per annum for the remaining five years. These lands were purchased to provide terminal facilities in Boston.

Annual meeting second Tuesday in December. Closing of books fixed by directors not less than 15 days prior to date of meeting. In Boston \$20,000,000 stock and \$10,000,000 1st mortgage bonds are listed on the Stock Exchange, and in New York \$20,000,000 stock and \$8,000,000 1st mortgage bonds.

On January 1, 1884, the road and property were placed in the hands of a receiver by the United States Circuit Court for the district of Connecticut on the application of certain bondholders. This action was taken in view of the company's inability to provide for its floating debt and coupons on its first and second mortgage bonds, then about to mature, as well as to protect the interests of all concerned. Since then the company has been empowered by the respective legislatures of Massachusetts, Rhode Island and Connecticut to issue \$5,000,000 preferred stock, to be paid for either wholly in cash or at the rate of \$50 in cash, and two shares of common stock for one share of preferred. On the 7th of October the directors were authorized to issue preferred stock and \$2,167,000 of unissued second mortgage bonds at their discretion.

(A.) This is the original Old Colony road.
 (B.) On March 25th, 1845, the Randolph and Bridgewater was chartered to build from Bridgewater to the Old Colony at Braintree. On March 26th, 1845, the Middleboro RR. was chartered to build from Bridgewater to the Fall River branch at Myricks. These two companies were consolidated August 9th, 1845, with the Fall River Branch Co., under the name of Fall River RR. Co., and the road opened to South Braintree December 21st, 1846. On June 30th, 1854, the Fall River and the original Old Colony were consolidated under the name of the Old Colony and Fall River RR. Co.
 (C.) The Fall River and Newport was chartered in May, 1860, to build from Fall River to Newport; consolidated with the Old Colony and Fall River, under the title of Old Colony and Newport, in July, 1863.
 (D.) Consolidated with Old Colony and Newport in December, 1865, and road completed from South Braintree to Somerset in September, 1866. At about the same time the Old Colony and Newport acquired a controlling interest in the East on Branch RR., 3.63 miles in length; of this 1.99 miles have since been used in connection with the D. & S. RR. as part of the Somerset-South Braintree line, and the remaining portion, 1.69 miles, is operated as a branch line under the name of Easton Branch.
 (E.) The Shawmut RR. Co. was chartered in 1870 to build from Neponset River to the Old Colony and Newport. In 1871 the Old Colony was authorized to build over the same route upon obtaining the consent of the aforementioned corporation, which was done.
 (F.) Built by Old Colony and Newport, on the site of the old Hope Branch, in 1871.
 (G.) The Cape Cod Branch and the Cape Cod Central were consolidated as the Cape Cod RR., May, 1868, and the road extended from Orleans to Wellfleet; opened January 1871. On October 1, 1872, the Cape Cod and the Old Colony and Newport were consolidated under the name of Old Colony, and under that name the road was extended from Wellfleet to Provincetown.
 (H.) Chartered in 1861 as Vineyard Sound RR. Co.; name changed in 1863 to Plymouth and Vineyard Sound RR. Co.; subsequently conveyed the franchises to the Cape Cod, by which the road was built.

(I.) Absorbed by the Old Colony in 1874 under authority granted by Massachusetts Legislature.
 (J.) South Shore chartered March 26, 1846; opened January 1, 1849; leased by Old Colony from October 1, 1847, to October 1, 1852, and on October 1, 1876, consolidated into that company.
 (K.) Chartered in 1867; opened through in 1874; consolidated with Old Colony October 1, 1878.
 The Agricultural Branch (L.) and the Fitchburg and Worcester (M.) were consolidated under the name of Boston, Clinton and Fitchburg, July 1, 1869. The Mansfield and Framingham (N.) was leased by the B. C. & F. from the date of its completion until June 1, 1875, when it was taken into the consolidation. The Framingham Prison (N.) and Lancaster Mills (N.) branches were built by the Boston, Clinton and Fitchburg.
 The New Bedford and Taunton (O.) was succeeded, April 1, 1873, by the New Bedford RR. Co., which purchased the property of the former. On February 1, 1874, the New Bedford RR. Co. and the Taunton Branch RR. Co. were consolidated under the name of the New Bedford RR. Co. The road was leased to the Boston, Clinton and Fitchburg RR. from that date until June 1, 1876, when the two companies were consolidated under the title of Boston, Clinton, Fitchburg and New Bedford RR. Co.
 The Boston, Clinton, Fitchburg and New Bedford was operated under contract by the Old Colony from February 1, 1879, to March 5, 1883, when it was absorbed by consolidation. For terms of consolidation, see MANUAL for 1884, page 73.

The Framingham and Lowell was leased from its completion, by the Boston, Clinton and Fitchburg, and afterwards by the Boston, Clinton, Fitchburg and New Bedford. On the absorption of the latter by the Old Colony the lease was transferred to the latter company. October 1, 1882, name changed to Lowell and Framingham RR. Co. On May 13, 1884, this company and the Lowell and Framingham RR. Co. entered into an arrangement by which the Old Colony issues 44 per cent. 20-year bonds in exchange for the bonds of the Lowell and Framingham RR. Co., when the exchange is completed the two companies to be consolidated under the name of the Old Colony RR. Co., the capital stock of the Lowell and Framingham to be exchanged for that of the consolidated company, at the rate of four shares of preferred stock or twenty shares of common stock of the former for one share of the latter.

HARTFORD AND CONNECTICUT WESTERN RAILROAD.

Line of Road.—Hartford, Ct., to Rhinecliff, N. Y.....108.30 miles.
Sidings, etc., 20.20 miles. Gauge, 4 ft. 8½ in. Rail (steel, 67.33 miles), 60 lbs.

Chartered June 25, 1868; opened December 21, 1871. On the 27th of April, 1880, the property was placed in the hands of the State Treasurer as trustee, by whom it was operated until August 1, 1881, when the present company was organized under authority of an act of the Connecticut Legislature, which provided for an exchange of bonds of the old company for stock in the new, on the basis of 60 per cent. of their par value. Of the total issue of these old bonds, amounting to \$3,200,000, there had been exchanged for stock at the close of the fiscal year, \$2,884,500. On the 1st of July, 1882, the company assumed possession of the Rhinebeck and Connecticut RR., of New York, extending from Rhinecliff, N. Y., to Boston Corners, 35.20 miles, which had previously been purchased by an issue of \$800,000 of new stock. Included in the line, as above, is a section of road extending from the New York and Connecticut boundary line to Boston Corners, N. Y., a distance of 6.89 miles, formerly leased from the Poughkeepsie, Hartford and Boston RR. Co., but purchased at foreclosure sale early in 1884, and now merged into this company's lines. It forms a connecting link between the two sections of road originally owned by this company.

Rolling Stock.—Locomotive engines, 18. Cars—passenger, 19; baggage and mail, 5; caboose, 2; freight (box, 110; stock, 4; milk, 2; hay, 20; platform, 326), 462—total, 486. Also, 1 tool, 2 pile-driver, 1 steam shovel and derrick, and 20 construction cars.

Sidings, etc., 23.48 miles. Gauge, 4 ft. 8½ in. Rail (steel, 82 miles), 57, 58, 60 lbs.

Chartered as New London, Willimantic and Springfield RR. Co., May, 1847. Name changed to New London, Willimantic and Palmer, May, 1848; road opened to Willimantic, September, 1849; to Palmer, September, 1850. Sold under foreclosure, and reorganized as the New London Northern in 1859. The Amherst and Belchertown RR. Co. was chartered in May, 1851, and opened from Palmer to Amherst, May, 1853. Sold under foreclosure October 14, 1858, and reorganized as the Amherst, Belchertown and Palmer, November 23, same year. Road purchased by the New London Northern RR. Co. in March, 1864, and extended to Miller's Falls in 1867. The Miller's Falls Branch of the Vermont and Massachusetts RR.; extending to Brattleboro', 21 miles, was bought by this company on the first day of May, 1880. The entire line is leased for twenty years from December 1, 1871, to the trustees of the Central Vermont RR. Co. The lessee assumes all responsibilities, and pays as rental \$150,000 a year in quarterly instalments, with an additional \$15,000 for every \$100,000 of gross earnings in excess of \$510,000. The operations given below cover the New London Northern RR. proper (100 miles), that portion of the line from Miller's Falls to Brattleboro', 21 miles, being operated under a separate lease by the Central Vermont RR. Co.

Consolidation, July 24, 1872, of the New York and New Haven and the Hartford and New Haven RR. Companies, the former chartered in Connecticut in May, 1844, and in New York in January, 1846, and its road opened in January, 1849. The Hartford and New Haven RR. Co. was chartered in Connecticut in May, 1833; the road was opened in 1839. The Massachusetts portion of the road was built under the charter of the Hartford and Springfield RR. Co., April 5, 1839, and completed in December, 1844. By an agreement dated March 17, 1848, the New York and New Haven RR. uses the New York and Harlem RR. from Williamsbridge into the City of New York. The rental is paid directly from earnings as they accrue, and does not appear in the operating accounts. The Shore Line RR. is leased in perpetuity at an annual rental of \$100,000, from November 1, 1870. The accounts of this road were kept separately previous to the year 1882. The Harlem River and Portchester RR. is leased for 99 years from October 1, 1873. On the 1st of October ber, 1883, the company leased the Boston and New York Air-Line RR. (*which see*), and purchased toward the close of that fiscal year a controlling interest in the Hartford and Connecticut Valley RR. It also owns a majority of the stock of the New Haven and Northampton RR. Co. The Stamford and New Canaan RR. is leased for one year from October 1, 1884, at an annual rental of \$4,000. Its stock is held as a part of the sinking fund of this company.

NOTE.—The operations of the Manhattan (elevated) Railway are not included in these totals. This necessitates omission from the following table of the net income, payments, etc., of that company, so that the income of the entire State shall correspond with the traffic returns. The earnings, etc., are, however, included in statements to be found in Introduction. * In Manual for 1884, operations, earnings, etc., of N. Y., Pa. & O. RR., were included with Erie RR.

ADIRONDACK RAILWAY.

Line of Road.—Saratoga, N. Y., to Ogdensburg, N. Y. (about). 180 miles.

Completed: Saratoga Springs to North Creek, N. Y. 60 miles.
Sidings, 2.75 miles. Gauge, 4 ft. 8½ in. Rail (steel, 0.59 mile), 56 to 60 lbs.

The Adirondack Railway Co., incorporated July 7, 1882, is successor to the Adirondack Company, which was chartered October 24, 1863, to build a line from Saratoga to Ogdensburg; road opened to its present terminus December 31, 1870. In 1874 the road was placed in the hands of a receiver, by whom it was operated until September 29, 1881, when it was sold under a decree of foreclosure and purchased by the trustees of the bondholders. In August, 1882, the trustees surrendered the road to the new company. In the reorganization the present company acquired, in addition to the road and franchises, about 500,000 acres of lumber land, in the Adirondack region, formerly the property of the old company.

2d track, 6.56; sidings, 21.50 miles. Gauge, 4 ft. 8½ in. Rail (steel, 67.79 miles), 60 lbs.

Organized in New York, February 16, 1877; road opened from Mechanicville to Massachusetts State Line, 39.03 miles, January 1, 1879. On April 19, 1880, the B., H. T. & W. Ry. Cos. of New York and Vermont were consolidated. On March 1, 1881, a consolidation was effected with certain other companies with a view to securing the rights for extensions to Buffalo and Oswego. On July 16, 1883, this latter consolidation was declared illegal. In obedience to the decree, the stock and bonds issued under the consolidation have been cancelled, and an equitable lien upon the properties of the constituent companies granted to the Continental Construction and Improvement Co. (See MANUAL for 1884, page 110).

The line is carried to North Adams, Mass., about 7 miles, over the Troy and Greenfield RR., and through the Hoosac Tunnel to Greenfield. For the use of the tunnel the company pays the State a proportionate amount (equalling about 50 per cent.) of its gross earnings over that portion of its line. In July, 1882, the company leased the Saratoga Lake and the Hoosac Tunnel and Saratoga Rys.

BROOKLYN ELEVATED RAILROAD. (In Progress.)

Line of Road.—East River Bridge, Brooklyn, to Woodhaven, N. Y. 9

Fulton Ferry Branch : East River Bridge to Fulton Ferry 1—10 miles.

Chartered as the Brooklyn Elevated Railway Co. May 22, 1875. This road, upon which considerable work had been done, was placed in the hands of two receivers, Richard G. Phelps and Alfred Wagstaff, October 13, 1880. These were shortly after removed, and possession surrendered January 6, 1881, to John R. Lydecker and Samuel M. Schafer, who procured an extension of the charter for two years to May 26, 1883, and made considerable progress towards the completion of the road. To provide the necessary means for this purpose, they were authorized by the courts to issue receivers' certificates for \$2,500,000. On February 25, 1881, at a meeting of holders of all classes of securities, a plan of reorganization, calling for an assessment of 20 per cent. on all their holdings, was agreed upon. In payment of this assessment it was proposed to issue \$4,000,000 stock, \$3,500,000 30-year 6 per cent. mortgage bonds, and a series of income bonds. At the time of this agreement \$1,069,000 1st mortgage bonds, \$217,700 scrip for 1st mortgage bonds, \$1,593,586 scrip stock, and \$1,852,800 engraved stock were outstanding.

On May 12, 1884, the property was sold under foreclosure, and purchased for \$100,000

by Frederick Uhlman, representing the bondholders. The purchasers also assumed payment of about \$460,000 receivers' certificates outstanding. The company was subsequently reorganized under its present name. Receivers formally discharged June 21, 1884. The capital stock of the new company is \$5,000,000, and a first mortgage to secure an issue of \$3,500,000 bonds has recently been executed. Trustee: Central Trust Co., New York. An additional issue of bonds secured by second mortgage will be made, but at date of this report terms and amount had not been definitely arranged. Under the plan of reorganization bonds of this issue will be used in retiring bonds issued under the old first mortgage.

In 1853 the Buffalo and Allegheny RR. Co. was chartered to build a line from Buffalo to Yorkshire, N. Y., 40 miles, and in 1865 the Buffalo and Washington RR. Co. was organized to extend that line from Yorkshire to the Pennsylvania line, a distance of 37 miles. These two companies were consolidated under the name of the latter in July, 1865. Shortly thereafter the Sinnemahoning and Portage RR. Co. was chartered in Pennsylvania to build an extension of the line in that State to Emporium, a distance of 43.55 miles, and in August, 1866, it was merged into the consolidated Buffalo and Washington RR. Co., the company then taking the name of the Buffalo and Washington Ry. Co. In April, 1871, this name was changed to the Buffalo, New York and Philadelphia Ry. Co. Under this name the line was completed in 1872, and opened for business in January, 1873.

The Buffalo and Oil Creek Cross-Cut and the Cross-Cut RR. Cos., both chartered July 19, 1865, and their roads were consolidated in August, 1867, under the name of the Buffalo, Corry and Pittsburgh RR. Co., their roads (both opened June 17, 1867) forming a continuous line between Brocton, N. Y., and Corry, Pa., 43.80 miles.

In April, 1879, the companies separated, the former taking the name of the Dunkirk, Chautauqua Lake and Pittsburgh RR. Co., and the latter that of the Corry and State Line RR. Co. Again consolidated May, 1879, under the name of the Buffalo, Chautauqua Lake and Pittsburgh Ry. Co. The Warren and Franklin Ry. Co. and the Farmers' RR. Co. were consolidated under the name of the former in January, 1868. In February, 1868, the Oil Creek RR. Co. was admitted, the consolidation then assuming the title of Oil Creek and Allegheny River Ry. Co. Its line (built in 1865-66 by the several companies) formed an extension of the road above named, from Corry to Oil City, Pa., and thence northeasterly to Rivinton, Pa., a total distance of 95.80 miles. In December, 1871, the Union and Titusville RR. (Tryonville to Union, Pa., 16.30 miles) was absorbed. On May 1, 1874, the company defaulted in payment of interest on its consolidated bonds, and the road was placed in the hands of a receiver. Sold under foreclosure December 29, 1875, and reorganized as the Pittsburgh, Titusville and Buffalo Ry. Co. in February, 1876. In February, 1880, this reorganized company and the Buffalo, Chautauqua Lake and Pittsburgh Ry. Co., mentioned above, were consolidated under the name of the former. The Pittsburgh, Titusville and Buffalo Ry. Co., the Buffalo, Pittsburgh and Western Ry. Co., organized September 29, 1880, to build from Portland to Buffalo, N. Y., 51 miles; the Salamanca, Bradford and Allegheny River RR. Co. of New York, organized December 11, 1880, to build from Salamanca, N. Y., to the Pennsylvania line, 16.40 miles; the Salamanca, Bradford and Allegheny River RR. Co. of Pennsylvania, organized December 8, 1880, to extend the latter line to Warren, Pa., 22.70 miles; and the Titusville and Oil City Ry. Co. (a reorganization December 20, 1878, of the Titusville and Petroleum Centre RR. Co., organized September 30, 1870), were consolidated in January, 1881, under the name of the Buffalo, Pittsburgh and Western RR. Co. Under the rights secured to the consolidated company by the charters of the Buffalo, Pittsburgh and Western Ry. Co., and the Salamanca, Bradford and Allegheny Cos., the line was extended in 1882 from Brocton to Buffalo, 48.80 miles, and from Warren to Salamanca, 39.10 miles.

The New Castle and Franklin RR. Co. was organized July 30, 1864; its road opened from Stoneboro to New Castle, Pa., a distance of 36 miles, in 1875. Default made in payment of bond interest and road placed in the hands of a receiver July 1, 1879. Sold under foreclosure April 13, 1881, and purchased for \$834,465.66 by the Buffalo, Pittsburgh and Western RR. Co., by which a new company was organized under the name of the New Castle

and Oil City RR. Co. The Oil City and Chicago RR. Co. was chartered March 10, 1882, to build a railroad from Oil City, Pa., to a point on the New Castle and Oil City RR., near Jackson Centre, Pa., a distance of about 40 miles. On April 20, 1882, the New Castle and Oil City RR. Co. and the Oil City and Chicago RR. Co. were consolidated under the name of the latter, and on the 20th of October, 1882, with the New Castle, Plain Grove and Butler RR. Co., chartered to build from Eastbrook to Burnet, on the Shenango and Allegheny RR., the consolidation still retaining the name of the Oil City and Chicago RR. Co.

On the 14th of February, 1883, the present consolidation was formed by the union of the above named Buffalo, New York and Philadelphia, Buffalo, Pittsburgh and Western and Oil City and Chicago Cos. with the Olean and Salamanca RR. Co., which latter was chartered early in the same year (1883), to build a line from Olean to Salamanca, N. Y., a distance of 20.60 miles, connecting the Buffalo, New York and Philadelphia and Buffalo, Pittsburgh and Western lines. This line was completed by the consolidated company toward the close of 1883.

The interest of the company in the leased lines is shown in the MANUAL for 1882, page 114—which see. See, also, statements of the several companies, appended hereto.

During the past fiscal year, with a view to joining its terminal facilities in Buffalo with those of other companies, and thereby securing increased accommodations, this company transferred to the Union Terminal RR. Co. of Buffalo, a corporation organized for that purpose, its property in Buffalo north and west of the New York, Lackawanna and Western RR. crossing, in consideration for which it received \$1,000,000 bonds of the Terminal Co., the latter also guaranteeing to the B., N. Y. & P. RR. Co. equal rights and franchises with any other company interested.

The consolidated mortgage of the B., N. Y. & P. Ry. is for \$11,000,000, \$4,000,000 of which are reserved to retire prior lien bonds. The outstanding bonds are a first mortgage on the Genesee Valley Canal RR., the Rochester, New York and Pennsylvania RR., and on 16,000 acres of coal lands of the Buffalo Coal Co., and are further secured by the stocks of leased lines held in trust to secure the payment of amounts of their purchase. The 1st mortgage trust loan is secured by a deposit of \$700,000 1st mortgage bonds of the Olean and Salamanca RR. Co., \$500,000 1st mortgage bonds of the Genesee Valley Terminal RR. Co., \$1,600,000 1st mortgage gold bonds of the Oil City and Chicago RR. Co., and \$300,000 bonds of the Northwestern Coal and Iron Co. The general mortgage of the B., P. & W. RR. is for \$7,500,000, of which \$3,439,000 are prior lien bonds. The Oil Creek bonds (originally 7 per cent.) became due in 1882, and were renewed as registered bonds at the reduced rate of 6 per cent.

Of the new general mortgage 6 per cent. bonds (\$24,500,000 authorized), \$21,300,000 are to be used in retiring previous issues, and the balance in providing additional rolling stock, and for other purposes. The company owns \$1,500,000 of the \$3,200,000 reported outstanding.

Annual meeting, second Monday in January. Books close for annual meeting about ten days prior thereto. Securities listed as follows: On Philadelphia Stock Exchange, common stock (275,000 shares), \$13,750,000; preferred (132,000 shares), \$6,600,000; W. & F. RR. 1st mortgage bonds, \$1,500,000; O. C. Ry. 1st mortgage, \$3,000,000; 2d mortgage, \$1,000,000; consolidated mortgage, \$7,000,000. On the New York Stock Exchange the entire issue of the B., N. Y. & P. Ry. consolidated mortgage bonds, \$11,000,000, and of the new 6 per cent. general mortgage, \$3,700,000 are listed. On the Exchange in Frankfort, Germany, the entire \$11,000,000 B., N. Y. & P. Ry. consolidated mortgage bonds and \$7,500,000 B., P. & W. RR. general mortgage bonds are listed. The amounts of same issues listed in Philadelphia represent the actual amounts outstanding.

A plan for the financial relief of the company is being carried out, which requires that three years' coupons, subsequent to those due August 1, 1884, on all but the first and second mortgage bonds of the Buffalo, New York and Philadelphia Ry. Co. and the 1st mortgage bonds of the Warren and Franklin RR. Co. shall be deposited in trust, the holders to receive 3 per cent. of their face in cash, and the balance in scrip convertible in sums of \$500, or multiples thereof, into 6 per cent. 20-year non-cumulative income bonds. The bonds specified above as being exempt from this funding plan, being liens on portions of the road on which full interest was earned, will receive the full amount due them. To help liquidate the floating debt the stockholders are asked to subscribe \$2.50 per share of their holdings, in consideration of which they will receive general mortgage bonds of the company at par.

Chartered April 19, 1851; opened from Albany to Scholharie, 35 miles, September 16, 1863; to Binghamton, January 14, 1869. Leased to the Delaware and Hudson Canal Co., February 24, 1870, for the term of its charter, viz., 150 years from April 19, 1851; annual rental, interest on bonds, 7 per cent. dividends on capital stock, and \$1,000 for organization expenses. Rental 1883–84, \$846,406.18. Payments: Interest, \$600,406.18; dividends, January and July, 3½ per cent. each, \$245,000; organization expenses, \$1,000. The interest and dividends are paid by the lessee directly to the stock and bond holders. A payment of \$5,000 semi-annually is also made by the lessee to the trustee of the sinking fund of the City of Albany, and is invested by the latter in certain funds for the ultimate payment of the Albany city bonds, issued to the lessor by the City of Albany. The amount of this sinking fund on September 30, 1884, was \$284,768.14. The Schenectady and Duaneburg RR. and the Cherry Valley, Sharon and Albany RR., nominally leased to this company, are owned by the Delaware and Hudson Canal Co. *Financial Statement*, September 30, 1884.—Capital stock, \$3,500,000; funded debt, \$9,189,000; due other companies, \$518,517—total, \$13,207,517. *Contra*: Cost of road and equipment, \$6,701,266.55; additions and betterments, \$6,207,517; sinking fund, \$284,768.14; cash and other assets, \$8,526.32; income account, \$5,438.99. The amount of capital stock authorized by charter was \$1,400,000. This was subsequently increased to \$4,000,000 by legislative enactment, and to \$5,000,000 by terms of lease to Delaware and Hudson Canal Co. On March 7, 1876, this amount was reduced to \$3,500,000 by an amendment to said lease.

The Utica, Ithaca and Elmira RR. Co., was a consolidation, October 25, 1871, of the Ithaca and Cortland (organized July 21, 1869), and the Utica, Horseheads and Elmira (organized April 2, 1870), RR. Companies. Its road, extending from Horseheads to Cortland, 65.8 miles, was opened throughout its entire length December 14, 1875. Default having been made in interest payments, the road was sold under foreclosure April 30, 1878, and a new company under the name of the U. I. & E. Ry. Co., organized May 11, 1878. Default was again made in 1883, and the road sold under foreclosure February 23, 1884, the purchasing bondholders organizing the present company March 7, 1884. The Cazenovia, Canastota and De Ruyter, an auxiliary line extending from Canastota to De Ruyter, 28.54 miles (see MANUAL for 1884, page 120) was purchased on March 8, 1884, and now forms an integral part of this company's road. The company also purchased the leases of the Canal and Ontario and Western branch, the rental of the latter being commuted for the entire period and paid in advance. Both are practically owned by the E. C. & N. RR. Co.

Consolidation, March 24, 1883, of the Lackawanna and Pittsburgh and the Allegany Central Railroad Companies. The former of these companies was chartered November 1, 1882, to build from Rockville, near Belfast, to Perkinsville, 42 miles, with a branch to Hornellsville, 14 miles. The Allegany Central Company was a consolidation, November 21, 1881, of three corporations—the Olean (Olean to Bolivar, 18 miles), the Friendship (Bolivar to Friendship, 11.3 miles), and the Allegany Central (Friendship to Swain's, 28.6 miles). The entire line between Olean and Swain's, 58.89 miles, was completed and opened in June, 1882. In 1883, the consolidated Lackawanna and Pittsburgh Co. made the section from Angelica to Swain's, 18 miles, standard gauge, and in the same year built, under the rights acquired from the old L. & P. RR. Co., extensions of the line from Angelica to Narrow Gauge Junction, and from Swain's to Pittsburgh Junction. The company had a traffic contract with

the Buffalo, New York and Philadelphia RR. for use of that company's track from Narrow Gauge Junction to New Castle, Pa., 207 miles.

In December, 1884, the company becoming embarrassed, its road was placed in the hands of a receiver.

LONG ISLAND RAILROAD.

Line of Road.—Long Island City, N. Y., to Greenport, N. Y..... 94.78 miles.
Branches and leased lines.....259.34 miles.

Total length of lines owned and leased, September 30, 1884.....354.12 miles.
Gauge, 4 ft. 8½ in. Weight of rail, 56 to 63½ lbs. per yard.

Chartered April 24, 1834; main line opened from Jamaica to Greenport, July 29, 1844. From Jamaica the Brooklyn and Jamaica RR. (built in 1836 and leased on its completion) continued the line to the South Ferry in Brooklyn. The Hicksville and Coldspring Branch RR. was leased in 1860, and subsequently merged into the L. I. RR. Co. In 1861, having completed its new branch line from Jamaica to Hunter's Point, the Brooklyn and Jamaica line was abandoned. In the succeeding years the company built branches from Mineola to Locust Valley, Mineola to Hempstead, Hicksville to Northport, and Manor to Sag Harbor. In 1872 the Newtown and Flushing RR. was leased. On the 1st of May, 1876, this company leased the Flushing, North Shore and Central RR. and the Southern RR. of Long Island, and on the reorganization of these companies secured new leases. In 1877, under agreement with the Atlantic Avenue (horse) Railroad Company, the Brooklyn and Jamaica line was rebuilt in the city of Brooklyn as far as Flatbush Avenue, and is leased to the Long Island RR. Co. In August, 1881, the Central Extension RR., a portion of the old consolidated Flushing, North Shore and Central RR., was purchased at foreclosure sale by the Long Island RR. Co., and in 1882 the North Shore RR., another portion of the same consolidation, was acquired in the interest of the L. I. RR. Co. The latter line has since been sold to the Long Island City and Flushing RR. Co. (*which see*). In 1882 ownership of the New York and Long Beach and the New York and Flushing Railroads was acquired through purchase of the capital stocks and bonds of the companies, and control of the New York and Manhattan Beach Ry. and its leased lines was acquired through lease of the former. In 1883 a new line was built in the interest of this company, under the charter of the Long Island City and Manhattan Beach RR. Co., connecting its main line with the New York and Manhattan Beach road. (*See MANUALS for 1883 and 1884*).

BROOKLYN AND JAMAICA RAILROAD.—Brooklyn (Flatbush Avenue) to Jamaica L. I., 9.678 miles. It is leased of the Atlantic Avenue (horse) RR. Co., which see. Rental in 1883-4, \$40,721.54.

BROOKLYN AND MONTAUK RAILROAD.—Bushwick, N. Y., to Eastport, N. Y., 67.08 miles; Far Rockaway Branch from Valley Stream to Neptune House, 9.41; Hunter's Point Branch from Junction, N. Y., and Flushing RR. to Fresh Pond, 1.52—total length, 78.01 miles. The Brooklyn and Montauk RR. Co. is a reorganization (1880) of the South Side RR. Co. of Long Island. (See MANUAL for 1884, page 142). The road was leased to the L. I. RR. Co. for 50 years from October 1, 1879, at 25 per cent. of the net earnings of the system of roads operated or leased by the L. I. RR. Co. On the 1st of March, 1881, the company created a new first mortgage to secure an issue of 6 per cent. 50-year bonds (interest March and September) to the amount of \$1,000,000, interest on which is guaranteed by the Long Island RR. Co. Of these bonds there had been issued at the date of this report but

\$250,000 for the construction of Montauk Extension. The Long Island RR. guarantees the payment of principal of this amount. The remaining \$750,000 of this issue are reserved to retire the old 1st mortgage bonds when they become due. Interest paid by the Corbin Banking Co., 115 Broadway, N. Y. City. Capital stock, \$2,000,000; funded debt, \$1,000,000; real estate mortgages, \$43,500—total, representing cost of road, etc., to present company, \$3,043,500. Funded debt, 1st mortgage (on main line South Side RR.) 7 per cent. 20-year bonds, due 1887, \$750,000; 1st mortgage (on extension Patchogue to Eastport, and also on main line Brooklyn and Montauk RR., subject to prior liens) 6 per cent. 30-year bonds, due 1900, \$250,000. No rental has been paid by lessee. AUSTIN CORBIN, *President*; Henry Graves, *Treasurer*; Daniel Lord, *Secretary*, New York City.

GLENDALE AND EAST RIVER RAILROAD.—Greenpoint, N. Y., to Flushing Avenue, Brooklyn, 2.70 miles; total track (steel), 5.40 miles. This road was constructed and is leased by the N. Y. & M. B. Ry. Co.; rental of \$1.00 per annum. Capital stock paid in, \$7,460; unfunded debt, \$176,636.39—total, \$184,086.39. *Contra*: Construction, \$176,636.39; discount, \$7,460. AUSTIN CORBIN, *President*; G. S. Moulton, *Secretary and Treasurer*, 115 Broadway, New York City.

This company was formed under articles filed November 24, 1875. It built no road of its own, but on the 20th of May, 1879, leased the Metropolitan and New York Elevated Railroads for 999 years from February 1, 1879, agreeing to pay interest on the \$10,818,000 6 per cent. bonds of the former company, and on \$8,500,000 7 per cent. bonds of the latter; and annual dividend at the rate of 10 per cent. on the capital of the two companies, \$13,000,000—\$6,500,000 each. The Manhattan failing to comply with the provisions of its leases, its affairs, on the 14th of July, 1881, were put into the hands of two receivers. On the 22d of October and 14th of November, 1881, the several companies entered into agreements modifying the terms of the leases of 1879. The New York and Metropolitan Companies agreed to exchange their respective stocks for corresponding amounts of the 6 per cent. preferred stock of the Manhattan company—the New York company to receive first preferred cumulative, and the Metropolitan second preferred—the dividend on both to be at the rate of 6 per cent. per annum, payable quarterly. That modification of the lease, not having been ratified by the stockholders of the Metropolitan Elevated Ry. Co., was declared by the courts to be illegal, and a new agreement was made, and ratified by the stockholders on August 1, 1884. By the terms of this agreement the Manhattan Ry. Co. issues consolidated stock to the amount of \$26,000,000, to be exchanged for outstanding stocks on the following basis: For \$6,500,000 New York Elevated RR. Co. stock, \$7,800,000 consolidated stock to be issued; \$7,150,000 consolidated stock to be issued to holders of \$6,500,000 Metropolitan Elevated Ry. Co. stock; and the balance, \$11,050,000, to the holders of \$13,000,000 Manhattan Ry. Co. (old) stock. On the 1st of March, 1885, there had been issued under the terms of this agreement, \$23,618,000 Manhattan consolidated stock.

In addition to the foregoing, the company operates the Dunkirk, Alleghany Valley and Pittsburgh RR. under lease from December 1, 1872. Separate reports are made of the operations of that road.

The New York Central and Hudson River Railroad Company was organized by the consolidation, November 1, 1869, of the New York Central and the Hudson River Railroad Companies.

The New York Central RR. Co. was organized under a special law passed April 2, 1853, authorizing the consolidation of the railroads between Albany and Buffalo, viz.: the Albany and Schenectady, the Schenectady and Troy, the Utica and Schenectady, the Syracuse and Utica, the Syracuse and Utica Direct, the Rochester and Syracuse, the Buffalo and Lockport, the Mohawk Valley, the Rochester, Lockport and Niagara Falls, and the Buffalo and Rochester. Articles of agreement taking effect as of May 1st, 1853, were filed May 17, 1853; the first Board of Directors elected July 6, and the whole line delivered to the new company August 1, 1853.

The Albany and Schenectady RR., chartered in 1826 as the Mohawk and Hudson, was opened September 12, 1831, and was the first railroad built in the State of New York. The name was changed to A. & S. in 1847. The Schenectady and Troy was chartered in 1836, and opened in 1842. The Utica and Schenectady, chartered in 1833, was opened August 1, 1836. The Syracuse and Utica, chartered in March, 1836, was opened July 3, 1839. The Syracuse and Utica Direct was organized under the general law, and filed articles January 26, 1853. Merged in the N. Y. C. RR. Co. under the act of 1853. The Rochester and Syracuse was a consolidation (August 1, 1850) of the Auburn and Rochester and the Auburn and Syracuse. The Auburn and Rochester, chartered in 1836, was opened in August, 1841, and the Auburn and Syracuse, chartered in 1834, was opened in June, 1838. The Direct Line was opened in 1853. The Buffalo and Lockport filed articles April 27, 1852, and was in progress at the date of consolidation. The road was opened in 1854. The Mohawk Valley filed articles January 21, 1851, and December 28, 1852. The company was merged in the New York Central RR. Co. under the act of 1853. The Rochester, Lockport and Niagara Falls was the originally the Lockport and Niagara Falls, chartered in 1834, and opened in 1838. In December, 1850, the R., L. & N. Falls RR. Co. was organized, and rebuilt the road. The Buffalo and Rochester was a consolidation (December 7, 1850) of the Attica and Buffalo, and the Tonawanda. In 1852 this company opened a direct road from Buffalo to Batavia, keeping that part of the Attica and Buffalo line between Attica and Batavia as a branch. The A. & B. was chartered in 1836, and opened in 1842; and the Tonawanda, chartered in 1832, was opened in 1842.

The following roads were leased and subsequently merged in the consolidation: The Rochester and Lake Ontario in 1855, for \$150,000; the Buffalo and Niagara Falls in 1855, for \$658,921.56, the Lewiston in 1855, for \$400,000; and the Saratoga and Hudson River (Athens

Branch) in 1867, for \$2,000,000. The stock of the consolidated company was issued at par in exchange for the stocks of the lessor companies respectively. The last named road was leased on the 2d of November, 1831, to the New York, West Shore and Buffalo RR. Co. for 475 years, the rental for the entire period having been commuted for \$400,000.

The Niagara Bridge and Canandaigua RR., originally the Canandaigua and Niagara Falls, filed articles March 1, 1851, was opened April 1, 1854, and leased to the N. Y. Central, September 1, 1858, at 6 per cent. on \$1,000,000 capital stock.

The Hudson River RR. Co. was chartered May 12, 1846, and road opened through its entire length from New York to East Albany, October 3, 1851. Prior to its consolidation in the New York Central and Hudson River RR. Co. it had taken a lease of the Troy and Greenbush RR., chartered January, 1845, opened in June of same year, and leased to the Hudson River RR. Co., June 1, 1851, for 7 per cent. on \$295,000 capital stock. The lease, which runs during the time of the charter or any extension thereof, was assumed by the consolidated company.

The New York Central and Hudson River RR. Co. has added the following lines :

The New York and Harlem, chartered April 25, 1831; leased for 400 years from April 1, 1873, the rental being 8 per cent. on stock and interest on bonds. This lease covers the N. Y. and Mahopac; lease dated June 17, 1872; expires Dec. 31, 1971. Rental nominal.

The Spuyten Duyvil and Port Morris RR., chartered April 24, 1867; lease dated November 1, 1871; expires December 31, 1970; rental, 8 per cent. on cost, \$959,000.

The Dunkirk, Alleghany Valley and Pittsburgh RR.; lease dated January 3, 1874; expires January 3, 2273. Rental, 7 per cent. on \$2,900,000 bonds, and 3 per cent. on \$1,300,000 stock.

The Syracuse Junction RR. was built by the N. Y. C. & H. R. RR. Co. to take the two freight tracks of its 4th track system around the city of Syracuse; leased, April 10, 1875, and subsequently absorbed under authority of law.

The Junction (Buffalo) RR. was built by the N. Y. C. & H. R. RR. Co. to connect its main lines between North Buffalo and East Buffalo; leased April 10, 1875, and absorbed the same as the Syracuse Junction RR.

The Geneva and Lyons RR. was built by the N. Y. C. & H. R. RR. Co. to connect Geneva, on the Auburn Branch, with Lyons, on the main line, a distance of 14 miles. It will in time be leased and absorbed by the N. Y. C. & H. R. RR. Co.

The two Hudson River bridges, crossing the Hudson River between East Albany and Albany, are practically owned— $\frac{3}{4}$ by the N. Y. C. & H. R. RR. Co., and $\frac{1}{4}$ by the Boston and Albany RR. Co., each company paying proportionately for expenses of maintenance and operating.

The Troy Union RR. is owned— $\frac{1}{2}$ by the N. Y. Central, $\frac{1}{4}$ by the Troy and Boston and $\frac{1}{4}$ by the Rensselaer and Saratoga. Each company pays its proportion of maintenance and operating.

RR. 386.21—total 1,938.19 miles), 56 to 65 lbs.

The New York and Erie RR. Co. was chartered April 24, 1832, to build a line of railroad from Piermont to Dunkirk, N. Y., a distance of 446 miles. Construction was commenced in 1836 on sections of 10 miles nearest Piermont, and of 41 miles from Delaware to Callicoon Creek. In the same year the credit of the State was granted to the company to the extent of \$3,000,000. In September, 1841, the first section from Piermont (the eastern terminus provided by the first charter) to Goshen was opened. The company becoming embarrassed, the undertaking was placed in the hands of assignees, under whose management the road was opened to Middletown, January 3, 1843. The cost to February 1, 1844, was \$1,736,949, of which \$2,599,514 were derived from the State loan. In 1845 the State released the property of its mortgage, provided the company should complete the road to Lake Erie in six years, and the old stockholders surrendered one-half of their stock. The amount necessary to complete the road was estimated at \$7,000,000. Construction was resumed and the road opened to Port Jervis, January 6, 1848; to Binghamton, December 28, 1848; to Elmira, October 10, 1849; to Hornellsville, September 3, 1850; and to Dunkirk, April 22, 1851. The Newburgh Branch was opened in 1850. The gauge of the road when opened was six feet.

The lines between Jersey City (Long Dock) and Suffern, viz., the Paterson and Hudson, Paterson and Ramapo, Union and Long Dock are leased in perpetuity, and form a part of the main line. The Erie International Railway connects the Buffalo Branch with the International Bridge crossing the Niagara River.

In 1859 the road and property of the New York and Erie RR. Co. were placed in the hands of a receiver for non-payment of interest on its funded debt. A reorganization was had under the name of the Erie Railway Co., the articles of association being filed June 25, 1861. The principal change then made in its financial condition was the conversion of unsecured bonds, amounting, with interest, to \$8,535,700, into preferred stock.

In May, 1875, the road and property of the company were again placed in the hands of a receiver for non-payment of interest on its bonds.

On the 24th of April, 1878, the road, property and franchise were sold under foreclosure, and a reorganization completed under the name of the New York, Lake Erie and Western RR. Co., by the filing of articles of association on the 27th of same month. By the terms of reorganization an assessment was laid on the common stock to the amount of \$4 and \$6 per share—holders paying \$4 to receive back their stock; those paying \$6 to receive back their stock and income bonds equalling the amount of the assessments paid. The assessments on the preferred shares were \$2 and \$3 respectively—those paying \$2 to receive back their stock; those paying \$3 to receive back their stock and income bonds equalling the amount of the assessments. The total amount of income bonds so issued was \$508,008.75. The amount of interest funded by the terms of reorganization to September 30, 1884, was \$12,303,377.10. The new (present) company took possession of its road June 1, 1878. The assessments on the stock were carried to a special fund for the improvement of the road. The length of roads owned and operated at that time was the same as at present. The length of leased lines, excluding Barclay RR., was 381.31 miles—making total length of road and branches 956.73

miles. Since then the company has increased its mileage to its present total by the acquirement under lease of the Bergen County, Middletown and Crawford, N. Y., L. E. & W. Coal and RR. Co.'s line, Buffalo and Southwestern, and New York, Pennsylvania and Ohio RR. For particulars of leased lines see tabulated statement following, and statements appended.

The laying of the third rail, giving the standard gauge, from Jersey City to Buffalo, was completed December 24, 1878.

The Erie Ry. Co. many years since became owner, in fee, of coal lands in Jefferson, Elk and McKean Counties, Pennsylvania; also, owner of mineral rights of about an equal number of acres. All these lands (about 36,000 acres) were heavily timbered. To secure the advantages which this ownership afforded as a means of obtaining a bountiful supply of fuel as well as of increasing its traffic, the company constructed in 1882 under the charter of the N. Y., L. E. & W. RR. & Coal Co. (*which see*) an extension of the Bradford Branch from Crawford Junction to its coal fields. Under the provisions of a contract with the Pennsylvania RR. Co. the latter constructed in 1883, as an outlet for the latter line, an extension of its Philadelphia and Erie Division, under the charter of the Ridgeway and Clearfield RR. Co., from Ridgeway to Brockwayville 19.59 miles and will complete it to a connection with the Allegheny Valley RR. (low grade) at Falls Creek: (See MANUAL for 1883, page 173; MANUAL for 1884, page 164, and General Index. At about the time of the purchase of the bituminous

coal lands referred to above, the Erie Ry. Co. also become largely interested in the anthracite coal fields of the Wyoming Valley, in the neighborhood of which there are extensive mines which produce annually large quantities of coal. To secure the large volume of traffic offered by these mines and properties, the company was largely dependent on connecting roads—the Jefferson RR. and the Delaware and Hudson Canal and Pennsylvania Coal Companies' lines. In 1882 a contract was made with the latter company for the use of their lands and planes over the mountains, and on the 6th of November, same year, the Erie and Wyoming Valley RR. was organized. Under this charter the line has been completed during the past year (see MANUAL for 1883, page 173 and MANUAL for 1884, General Index).

The Rochester and Pittsburgh RR. Co. uses part of this company's track under contract. (See statement of R. & P. RR. Co., also MANUAL for 1883, pages 173, 174 and 175, for terms of this contract; also MANUAL for 1883, pages 173, 174 and 175, for particulars of relations borne by this company to the Blossburg Coal Co., controlling the Tioga RR. and its leased lines; to the Chicago and Atlantic RR. Co., and to the Cincinnati, Hamilton and Dayton RR. Co.).

In reference to the Cincinnati, Hamilton and Dayton RR. and the Chicago and Atlantic Ry., the last report of this company says:

The Cincinnati, Hamilton and Dayton RR. has been self-sustaining from the date of such arrangement. The Chicago and Atlantic Ry. having been completed to the point necessary for the through business, about May 1, 1883, was opened for that purpose, and has been of incalculable advantage to this company and its leased line, the New York, Pennsylvania and Ohio RR., since that time. Without these connections the Erie Company would be absolutely dependent upon other and competing lines to and from the Northwest, West and Southwest. If it had been in such a state of dependency during the period of the present contest for traffic, it is very manifest that its through business would have been reduced to an extent much greater than it has been. When, however, the Chicago and Atlantic Ry. was opened as a through line, it was not prepared to do the local business, for which it is well located, because of the want of the necessary local facilities. Hence, for its support it had to rely almost exclusively upon the through traffic, and this class of business has been so disorganized as to make it wholly unprofitable. Under such circumstances, to maintain the road and get it in such condition that the Erie Company could realize the full benefit of the connection, it became necessary to advance to that company much larger amounts of money than was anticipated. For the purpose of providing the necessary means to put its road in proper condition both for through and local business, and to repay to the Erie Company the advances it had made, the Chicago and Atlantic Company was induced to put upon its property a second mortgage, securing bonds to the amount of \$5,000,000. Before the bonds were prepared for the market, and during the pendency of negotiations for their disposal, the firm of Grant & Ward made application for the purchase of the entire issue, offering 90 per cent. therefor, which was 15 per cent. above that suggested by any others. That firm was then in good standing. One condition of the negotiations with them was that the bonds should be listed upon the Stock Exchange, for which purpose application was made; but after considerable discussion the application was rejected because of a defect in the engraving of the bonds. This involved a re-engraving of the bonds and a delay of some weeks. In the meantime the business of the country and the relations between the railroad companies became more depressed and the competition between the roads more active and with reduced rates of transportation. To recon- p the Erie Company's treasury for its advances to the Chicago and Atlantic a change was made in the arrangement from an absolute sale to a temporary loan and a conditional sale, and to a reduction of the amount of the bonds to be placed in the hands of the firm named to \$2,500,000. Upon this amount they agreed to advance \$1,500,000 upon notes to run for four months which were to be returned cancelled at the end of that time, and to carry the loan for the full period of one year, during which time they represented their ability to dispose of the bonds at the price agreed upon, retaining from the proceeds thereof the \$1,500,000 so advanced, and accounting to the Chicago and Atlantic Company (or to the Erie Company, as the state of the account between the two companies might justify), for the balance of the proceeds. Upon their suspension it was discovered that among their other transactions, they had used the bonds, as well as the notes given to them, to raise money for their own purposes. The Erie Company could lose nothing by the transaction, even if it were obliged to redeem its notes at their face value, because it had already received into its treasury the entire proceeds thereof, amounting to \$1,500,000, and had credited that amount upon the advances to the Chicago and Atlantic Company. If, therefore, the necessity arose for it to redeem its notes, the effect would be simply to reinstate the relations to the Chicago and Atlantic which existed previous to the negotiation. The only damage which could result to it would be the effect which the failure might have upon its credit. The loss in the transaction of necessity fell upon the Chicago and Atlantic Company.

Preferred stock is entitled to 6 per cent. dividends if earned. Dividends (3½ per cent. each), on the preferred stock were paid for the years ending June 30, 1872 and 1873, and for the half year ending December 30, 1873. A dividend of 1¼ p. c. on the common stock was paid for the year ending December 31, 1872, and 1 per cent. for the half year ended June 30, 1873. Dividends of 6 per cent. each were paid on the preferred stock during the past three fiscal years, 1882 to 1884.

The assessments paid upon the stock to September 30, 1884, have been as follows: Preferred stock—\$3 per share, on 23,372¼ shares, \$70,116.75; \$2 per share, on 58,245 shares, \$116,490. Common stock—\$6 on 72,982 shares, \$437,892.00; \$4 per share on 697,806 shares, \$2,791,224. Total number of shares paying assessments were 81,567¼ of preferred, and 770,838 of common. The total amount realized was \$3,415,722.75, and adding interest, \$3,792,459.47. Of this sum \$3,205,958.68 were applied to the improvement of the road, and \$586,357.93 to the charges of reorganization and expenses in London, leaving unapplied \$442.86. Holders of 9,162 shares of common and 3,802 of preferred failed to pay assessments on same. Of the common stock thus delinquent 5,000 shares were sold in 1880-81, and the proceeds of sale placed to credit of company.

* In 1883 all the traffic operations of the N. Y., P. and O. RR. were included in those of the Erie, while only 68 per cent. of the earnings and expenses of that line were included. In the present year, although the returns are given separately, the same form is preserved in this table for the purpose of comparison. In 1883 the actual percentage of all working expenses to all earnings was 64.73, and 69.52 in 1884.

† From the surplus at the close of each of the past three fiscal years were paid—in 1881-82, interest on income bonds at 6 per cent., \$30,480.52; dividend on preferred stock at 6 per cent., \$464,340; in 1882-83, income bond interest, \$30,480.44; preferred stock dividends (6 p. c.), \$485,028; sinking fund reorganization first lien bonds, \$100,000; in 1883-84, income bond interest, \$30,480.48; preferred stock dividends (6 p. c.), \$488,208.

The amount of stock in above table for years 1878-82 represents only that exchanged to close of fiscal year. The total amount of capital stock issued to September 30, 1884, is as given, \$85,332,900; amount of assented stock unissued, \$407,600; amount on hand, subject to sale (common, 4,162, and preferred, 3,802—total, 7,964 shares), \$796,400. Total amount authorized, \$86,536,900.

In June, 1884, the New York, Lake Erie and Western RR. Co. made default in payment of interest then due on its second consolidated mortgage bonds; in November, 1884, in the payment of guaranteed first mortgage interest of the Chicago and Atlantic Ry. Co.; and the Buffalo and Southwestern (the latter since paid); and, also, in the interest due on the bonds issued under Car Trust, Series F. & G. (since adjusted).

Annual meeting, last Tuesday in November. Books close for annual meeting 30 days prior thereto; for dividends, 30 days prior to payment of same. Stock listed on Stock Exchanges in New York and London. Bonds listed in New York Exchange, \$70,267,136.90, being all issues except collateral trust bonds. Bonds listed in London: 1st consol. mtge.; 1st consol. mtge. funded coupon; 2d consol. mtge. and income bonds.

Co., which was organized August 19, 1865, by the consolidation of various companies in New York, Pennsylvania, and Ohio. The road was opened for through traffic in 1865. The property went into the hands of receivers April 1, 1867; was transferred by lease to the Erie Ry. Co. December 8, 1868; again placed in receivers' hands April 9, 1869; re-leased to the Erie Ry. Co. January 1, 1870; sold July 1, 1871; and again leased to the Erie Ry. Co. May 1, 1874. The last lease had been in operation only a few months when the road was again placed under a receivership, December 9, 1874. The entire property was sold under foreclosure of the consolidated mortgage of the A. & G. W. RR. Co. January 6, 1880, and bought by reorganization trustees, by whom it was conveyed to the incorporators of the New York, Pennsylvania and Ohio RR. Co. March 15, 1880. Under the terms of sale and reorganization, provision was made for the issue of \$8,000,000 prior lien bonds, \$35,000,000 1st mortgage, \$14,500,000

2d mortgage, and \$30,000,000 3d mortgage bonds; 200,000 shares (\$50 each) of preferred stock and 700,000 shares (\$50 each) of common stock. It was also provided that the capital stock should be held in trust, to be voted upon by five voting trustees, three to be named by the 1st mortgage bondholders; one by the 2d, and the other by the leased lines' bondholders of 1872. The road was operated by the receiver of the A. & G. W. Ry. from date of sale to the organization of the new company, March 24, 1880. The gauge on the entire road, originally 6 feet, was changed to 4 ft. 8½ inches June 22, 1880. On the 1st of May, 1883, the road was leased to the New York, Lake Erie and Western RR. Co., the rental being 32 per cent. of gross earnings up to \$6,000,000, and 50 per cent. of all in excess of that amount until the gross earnings amount to \$7,200,000, when the rental is to be 35 per cent. of gross earnings. For operations see pages 161, 162 and 163.

Income Account year ending September 30, 1884.—Receipts: Rental, 32 per cent. of gross earnings, \$1,891,039.36; business prior to May 1, 1883, \$90,263.51; other receipts—dividends, interest, etc., \$23,137.37—total, \$1,994,440.20. Funded Debt.—1. Prior lien 6 per cent. bonds, dated May 5, 1880, interest payable May and November, principal due March 1, 1895, secured by 1st mortgage on all property and franchises of the company, \$8,000,000.

2. 1st mortgage 7 per cent. bonds, dated May 6, 1880, interest payable January and July, principal due July 1, 1905, interest payable only out of net earnings, and, in case of deficiency, deferred interest warrants to be issued for the amount of deficiency, such warrants to be capitalized in bonds, in sums of \$1,000 each, but not to bear interest until so capitalized, \$41,457,000.

3. 2d mortgage 5 per cent. 30-year bonds, due May 1, 1910, interest payable semi-annually if earned, after payment of prior charges, \$14,500,000.

4. 3d mortgage 5 per cent. 35-year bonds, due May 1, 1915, interest payable semi-annually if earned, after payment of prior charges, \$30,000,000.

In the process of reorganization, a new lease was made of the Cleveland and Mahoning Valley Ry., by which that road, with the Liberty and Vienna and Niles and New Lisbon Rys., were leased for 82 years and 3 months from July 1, 1880, at an annual rental of \$357,180 until January 1, 1885, and \$412,180 per annum, thereafter—payable in monthly instalments in advance.

The substantial control of the company is vested in the bondholders, the stock being held in trust by the reorganization trustees.

The voting trustees of the N. Y., Pa. & O. RR. Co. are George Balfour, John L. Bates, Henry C. Raikes, elected by 1st mortgage bondholders, and Charles E. Lewis, by 2d and 3d mortgage bondholders.

Annual meeting, third Wednesday in October. Prior lien bonds listed on Stock Exchange in New York; 1st, 2d and 3d mortgages listed in London.

 { *Ellenville*: Summitville to Ellenville. 8.00— 67.23 miles.
Leased: N. Y., W. S. & B. Ry.: Middletown to Weehawken. 77.50 miles.

Total length of lines owned and operated. 394.32 miles.

2d track (leased), 52.90; sidings, etc., 89.74 miles. Gauge, 4 ft. 8½ in. Rail (steel, main line, 119.6; leased line, 131.28 miles), 50 to 67 lbs.

Organized as New York and Oswego Midland, January 11, 1866. Main line opened in July, 1871; Western Division in August, 1873.

The company having made default in 1873, its property was placed in the hands of receivers on the 18th of September of that year. The Western Division was sold on behalf of the bondholders, under foreclosure, May 31, 1876, and reorganized September 30, 1876, under the title of Ithaca, Auburn and Western. The main line was sold November 9, 1879, in the interest of the stockholders and creditors of the old company, who were allowed to participate in the new upon the following terms: The holders of the 1st mortgage bonds were allowed to convert their bonds with accrued interest into the common stock of the new; the second mortgage bondholders, and other creditors, to convert their bonds, or other indebtedness of the company, into the common stock of the new company, on the payment to it of a sum equalling 20 per cent. of the stock they might be entitled to receive; the holders of the stock of the old company were entitled to convert their shares into those of the new on a payment equalling \$30 per share. In addition, \$2,000,000 of preferred 6 per cent. stock (non-cumulative) was issued to discharge receiver's certificates of indebtedness. The assessments produced \$9,429,429.98.

The company upon the completion of its road from Middletown to Oswego contemplated the use of the New Jersey Midland and Montclair railroads as the extension of its own line to the Hudson. The use of these lines has been abandoned, and in their place a railroad (of 77½ miles) was constructed during the year 1882 from Middletown to the Hudson River at Cornwall, and thence to Weehawken, opposite the city of New York. This section, by previous consolidations, became a part of the New York, West Shore and Buffalo Railway. It was constructed by the New York, Ontario and Western RR. Co., for which the latter company received \$10,000,000 in the 1st mortgage 5 per cent. bonds of the West Shore Co., and \$2,367,000 of its stock. Of the bonds thus received, \$9,759,000 were issued during 1883 to stockholders in this company, at 50 per cent. of their face value. The section is operated, under lease, by this company, subject to the West Shore Co.'s right of trackage over it, from Weehawken to Cornwall.

During the past year a modification of the contract with the New York, West Shore and Buffalo Ry. Co. was secured, under which the guarantee of \$500,000 per annum as a minimum rental has been cancelled, the only obligation being the payment of 25 per cent. on earnings of West Shore trains passing over the leased section and on all strictly local earnings; the company is to retain the whole of the earnings from its own through traffic coming from points north of Middletown, until the gross earnings from all sources on the leased property shall exceed \$2,000,000 per annum, for two successive years. The allowance of 60 cents per train mile to the West Shore Company for train service has been reduced to 36.9 cents per mile for passenger trains of five cars and to 50.7 cents for freight trains of 30 cars, 2.45 cents for each additional passenger car, and six mills for each additional freight car. It was at the same time agreed that the Ontario and Western Co. should have the option to renew the modified lease for another term of 99 years. On final settlement of construction accounts there was due this company from the West Shore Co. June 1, 1884, \$704,424.33, which is to be applied to payment of the 25 per cent. rental account.

Since the close of the fiscal year the company has made an issue of \$4,000,000 six per cent. gold bonds secured by a mortgage (Mercantile Trust Co. of New York, trustee) on its road and other property, its interest in the West Shore lease, and its joint interest in the terminal property. Of these bonds \$2,000,000 have been lodged with the Farmers' Loan and Trust Co. for the purpose of retiring the preferred stock, or cancelling the preference, and of the remainder it is proposed that \$200,000 shall be sold at par and \$1,800,000 be deposited with \$1,025,000 of the preferred stock in trust to secure an issue of \$2,000,000 collateral trust 4½ per cent. bonds. The latter bonds will be issued pro rata at 90 per cent. of their par value to foreign holders of \$25,000,000 of the common stock, and the proceeds applied to the payment of floating debt and for improvements. The six per cent. gold bonds will mature September 1st, 1924, but are redeemable on notice at 110 and interest; interest payable March and September.

Of the De Ruyter branch the section from Cortland to De Ruyter, 20.22 miles, was leased during the year to the Elmira, Cortland and Northern R.R. Co. for 99 years, and the rental commuted at \$100,000. Track has been taken up on remainder of that branch.

Rolling Stock.—Locomotive engines, 73. Cars—passenger, 1st class, 47; 2d class combination, 12; baggage, mail and express, 20; freight (box, 455; platform, 660; stock, 62; coal, 638; milk, 17), 1,832—total, 1,911. Also, 22 caboose, 3 derrick, and 3 tool cars.

Operations for year ending September 30, 1884.—Trains run—N. Y., O. & W. Ry. proper (passenger, 591,273; freight, 524,402; mixed, 257,951), 1,373,626 miles; West Shore trains, Weehawken to Cornwall (passenger, 225,493; freight, 78,447), 303,940 miles; shifting and work trains, 234,224 miles. Total train mileage, 1,911,790 miles. Passengers carried, 944,093; one mile, 32,485,364. Average rate per mile, 1.96 cents. Freight moved, 1,004,248; moved one mile, 68,964,956 tons. Average per mile, 1.55 cents.

Total length of railroad.....498.35 miles.
 2d track, 348; sidings, 142 miles. Gauge, 4 ft. 8½ in. Rail (steel, 809.98 miles), 67 lbs.

Of the main line, 52.88 miles, from Weehawken, N. J., to Cornwall Junction, N. Y., and the Middletown Branch from Cornwall Junction to Middletown, N. Y., 24.6 miles, are leased to the New York, Ontario and Western Ry. Co., subject to this company's right of trackage over the line from Weehawken, N. J., to Cornwall Junction, N. Y. Rental, 25 per cent. of gross earnings and all expenses of maintenance.

This company was formed on the 14th of June, 1881, by the consolidation and merger of the North River RR. Co., and the New York, West Shore and Buffalo Ry. Co. The former of these was itself a consolidation (May 5, 1881) of the Jersey City and Albany Ry. Co. (organized in January, 1879), owning a line from Weehawken, N. J., to Fort Montgomery, N. Y., 38 miles, and the North River Ry. Co., which had been organized in 1880 in the interest of the New York, Ontario and Western Ry. Co. to build a line from Fort Montgomery to Albany with a branch to Middletown, a total of about 165 miles. The latter (N. Y., W. S. & B. Ry.) company had been organized February 18, 1880, and proposed building a trunk line between New York and Buffalo. By agreement with the New York, Ontario and Western Ry. Co., the section of this line from Weehawken to Middletown, 77.5 miles, was built by the Ontario and Western Co., for which said company received \$10,000,000 of the 1st mortgage 5 per cent. bonds, and \$2,367,000 of the stock of the New York, West Shore and Buffalo Ry. Co. The sections from Cornwall to Albany and Buffalo were built by the North River Construction Co., as contractor. On October 1, 1883, the road was opened from Weehawken to Syracuse, and on the 1st of January, 1884, through trains were run to Buffalo. Shortly thereafter the Construction Company was placed in the hands of a receiver, its debts aggregating \$5,000,000. Part of the West Shore Company's January, 1884, coupons being in default, and in anticipation of the impending default on July, 1884, coupons, receivers were appointed June 9, 1884, on the application of the United States Trust Co., trustee of the first mortgage. On June 21, 1884, the receivers were authorized to issue and sell at a price not less than par receivers' certificates limited in the aggregate to \$3,000,000, the proceeds to be applied to payment of current expenses; traffic balances; amounts due for right of way, depot and other grounds; amounts due or to become due on equipment necessary to retain possession thereof; amounts due for labor and supplies, for rental, terminal, ferry and depot expenses since March 1, 1884, and taxes. Amount to be paid for depot or other grounds was limited to \$200,000, and for equipment to \$400,000. The certificates so issued are a first and prior lien on all the property covered by the mortgage. The receivers were at the same time authorized to make all necessary lease warrants for the purchase of rolling stock and equipment.

In March, 1885, the aggregate amount of certificates and notes which the receivers were authorized to issue was increased to \$5,000,000 and the limitations in regard to payments for real estate and rolling stock were removed. The receivers were also empowered to execute a lease to the Union Terminal RR. Co. of Buffalo (in reference to which see statement for

Buffalo, New York and Philadelphia RR.), of the property in that city proposed by the terms of the contract of February 7, 1885.

A plan for the reorganization of the company has been proposed, but at the time of preparing this statement it had not been carried into effect. (See SUPPLEMENT.)

The Saratoga and Hudson River Ry., known as the Athens Branch of the New York Central and Hudson River RR., was leased from that company in 1882 for a period of 475 years, the rental being commuted for the entire period for \$400,000. The Suspension Bridge and Erie Junction RR., 21.30 miles, and the Erie and International RR., 4.25 miles, are operated jointly with the N. Y., L. E. & W. RR. Co.

Rolling Stock.—Locomotive engines, 85. Cars—passenger, 70; official, 2; baggage, mail, and express, 20; freight (box, 1,609; platform, 1,200; milk, 6; caboose, 31), 2,846—total, 2,938. Also, 4 snow plows, 4 steam shovels, 1 derrick, 12 service, and 426 hand and rubble cars. In addition, the company leases 90 locomotives, 138 passenger, baggage, etc., cars, and 3,219 freight cars.

Operations for year ending September 30, 1884.—Trains run (passenger, 1,334,426; freight, 957,484), 2,291,910 miles. Passengers carried, 1,360,608; carried one mile, 60,158, -272. Freight moved, 839,539; moved one mile, 178,933,267 tons.

WEST SHORE AND ONTARIO TERMINAL COMPANY OF NEW YORK AND NEW JERSEY.—This company was formed on the 13th of June, 1883, by the consolidation of the National Stock Yard Co. and the Midland Terminal and Ferry Co. with the Open Cut and General Storehouse Co., the name of the latter company being retained until June 19, of same year, when the present title was adopted. The Ferry Co. and the Open Cut Co. had been organized with powers to hold and improve lands for commercial purposes on the Hudson River and elsewhere, and to operate a ferry between Weehawken and New York. In 1880 they passed under control of the New York, Ontario and Western Ry. Co., which in June, 1881, purchased a controlling interest in the stock of the Stock Yard Co. In the consolidation the stocks of the Stock Yard and of the Ferry Companies were exchanged for the stocks of the new corporation, the Ontario and Western and the West Shore Railway Companies being equal owners. On July 13, 1883, the property was leased to the two railway companies for 99 years, the lessees guaranteeing the payment of all taxes and expenses of maintaining organization and a rental equal, in minimum, to bond interest and, in maximum

to a sum which shall be sufficient to pay in addition thereto not more than 5 per cent. on full paid up capital stock. Capital stock, \$4,723,100; funded debt, \$10,000,000 first mortgage 5 per cent., gold, 40-year bonds, due August 1, 1922, interest February and August, principal and interest guaranteed jointly and severally by the West Shore and the Ontario and West-ern Railway Companies. * Included in main line.

2d track, 1.86; sidings, 52.52 miles. Gauge, 4 ft. 8½ in. Rail (steel, 227.89 m.), 56 and 60 lbs.

Organized as Rochester and State Line Ry. Co., October 6, 1869; opened from Rochester to Salamanca May 15, 1878. In default January 1, 1880, and receiver appointed June 7, 1880. Decree of sale December 13, 1880. Sold January 8, 1881, for \$600,000, subject to 1st mortgage debt and accrued interest. Reorganized February 1, 1881, under the title of Rochester and Pittsburgh RR. Co. (For plan of reorganization see MANUAL for 1884, page 183.)

The track of the New York, Lake Erie and Western RR. is used at an annual rental of \$55,200, and a proportionate share of maintenance. In 1881-82 the company made a running contract with the Silver Lake RR. Co., which provided for the construction of a connecting link of railroad from East Gainesville to this company's main line at Gainesville. Under the terms of this contract the Perry Railroad was built, forming the desired connection. In 1882 the company made a contract with the Pennsylvania RR. Co. for the use of the Allegheny Valley RR. from Falls Creek into Pittsburgh on a pro rata basis.

The extensions to Buffalo and Walston Junction were built in 1882-83 under charters of companies organized in 1881 to secure the legal rights therefor. These companies were subsequently merged into this corporation (see MANUAL for 1884, page 183). In 1883 the capital stock was increased to \$20,000,000 by an issue of \$10,000,000, the new stock being used in cancelling an intended issue of \$3,200,000 income bonds of the Buffalo and Pittsburgh Division and in purchasing the entire capital stocks of the Rochester and Pittsburgh Coal and Iron Co. (which owns two towns, Beechtree and Walston, at both of which collieries have been opened) and the Brockwayville and Punxsutawney RR. Co. under the charter of which the line was extended and opened to Punxsutawney September 30, 1883. In the same year the company purchased the franchise and capital stock of the East Buffalo Terminal RR. Co. of Buffalo having the right to build a road from Howard Street in East Buffalo into the centre of the city.

After the completion of the line to Punxsutawney, the rolling stock having been found insufficient for the proper transportation of the business offered, arrangements were made for the purchase of additional equipment at a cost of \$700,000, and to provide the means necessary for this purpose, as well as for the retirement of the \$600,000 second mortgage terminal bonds issued in 1883 and the liquidation of the floating debt, the directors authorized the creation of a new second mortgage to secure an issue of bonds to the amount of \$4,000,000. Of this amount \$2,800,000 were issued during the past fiscal year, and in response to circulars inviting subscriptions to that issue only \$1,132,500 were taken, so that to meet pressing demands the company was forced to hypothecate the remainder.

In August, 1884, default in payment of interest on bonds of this issue was made, and since that time various schemes of reorganization have been proposed.

Income bonds are non-cumulative, interest payable yearly in February, if earned.

Stock and 1st mortgage and income bonds listed on New York Stock Exchange. Annual meeting, second Wednesday in November. Books close for annual meeting 21 days prior thereto, and remain closed 22 days. Interest paid by Union Trust Co., New York City.

The 2d mortgage bonds are a first lien upon the capital stock of the R. & P. Coal and Iron Co.; upon additional rolling stock purchased from proceeds of these bonds; upon the steam canal-boats of the company, and the entire capital stock of the East Buffalo Terminal RR. Co. Also a 2d mortgage lien upon the Buffalo and Pittsburgh Division of the company's line, and a mortgage lien on the Salamanca Division, after existing mortgages on that division.

The consolidated 1st mortgage bonds are limited in issue to \$20,000 per mile of com-

pleted road. The mileage of the company (258 miles) would permit the issue of \$5,160,000 (which includes bonds provided by the mortgage to be issued on sidings in cities of Buffalo and Rochester, at the rate of \$20,000 per mile), but of this amount \$1,300,000 are held by the trustee to cover the outstanding \$1,300,000 1st mortgage bonds on the Rochester Division. Of the remaining \$3,860,000 that could be issued \$935,000 were reserved to take up the \$1,870,000 2d mortgage bonds of the Rochester Division. Of this amount \$696,000 have been issued, and \$1,392,000 of the income bonds have been received by the trustee, making the actual amount of consols outstanding September 30, 1884, \$3,621,000, and of income bonds not held by trustee of consolidated mortgage, \$478,000. Consolidated 2d mortgage bonds to the amount of \$2,800,000 have been issued, of which the trustee holds \$185,000 unused. The first issue, \$600,000, 2d mortgage bonds were redeemed March 8, 1884.

PERRY RAILROAD.—Gainesville, N. Y., to Silver Lake Junction, N. Y., 1.03 miles. total track, 1.23 miles. Rail, 56 lbs. Chartered May 9, 1882; opened August, 1882. * Sinking fund.

On the first day of April, 1878, this company made default in the payment of interest on its consolidated bonds. In 1882 a reorganization was effected, by which the rate of interest upon the consolidated mortgage bonds was reduced to 5 per cent. per annum; and the accrued and unpaid interest on the consolidated mortgage bonds up to July 1, 1882, was funded into non-cumulative income mortgage bonds, upon which such interest shall be paid as may be earned, not exceeding 7 per cent. per annum. An assessment of \$10 per share upon the capital stock was also levied, stockholders receiving income bonds to the amount of the assessments paid by them.

Consolidation, January 1, 1873, of the Blossburg and Corning and the Wellsboro' and Lawrenceville RR. Cos. The former of these two companies was originally chartered in New York, April 9, 1823, under the name of the Tioga Coal, Iron, Mining and Manufacturing Company, and under an amendment to its charter, passed in 1833, it constructed with a strap rail a railroad from Lawrenceville (Pennsylvania State Line), to Corning, N. Y. In 1851 its name was changed to Corning and Blossburg RR. Co.; in 1852 the track was relaid with "T" rail, and on March 19, 1854, company re-organized, after foreclosure sale, as Blossburg and Corning RR. Co. The Wellsboro' and Lawrenceville RR. Co. was organized in 1869, and constructed the extension of the former line within the State of Pennsylvania, from Lawrenceville to Antrim, 37.36 miles. On June 1, 1874, the Cowanesque Valley RR. (Lawrenceville to Elkland, Pa., 12 miles) was absorbed. These roads having been operated under lease by the Fall Brook Coal Co. until the date of the consolidation, as above, a new lease of the consolidated line was effected and is still in force. In 1882-83 the Cowanesque Valley Branch was extended 19.94 miles. In addition to the lines above, the Fall Brook Coal Co. operates under lease the Syracuse, Geneva and Corning, and the Pine Creek Railways, and also owns a line of road 7 miles in length, extending from Blossburg to Fall Brook, Pa.

The Delaware and Hudson Canal Company was chartered by the New York Legislature, April 7, 1823, to construct a canal and railroad from the coal-fields of Pennsylvania to the Hudson River at Rondout, N. Y. The canal, extending from Honesdale to Rondout was completed in October, 1828, the State of New York having in 1827 loaned its credit to the enterprise to the amount of \$500,000, and again in 1829 for \$300,000. The Gravity Railroad was completed in 1829, in which year the coal product amounted to 7,000 tons. The company is also largely engaged in the mining and sale of coal. During the year 1884 the coal transported was as follows: From company's own mines, 3,362,680 tons; for other parties, 623,697 tons—total, 3,986,377 tons; of which 1,750,927 tons were distributed east, *via* Honesdale; 1,025,101 tons west over N. Y., L. E. & W. RR.; 1,011,705 tons north over Albany and Susquehanna RR.; 50,315 tons south, and 148,229 tons by local sales.

The company operates in the State of New York, under the name of the Northern Railroad Department (see pp. 127 to 132), the Albany and Susquehanna, the Rensselaer and Saratoga, the New York and Canada, the Rome and Clinton, and the Utica, Clinton and Binghamton Railroads, with their branches and leased lines. The operations of the Lackawanna and Susquehanna RR. are reported in connection with the Albany and Susquehanna RR.

In addition to its lines of railroad, as above, there are also owned and operated in the company's mining district 162.75 miles of tram road, of 3 ft. gauge, of which 146 miles are under ground.

Rolling Stock, December 31, 1884.—Locomotive engines, 60. Cars—passenger, baggage, etc., 29; freight, 4,345; service, 100—total, 4,474.

Operations for year ending December 31, 1884.—Pennsylvania Division (100.92 miles). Trains run (passenger, 83,253; freight, 116,922; coal, 1,188,478), 1,388,653 miles. Passengers carried, 302,627; carried one mile, 3,726,839; average rate, 3.252 cents. Freight moved, 3,804,628; moved one mile, 145,441,318 tons. Average rate, 1.299 cents.

Stock and bonds listed on New York Stock Exchange. Annual meeting second Tuesday in May; books close for annual meeting 25 days prior thereto. Dividends are payable quarterly, the 10th of March, June, September, and December, and the books close about the 20th to the 25th of the month preceding each.

The stocks and bonds owned are as follows:

Bonds of Various Companies.....	\$143,608 59	Stocks R. & S. RR. (16,077 shares).....	\$1,607,700 00
Stocks A. & S. RR. (8,540 shares).....	854,000 00	Stocks Del. & Hud. Canal Co. (6,161 shares).....	616,800 00
		Stocks Other Companies.....	145,650 84

During 1884 the company paid regular quarterly dividends of 1½ per cent. each—two on \$20,000,000 stock and two on \$23,500,000 stock—amounting to \$1,522,560, and making the total amount paid in dividends to date, \$44,275,995, of which \$39,007,495 were paid in cash and \$5,268,500 in stock. For statement showing increase of capital stock and amount and rate of dividends paid from 1826 to 1883, see MANUAL for 1884, page 247.

The amounts paid in dividends during the past year are not shown in the accounts presented in this statement, for the reason that the General Profit and Loss Account, in which they are charged, is not given in the company's report, the Profit and Loss Account for the year 1884 being given in lieu thereof.

At the annual meeting held in New York City on the 8th of May, 1883, the stockholders voted to increase the capital stock from \$20,000,000 to \$30,000,000, the proceeds to be used in retiring the bonds of 1884, 1887, and 1891, as they mature, the new stock to be offered to the stockholders *pro rata* at par and issued as follows: \$3,500,000 in June, 1883, and the remaining \$6,500,000 as required. During the past year there was issued \$3,500,000 of this stock to retire the \$3,385,000 1st mortgage 7 per cent. bonds which matured July 1, 1884.

 Gauge, 4 ft. 8½ in. Rail (steel, 1,525.50 miles), 60 and 68½ lbs.

Consolidation December 10, 1853, of the Lackawanna and Western (chartered March 14, 1849), and the Delaware and Cobb's Gap (chartered December 26, 1850). Road opened from Scranton to Great Bend October 20, 1851, and from Scranton to the Delaware River May 27, 1856. In 1854 a lease was taken of the Warren RR., extending from the Delaware River to a junction with the Central RR. of New Jersey, the latter line being used up to 1875 as an outlet to the Hudson River. In 1863 a lease was taken of the Morris and Essex RR., which now, with the Warren RR., forms its line to the Hudson. In 1855 a perpetual lease was taken of the Cayuga and Susquehanna RR. In 1870 control was obtained of the Syracuse, Binghamton and New York RR., by the purchase of the major part of its stock. In 1871 the Valley RR., extending from Great Bend to Binghamton, was built, in order to form a connection with the Syracuse, Binghamton and New York RR., the Greene, and the Utica, Chenango and Susquehanna RR. leased lines. In 1873 the D. L. & W. and the Lackawanna and Bloomsburg RR. Cos. were consolidated. In September, 1881, the company obtained control of the Sussex RR. of New Jersey, by the purchase of a major part of its stock. In October, 1882, a lease was taken of the New York, Lackawanna and Western Ry., which extended the line to Buffalo, and in November following of the Passaic and Delaware RR. in New Jersey.

Interest payable at the Bank of North America and at the office of the company in Philadelphia. Interest on consols is payable semi-annually, June 1 and December 1. On the 1st of December, 1884, 179 sterling bonds were drawn, leaving \$3,507,000 outstanding.

Under the terms of a plan outlined in the MANUAL for 1884, the common stock was increased \$5,351,770 during the past year, there having remained untaken 493³/₈ shares of the proposed increase. The Geneva, Ithaca and Sayre RR. Co. has issued \$542,000 of its 6 per cent. bonds to this company in payment of advances. To provide for the payment of the "boat loan" of the Morris Canal and Banking Co., guaranteed by this company, and which matures in October, 1885, an equal amount, \$220,000, of the first mortgage bonds of that company have been reserved. During the year the company made advances aggregating \$1,490,210.59 to the Lehigh Valley Coal Company for the purchase by that company of additional coal lands and for other purposes. Advances were made to the Pennsylvania and New York Canal and RR. Co. for construction work and for other purposes, in cancellations of which debt that company sold its freight and coal cars to the Lehigh Valley Co. for \$1,230,-175.61. A large amount has also been advanced to the Southern Central RR. Co. for betterments, etc.

EASTON AND AMBOY RAILROAD.—Easton, Pa., to Perth Amboy, N. J., 60.01 miles (double track, steel rails, and 42 miles of sidings); Clinton Branch, Landsown, N. J., to Clinton, N. J., 2.05 miles; Flemington Branch, Flemington Junction, N. J., to Flemington, N. J., 1.91 miles; Paper Mill Branch, Musconetcong, to Warren Paper Mill, 1.95 miles—total length, 65.92 miles. Main line opened in June, 1875; Clinton branch November 22, 1881; and the Flemington and Paper Mill branches during the past year. The road is owned by the Lehigh Valley RR. Co. In 1877 the company executed a mortgage to secure \$10,000,000 6 per cent. bonds, of which \$5,000,000 were issued to the Lehigh Valley RR. Co., none of which were ever disposed of. In March, 1880, that mortgage was cancelled and a new issue of \$6,000,000 7 per cent. 40-year bonds made and delivered to the Lehigh Valley RR. Co.—\$5,000,000 in exchange for the 6 per cents held by it, and \$1,000,000 in repayment of advances made by that company from time to time for the construction and completion of the line. The total cost to November 30, 1883, since which time no returns have been received for this road, amounted to \$10,781,332.66, represented by \$5,250,000 stock, \$5,250,000 5 per cent. bonds, and \$281,332.66 advances by Lehigh Valley RR. Co. Of the new bonds there are outstanding \$3,500,000, interest upon which is guaranteed by the Lehigh Valley RR. Co. Officers same as Lehigh Valley RR. Co.

Total length of lines (owned, 188.13 miles) operated.....379.94 miles.
 Second track (owned, 91.13; leased, 1.89), 93.02 miles; sidings (owned, 86.53; leased, 87.38) 173.99 miles; private sidings (lines owned, 13.32; lines leased, 7.84), 21.26 miles. Total tracks (lines owned, 336.38; lines leased, 331.74), 668.12 miles. Gauge, 4 ft. 9 in. Rail—iron, 60 and 64; steel (on line owned, 292.70; on leased lines, 170.00—total, 462.70 m.), 60 lbs.

Consolidation December 9, 1854, of the Baltimore and Susquehanna RR. Co. (chartered February 13, 1828; road opened in 1838); York and Maryland Line RR. Co. (chartered March 14, 1832; road opened in 1838); York and Cumberland RR. Co. (chartered April 21, 1846; road opened in 1851); and Susquehanna RR. Co. (chartered April 14, 1851; road opened in 1858). The main line reaches the Elmira and Williamsport RR. and its northern extension by using, under a traffic arrangement, 40 miles of the Philadelphia and Erie RR. between Sunbury and Williamsport. The Shamokin Valley and Pottsville RR. was leased February 27, 1863, for 999 years, and the Elmira and Williamsport RR., April 15, 1863, for 999 years. The Chemung and the Elmira, Jefferson and Canandaigua RRs. are controlled by the Northern Central Ry. Co., as owner of a majority of stock, acquired May 10, 1872, when the Erie leases were cancelled and annulled. For terms of these leases see statements on the several companies. In addition to the mileage given above, the company uses the track of the N. Y., L. E. & W. RR. between Southport and Horseheads, N. Y., a distance of 7 miles, making the total length operated (excluding Sodus Bay and Summit Branch RRs.) about 323 miles.

For operating purposes these lines are formed into six divisions, as follows: Main line, 139; Green Spring Branch, 9; Shamokin, 28; Elmira, 78; Chemung, 22; Canandaigua, 47 miles.

A majority of the share capital of this company is owned by the Pennsylvania RR. Co.

In 1882 the company purchased the entire capital stock of the Union RR. Co., \$600,000, increasing its own capital stock \$658,000 for that purpose. The Union RR. passed under the management of this company March 1, 1882. There was built, during the same year, a connecting line between Dauphin, on this company's road, and Rockville on the line of the Pennsylvania RR. Co., at a cost of \$175,000, which was defrayed by the latter company, and a contract made between the two companies, under which this company operates the line, and from time to time refunds the outlay thereon. On the 1st of July, 1884, the company pur-

chased the entire capital stock, \$500,000, of the Sodus Bay and Southern RR. Co. for \$100,000. A traffic contract has been entered into with the Stewartstown RR. Co., which is building a line 7 miles in length from New Freedom to Stewartstown, Pa., by the terms of which contract this company will secure all traffic controlled by the Stewartstown RR. Co., and destined to and from points on this company's main line and its connections.

The Union Railroad since its acquirement, March 1, 1882, has been operated by the Northern Central, but its financial results have been kept separate and distinct from those of the operating company. The Summit Branch being operated by this company, as agent of the lessee, its results have also been kept separate. The Rockville Branch is operated as an extension of the Susquehanna Division, and included therein.

Rolling Stock.—Locomotive engines, 152. Cars—passenger, 69; baggage, 23; express, 16; postal, 3. Total all lines owned, leased and operated by Pennsylvania RR. Co.....2,238.85 miles.

* Operated by Northern Central Ry. Co.

Second track on lines owned; 345.75 miles; third and fourth tracks owned, 133.21 miles; sidings owned, 318.81 miles; sidings (private), 83.30 miles—total (steel, 1,075.62 miles; iron,

254.78 miles), 1,330.40 miles. Gauge 4 ft. 9 in. Rail, 56, 60 and 67 lbs. P. RR. standard pattern.

In addition to its railroads the Pennsylvania RR. Co. operates, in connection with its United New Jersey Division, the Delaware and Raritan Canal, 44 miles, and feeder, 23 miles; and owns and controls but operates under a separate corporate management, the Pennsylvania Canal, extending from Columbia to Nanticoke, with branches from Northumberland to Lock Haven and Bald Eagle, with Cross-cut to Lewisburg; Clark's Ferry to Millersburg, and from mouth of Juniata River to Huntingdon, Pa., a total length of 321 miles.

The original line of the Pennsylvania RR. Co., chartered April 13, 1846, extended from Harrisburg to Pittsburgh, a distance of 248 miles. The work of construction was begun at Harrisburg in July, 1847. The division from that point to a junction with the Portage Railroad (then a State work), at Hollidaysburg, at the eastern base of the mountains, was opened September 16, 1850. The Western Division, from the western end of the Portage Railroad at Johnstown to Pittsburgh, was opened September 10, 1852. The Mountain Division, and with it the whole line, was opened February 15, 1854. From Harrisburg to Philadelphia the line is made up of the old Philadelphia and Columbia RR. (originally a State work), and the Harrisburg, Portsmouth, Mount Joy and Lancaster RR., chartered in 1832, opened in 1838, and leased in 1849. The Philadelphia and Columbia RR. was purchased in 1857, with the main line of a system of public works of the State. This system was undertaken in 1826, and contemplated the construction of canals along the lines of all leading watercourses. The Philadelphia and Columbia RR. was built to connect the Susquehanna system of canals with Philadelphia, as well as to form part of a line, made up of canal and railroad, between Philadelphia and Pittsburgh. When the system was undertaken, a canal from the waters of Susquehanna to those of the Alleghany was supposed, erroneously, to be practicable. The Portage Railroad across the summit, of 41 miles, was worked by a series of inclined planes, and was abandoned upon the completion of the Pennsylvania RR. For the work purchased of the State between Philadelphia and Pittsburgh, this company paid \$7,500,000, in its 5 per cent. bonds, payable at the rate of \$460,000 annually, the balance after payment of interest going to the reduction of the principal.

The following is a recapitulation of all the miles of line and tracks either owned, leased, operated, or controlled by this company east of the cities of Pittsburgh and Erie, December 31st, 1884 :

"The above statement," says the company's report, "shows that after the payment of a dividend of 7 per cent., amounting to \$6,560,787.50, there remained a balance of \$1,440,425.45, from which was deducted the sum of \$1,020,691.51, properly chargeable to profit and loss, leaving the net amount carried to the credit of that account for 1884, \$419,733.94, and making a total credit at the close of the year of \$14,032,917.97.

"The securities of branch and auxiliary lines now owned by the company amount at their par value to \$128,068,846.50, and are represented on the books at a cost of \$96,865,516.64. The income derived therefrom during the year amounted to \$3,956,374.85, which, with \$126,473.42 derived from the general interest account, made \$4,082,847.77, which sum was \$73,940.50 in excess of the interest upon your entire funded indebtedness, exclusive of interest on Car Trust certificates.

"The marked decrease in the gross and net earnings of these three divisions in 1884 is due entirely to the reduction in the rates received for transportation: the volume of tonnage moved and the number of passengers carried being greater than in the previous year. This reduction in rates has been caused by the severe depression in the manufacturing and mining interests of the country, upon the prosperous condition of which the revenues of your lines so largely depend. In addition to this cause, the unnecessary construction of new and competitive lines within the past few years has further divided the volume of traffic which was naturally tributary to the older roads, while the financial necessities of such new enterprises have forced them into destructive competition with the better established lines.

"The increased volume of your tonnage is due entirely to your local traffic, as it will be noted that there was a reduction in the amount of through business, while each year the local traffic represents a constantly increasing proportion of the aggregate tonnage, until it has now reached about 92 per cent. thereof. This result should be especially gratifying to the shareholders, and is the natural outgrowth of the liberal expenditures made by your company for developing the local interests dependent upon your lines.

"Although the large increase of traffic upon the main line produced less gross revenue, the expenses were kept materially below those of the previous year, and to these economies must be attributed the comparatively favorable results upon that division. It will be noted that the net loss to your company from the lease of the united railroads of New Jersey was less than in the previous year.

"On the Philadelphia and Erie Division the reduction in expenses nearly overcame the loss in gross revenue, the net result for the year being satisfactory; that company having been able to meet all its fixed charges and pay a portion of the interest unprovided for in previous years."

Traffic Notes.—During the year there were handled on the three divisions as above 1,737,358 pieces of baggage, against 1,774,192 in 1883. The entire payments for lost and damaged baggage amounted to \$1,355.66, against \$1,262.03 in 1883. Total freight moved over the main line and branches, not including 1,189,183 tons of fuel, and other materials for the company's use, 22,583,825 tons; for 1883, 21,674,160, tons; increase, 909,665 tons, or 4.20 per cent. There was an increase of 1,022,746 tons in local freight. Of the 22,583,825 tons of individual freight transported over main line and branches 1,824,769 tons were through, and 20,759,056 tons local freight. The increase in coal shipments was 1,164,727 tons, and decrease in coke shipments, 291,274 tons; aggregate increase (13,300,341 tons in 1884 against 12,426,888 in 1883), 873,453 tons. The east-bound coke tonnage from the Connellsville region shows an increase of 34,307 tons, and the west-bound a decrease of 367,527 tons; the entire movement from that district amounting to 2,366,606, out of a total of 2,846,126 tons from all sources. Total oil shipments during 1884, 3,281,859 barrels, against 1,756,-

696 in 1883, an increase of 1,525,193 barrels. The through freight on the main line shows a decrease in east-bound of 6.4 per cent., and west-bound, 4.43 per cent.; while the local freight eastward shows an increase of 6.91 per cent., and westward, 2.22 per cent. The number of passengers on the main line shows an increase of nearly 7 per cent. On the United Railroads of New Jersey there was a decrease in through freight, in both directions, of 170,500 tons, and an increase in local traffic, in both directions, of 459,668 tons, making a total increase of 289,168 tons. Passenger traffic shows an increase of over 11 per cent. in the number carried. On the Philadelphia and Erie Division there was a decrease of the tonnage of through freight in both directions of 102,486 tons, and in local freight westward of 381,358 tons, but an increase in local freight eastward of 232,920 tons. Passenger traffic shows an increase of over 2 per cent. in the number carried.

Total amount expended and charged to capital account in 1884.....\$5,793,151 61

("On account of the above advances to branch lines there has been received in securities of above companies, \$3,954,525.94.")

"The funds for these expenditures were obtained from the cash balance of the previous year, from the privilege accorded to stockholders of taking new stock for a portion of their dividend, and from the sale of three millions of dollars of collateral trust loan, bearing four and one-half per cent. interest per annum.

"The expenditures for branches and auxiliary lines form a large proportion of the capital you are annually called upon to provide ; but the wisdom of extending such lines cannot be called in question when, notwithstanding the severe commercial depression before alluded to, your main lines increased their volume of tonnage over that of any previous year.

"The debt due to the State of Pennsylvania on account of the purchase of the main line was reduced during the year by the payment of \$315,089.86, which was charged to capital account. The balance of the annual payment of \$460,000 (\$144,910.14), representing the interest upon the amount due to the State, was charged directly to income account. The balance due on account of the purchase of the main line is \$2,600,913.

"Under the provisions of the consolidated mortgage of the company, there was set apart, on the first day of July last, out of the net income, the sum required for the purchase of outstanding bonds secured by that mortgage, and entitled to the security of the covenants therein, in relation to the sinking fund. Bonds to the par value of \$277,460 were thus purchased, and, after being cancelled, were delivered to the trustees under the stipulations of the said mortgage ; this reduction appears in the treasurer's general account. The amount of bonds so purchased to date is \$1,767,070 at their par value.

"There are now in the sinking fund, for the redemption of the obligations of the various companies forming the United New Jersey Railroad and Canal Company, securities of the par value of \$3,131,900. There is also a cash balance, uninvested by the trustees, of \$4,711.34, making an aggregate investment of \$3,136,611.34, for which you will, in the future, in accordance with the terms of the lease, receive bonds to be issued under the general mortgage of that company.

"The sinking fund for the redemption of the trust certificates issued for the purchase of the shares of the capital stock of the Philadelphia, Wilmington and Baltimore Railroad Company, was sufficient to enable the trustee to purchase \$409,000 of such certificates during the past year. These certificates have been cancelled as provided in the trust agreement. The general account of the treasurer shows this reduction in the amount of outstanding certificates, and a corresponding reduction has been made on the other side of the account in the cost of the shares purchased by your company. The total amount of these certificates purchased and cancelled to December 31st, 1884, is \$1,266,000.

"By the operation of the sinking fund \$60,000 of the certificates of the collateral trust loan of your company have been redeemed and cancelled, leaving \$5,940,000 outstanding. The amount of the collateral trust loan authorized to be issued was \$10,000,000, of which \$6,000,000 have been disposed of, leaving a balance of \$4,000,000 unsohd."

PENNSYLVANIA CANAL COMPANY.

The following statement shows its operations for 1884, as compared with 1883 :

	Gross Earn'gs	Expenses.	Net Earnings.	Int. on Bonds and St. Taxes.	Net Profit.	Net Loss.
1884.....	\$ 319,685.86	\$ 192,372.70	\$ 127,313.16	\$ 180,330.08	\$ 8,386.32	\$ 53,016.92

Decrease.....	75,532.21	11,399.05	64,133.16	2,729.92	61,403.24

The aggregate tonnage for the year was 649,517 net tons ; a decrease, as compared with 1883, of 158,794 tons. The anthracite coal tonnage decreased 62,557 gross tons, with a decreased revenue of \$54,445.91. The lumber tonnage, including logs, decreased 36,378 net tons, and the revenue therefrom decreased \$9,173.67.

The average price per ton at point of sale, aggregating the results of the four coal companies for 1884, was \$3.77⁰⁰/₁₀₀, as against \$3.81⁰⁰/₁₀₀; a decrease of .04⁸⁰/₁₀₀ cents per ton. Owing to the construction of new and competitive outlets to western markets by some of the railroad companies which control the larger portion of this class of traffic, and the diversion thereto of coal formerly transported over your lines, your company has been compelled to increase its output of anthracite to supply the tonnage thus diverted, and also to further develop its coal properties to meet the traffic requirements of your lines.

CAR TRUSTS.

"Further provision was made, under the system of Car Trusts, for the equipment of your roads to the extent of 500 refrigerator and 500 hopper gondola cars for the main line, 500 long gondola cars for the lines of the Pennsylvania Company, and 700 hopper gondola cars subleased to the Northern Central Railway Company. The 17,809 cars placed on the lines east of Pittsburgh, through Car Trusts represent a cost of \$9,748,380 00
The 10,987 cars west of Pittsburgh..... 5,631,370 00

LINES WEST OF PITTSBURGH.

The following statement gives the result of the lines owned or controlled by the company west of Pittsburgh operated by the Pennsylvania Company, and the Pittsburgh, Cincinnati and St. Louis Railway Company :

	1884.	1884.
The total earnings of the Pennsylvania Company on lines operated directly by it were	\$16,472,282.82	
Expenses for same period were.....	10,844,960.57	
Leaving net earnings.....	\$5,627,322.25	
From this deduct :		
Rental, interest, and liabilities of all kinds chargeable thereto	6,342,003.55	
Net loss on Pennsylvania Company's Lines.....		\$714,681.30
The total earnings of the Pittsburgh, Cincinnati and St. Louis Railway Company on lines operated directly by it were.....	\$6,435,518.54	
Expenses for same period were.....	4,716,548.80	
Leaving net earnings.....	\$1,718,969.74	
From this deduct :		
Rental, interest, and liabilities of all kinds chargeable thereto	1,833,169.07	
Net loss on Pittsburgh, Cincinnati and St. Louis Railway Company's Lines.....		114,199.33
Net loss on lines west of Pittsburgh for 1884.....		\$828,880.63
Net profit on lines west of Pittsburgh for 1883.....		823,896.03
Decrease.....		\$1,652,776.66

The other lines west of Pittsburgh, in connection with which the company has assumed liabilities, or which it controls through the ownership of securities, but which are worked through their own individual organizations, are, the Chicago, St. Louis and Pittsburgh RR., St. Louis, Vandalia and Terre Haute RR., Grand Rapids and Indiana RR., and roads operated through its organization, and East St. Louis and Carondelet RR.

The aggregate gross earnings of these roads were.....	\$8,481,895 50	
Expenses.....	6,565,306 99	
Net earnings.....	\$1,916,588 51	
Deduct rental and interest.....	2,086,804 44	
Loss.....		\$170,215 93
Of this loss your company, under existing contracts, is directly or indirectly responsible for		\$33,010 53
Which, added to the loss shown in the above statement.....		828,880 63
Leaves a net loss on all lines west of Pittsburgh for 1884.....		*\$861,891 16
Net profit on all lines west of Pittsburgh for 1883.....		812,669 30
Showing a decrease for 1884 of.....		\$1,674,560 46

* The difference between this amount and the balance shown by the income accounts of Pennsylvania Company and Pittsburgh, Cincinnati and St. Louis Railway Company is due to the fact that the actual advances made during the year were \$4,460.92 more than the losses shown by the operations of the roads.

"Your lines west of Pittsburgh show a very marked decrease in both gross and net earnings. This is due not only to the falling off in the volume of traffic from causes already alluded to, but also to the very large reduction in rates, the result of severe competition for the decreased traffic.

"While the expenses were as far as possible reduced, it was not thought wise to permit any depreciation in the general condition of your properties, so that there was a loss in maintaining your entire western system during 1884, of \$861,891.16, as against a profit of \$812,669.30 in 1883. The freight movement shows a decrease of 1,257,839 tons, and the passenger traffic a decrease of 72,384 in the number carried.

"Of the issue of \$3,200,000 of the Pennsylvania Company's six per cent. bonds, secured by Pittsburgh, Fort Wayne and Chicago Railway Company stock as collateral. \$756,000 have been redeemed through the operation of the sinking fund, leaving the amount outstanding \$2,444,000. During the year there were sold at favorable rates \$1,250,000 of the Pennsylvania Company four and one-half per cent. bonds, making the entire issue of that series \$13,750,000. The proceeds of the \$1,250,000 bonds were used to redeem one million of the eight per cent. equipment bonds of the Pittsburgh, Fort Wayne and Chicago Railway Company, which fell due March 1st, 1884, and to provide the necessary capital for the betterment of your western system.

"The report made by the trustees of the sinking funds of the first and second mortgages of the Pittsburgh, Fort Wayne and Chicago Railway Company shows that the regular annual contribution of \$104,100 was paid to the trustees of these mortgages. They redeemed during the year \$120,000 of the first mortgage, and \$105,000 of the second mortgage bonds, making the total amount redeemed to December 31st, 1884:

First mortgage bonds	\$1,583,500 00
Second mortgage bonds	1,800,000 00

With a balance of cash in the hands of the trustees uninvested December 31st, 1884:

On account of first mortgage sinking fund.....	\$247,379 58
On account of second mortgage sinking fund.....	139,469 92

"The further sum of \$110,842 was also paid into the sinking funds provided for the redemption of the existing mortgages on the other leased lines west of Pittsburgh, in addition to the amounts contributed directly by the individual companies.

"The Grand Rapids and Indiana RR. Co. was able during the past year to earn sufficient to provide for all its fixed liabilities, and your company was not called upon to make any advances to that company. The land department made sales of 10,971 acres, almost entirely farm lands, for \$92,993.32, being an average of \$8.47 per acre. The entire amount sold to the close of the year, after deducting cancelled contracts, was 403,033.33 acres, and the aggregate price received therefor was \$4,909,611.34, an average of \$12.18 per acre. Out of the proceeds of such sales the trustees redeemed during the year \$114,000 of the first mortgage bonds of the company, making the entire amount exchanged for income bonds, to the end of 1884, as reported by the trustees, \$2,551,000.

"The suit referred to in the last report as having been instituted against the Grand Rapids and Indiana RR. Co. for a proper adjustment of the claims held by your company and the Pennsylvania Company, has been brought to an amicable settlement, by which your company, in connection with the Pennsylvania Company, have received in payment of the amounts due them, with interest thereon, \$2,700,000 of six per cent. bonds, and \$434,000 of five per cent. bonds, secured by mortgage; the former being subsequent in lien only to the outstanding first mortgage bonds. These bonds are believed to be a good security, and your company will in all probability be able to dispose of them, if it so desire, so as to be fully reimbursed for all the advances heretofore made to that road. The assets on hand December 31st, 1884, applicable to the redemption of the first mortgage bonds, were:

Cash in the hands of the trustees.....	\$375,897 89
Cash in hands of cashier.....	29,223 04
Bills and accounts receivable in hands of cashier.....	489,213 63
Total	\$894,334 56

"During the past year considerable expenditures were made in the construction of additional and improved shop facilities at Columbus, Indianapolis, and Fort Wayne, and in providing at various points additional side tracks and terminal facilities.

"During the year there was laid on the north-western lines operated directly in your interest 9,442 tons, and on the south-western lines 11,209 tons of steel rails.

"The amount expended during the year on capital account on the lines west of Pittsburgh was:

† Miles steel rail owned by Pennsylvania RR. Co.

The trust certificates (originally \$10,000,000) were issued to provide part of the means for the purchase of the P., W. & B. RR. (see SUMMARY OF PROGRESS IN MANUAL for 1882, p. 288), and bear interest at 4 per cent. For the payment of these certificates the faith of the Pennsylvania RR. Co. is pledged, and they are further secured by a deposit of 200,000 of the shares purchased with the Pennsylvania Co., for insurance on lives and granting annuities, as trustees. The dividends upon this stock, after providing for the interest upon the then outstanding certificates, are applied as a sinking fund for their purchase and cancellation whenever they can be obtained at a price not exceeding par.

Included in accounts payable (in General Balance Sheet) are passenger balances due other roads, \$478,164; pay-rolls and vouchers for December, \$3,884,915.53; unpaid dividends, \$94,410; outstanding scrip, \$3,485.11; sundry accounts, due other roads, etc., \$6,294,652.63.

The total line charged in construction account for road between Harrisburg and Pittsburgh includes the branches to Indiana, Hollidaysburg, and Morrison's Cove; branch to connect with P., V. & C. RR. and branch at Tyrone; Columbia Bridge; branch from Columbia to York, and branch from Frazer to Woodland, comprising 1,239.72 miles of single

track (exclusive of the Harrisburg and Lancaster RR., 98.70 miles), and including wharves and grain elevator, and cost of stations, warehouses, and shops. The equipment, charged in equipment account, consists of 1,176 locomotives, 876 passenger, 213 baggage, mail, and express, 25,101 freight, and 2,225 road cars, as well as shop machinery, steamboats, car-floats, and canal equipment, schooners, barges and tugs.

Annual meeting, fourth Tuesday in March. Books do not close therefor, owners of stock on day preceding being privileged to vote at such meeting. At the annual election for directors, two weeks thereafter, voting power involves the ownership of stock for 60 days prior thereto. Stock and bonds listed on the Philadelphia Stock Exchange. Consolidated mortgage sterling bonds listed on London Exchange.

GENERAL REMARKS.

"Under the provisions of the trust created October 9, 1878, as will be seen by the report hereto attached, there has been paid, to December 31, 1884, the sum of \$3,700,000, which, with the income therefrom, has been invested in securities amounting at par to \$4,423,750, yielding an interest of 6 $\frac{1}{1000}$ per cent. per annum upon the investment.

"The subject of the continued appropriation of \$600,000 per annum, as provided in the trust created October 9, 1878, has had the careful consideration of your board. It will be seen that the par value of the securities in the trust is nearly \$4,424,000, and the income therefrom exceeds \$300,000 per annum. The principal object had in view at the time of the creation of this trust, namely, an improvement in the market value of all securities, the principal, interest, or dividend upon which was guaranteed by the Pennsylvania RR. Company, has been attained. Your board are of the opinion that the income of the fund as it now stands should continue to be added to the principal, and the monthly appropriation of \$50,000 be reduced to an amount equal to one per cent of the net income of the company before payment of dividend to the shareholders. On the basis of the net income for the past year the appropriation to the fund would have been about \$86,000 instead of \$600,000. If this suggestion is favorably received by the shareholders, your management would recommend that the incoming board be instructed to give at least ninety days' notice of the taking of a stock vote on the approval or disapproval of this proposed modification in the trust.

"The statement of the insurance fund attached shows the assets on hand at the end of the year \$1,149,090.03, being an increase over the previous year of \$3,683.84, notwithstanding the severe losses during the past year, notably that caused by the burning of the Jersey City depot, to the rebuilding of which this fund contributed \$190,000.

"Your board have referred in previous reports to the annual loss sustained by your company in their efforts to maintain the *American Steamship Company's* line of steamers to and from the port of Philadelphia. They therefore deemed it wise to avail themselves of the opportunity of disposing of these vessels upon satisfactory terms to the *International Navigation Company*, especially as they secured thereby a more efficient weekly service between Philadelphia and Liverpool and between New York and Liverpool, both of which are to be operated in harmony with your system of roads. It is believed that this arrangement will not only be productive of beneficial results to your company, but will also tend to advance the commercial interests of Philadelphia.

"The litigation connected with the agreement with the *Central Railroad Company of New Jersey* for the joint use of the *New York and Long Branch Railroad*, referred to in the last annual report, remains in the same condition as at the close of 1883. Your company, however, under the injunction granted by the court, continues to use the road under the original contract.

"The *Pittsburgh, Fort Wayne and Chicago Railway Company* having declined to issue, in settlement of expenditures made for the improvement and betterment of its property, and under authority of its board, the form of security heretofore agreed upon, and repeated negotiations having failed to effect a settlement of the matters of difference, your company applied to the courts for a judicial determination thereof, and finally secured a decision sustaining the position taken by your management. The officers of the Pittsburgh, Fort Wayne and Chicago Railway Company have, in accordance therewith, issued a portion of the securities due your company for such improvements, and taken the necessary steps towards a settlement of the balance of your account.

"Notwithstanding the marked depression that has characterized the past year as one of the most unremunerative in the history of railways, your management considered it wise to continue the policy of strengthening your properties by further improving and extending the lines already in operation, and by promoting new branches for the development of the territory that is naturally tributary to your general system. In no case, however, has any responsibility been assumed except where it was believed that the direct result would be increased traffic, or where it was necessary to prevent the diversion of traffic heretofore enjoyed by your roads.

"The detailed statement to be found on a previous page of this report will show the amounts that have been expended upon your main line and branches during the past year, the greater portion of which was for additional equipment and real estate. The amount expended upon the United Railroads of New Jersey was materially less than in 1883. No large expenditures will be required upon either of these properties during the current year, unless there is a material increase of traffic, or some outlay not now anticipated becomes necessary.

"Of the expenditures for improvements and additions to branch and auxiliary lines the principal items were, the extension of the fourth-track system upon the *Connecting Railway*, the link which connects your main line with the New Jersey system; the extension of branch lines upon the *Tyrone and Clearfield Railway*, for the purpose of further developing this important bituminous coal region, the results of which are shown in the general increase of tonnage therefrom; the extension of the *Lewisburg and Tyrone Railroad* a distance of fifteen miles, to a junction with the *Bellefonte, Nittany and Lemont Railroad*, now being constructed by the *Bald Eagle Valley Railroad Company* from Bellefonte, and thus securing a direct connection between these two systems; and the construction of a branch of the *North and West Branch Railway* to a new colliery, and additional tracks and facilities needed for its traffic. The latter line, which is comparatively new, furnishes an all-rail route for your Susquehanna coal, and has proved more productive than was anticipated.

"The amounts expended upon the *Southwest Pennsylvania and Pittsburgh, Virginia and Charleston Railways* were for the purpose of acquiring additional real estate and facilities for increased traffic. Both of these properties, in addition to bringing to your lines a large amount of business, were able to meet the interest upon their fixed liabilities, and the former company paid a dividend to its shareholders.

"The large investments heretofore made in improving the grades of the *Western Pennsylvania Railroad* have enabled it to be used during the past year as a low-grade line from Pittsburgh to the western slope of the Allegheny Mountains. As a direct result thereof the net earnings of this property were more than sufficient to provide for the interest upon its funded liabilities.

"The *Susquehanna and Clearfield*, and *Ridgeway and Clearfield Railroads*, both branch lines extending into the bituminous coal lands tributary to your Philadelphia and Erie system, are now in active operation and securing additional tonnage for that road.

"The *Philadelphia, Germantown and Chestnut Hill Railroad* was opened for traffic in June, 1884. The number of passengers carried has been in excess of what was anticipated, and though the road may not for a few years be directly profitable, yet as a feeder to your main lines it fully meets the expectations of your management.

"The *Pennsylvania Schuylkill Valley Railroad* was completed as far north as Reading late in the fall, and is securing to your lines a share of the traffic of the country naturally tributary thereto. It is proposed during the coming season to make further progress in extending this road through the anthracite coal districts, looking ultimately to a connection with a branch of the *Northern Central Railway* at Shamokin, and with the *North and West Branch Railway* near your *Susquehanna Coal Company's* properties. Upon completion of these lines your system of roads will be enabled to share in the transportation from the West to these districts, of the agricultural and other products upon which they are so largely dependent, and to secure in return a share of east and west bound anthracite tonnage.

"No material investments will be required in new work during the current year beyond what has been referred to, except in short branches to promote the development of local interests.

"The contract with the *Pullman Palace Car Company*, which was made for a period of fifteen years, expired by limitation on January 27, 1885. It was thought advisable in view of the contract relations of that company with the systems of railways connecting with your lines, and of the efficient manner in which it provides for the wants of the public, to enter into a new agreement, rather than assume the direct management of the sleeping cars upon your roads, especially as the contract is not only favorable to your company, but will afford an opportunity, if it so desire, to share in the ownership and revenue of that equipment, and also to terminate it at certain stated periods if deemed to your interest.

"The condition of the general transportation interests of the country fully confirms the correctness of the views expressed in the last report in reference to the maintenance of the present pooling system, and while your management have taken no active steps towards a direct withdrawal therefrom, yet they share the opinion with other large transportation interests of the country, that its further maintenance under existing arrangements can hardly be productive of good, either to the public or to the railway interests.

"The marked decrease in the gross revenues of your properties, referred to in a previous portion of this report, was not due to any material diminution in the volume of traffic, but to a serious reduction in the rates, forced upon your management by undue competition of other lines, and which in many instances were so low as to make it questionable whether any profit was earned thereon. This was felt more directly by your western lines than by those east of Pittsburgh and Erie; the revenues of the former being more largely dependent upon through traffic. Further material reductions in rates cannot be made without seriously injuring the railway interests of the country, as they are now below what is fairly remunerative to even the most thoroughly equipped and efficient transportation routes.

"In view of the decrease in net earnings, your board felt it necessary to make a reduction in the rate of dividend, which, however, is still materially above the average interest received on first-class investments. Your management is convinced that the only way to keep your lines in a prosperous condition is to make prudent but liberal expenditures for their maintenance and improvement, and keep the financial credit of your company up to the highest standard."

UNITED NEW JERSEY RAILROAD AND CANAL COMPANIES.—Main lines railroad owned: Jersey City to Trenton, 56.66 miles, and South Amboy to Camden, 61.15 miles; branches owned, 27.03 miles—total, 144.84 miles. Canal owned: Bordentown to New Brunswick, and feeder, 66 miles. The Delaware and Raritan Canal Co. and the Camden and Amboy Railroad Co. were both chartered in February, 1830, the former to construct a canal to connect the Delaware and Raritan Rivers, and the latter to build a line of railroad from the Delaware River to Raritan Bay. In February, 1831, an act was passed authorizing the consolidation of the capital stocks of these two companies, the companies being thus practically consolidated, although nominally distinct corporations. The affairs of the companies were managed jointly, by the directors of both, and each was to share equally in profits. Under this joint management, the construction of the works was begun. The main lines of the railroad and canal were completed in 1834, and the branches in 1838. In 1836 the United Companies acquired a controlling interest in the stock of the Philadelphia and Trenton RR. Co., and entered into an agreement with that company for an equal division of their joint profits.

In January, 1867, an agreement was entered into between the United Companies and the New Jersey Railroad and Transportation Co., which owned the line between New Brunswick and Jersey City, forming a link in the through New York-Philadelphia route, for a consolidation of interests; and under this agreement the profits were equally divided between the four companies—the Delaware and Raritan Canal Co., the Camden and Amboy, the New Jersey, and the Philadelphia and Trenton Railroad Companies.

In May, 1871, the entire property was leased to the Pennsylvania RR. Co., for 999 years, the lessee receiving all assets and assuming all obligations, and guaranteeing to the United Companies an annual rental equal to 10 per cent. on the aggregate capital stock, and to the Philadelphia and Trenton dividends of an equal rate.

Gross earnings, 1884, including Delaware and Raritan Canal, \$14,709,886.93; expenses railroads and canal, \$10,749,843.82; net earnings, \$3,960,043.11. Add interest from investments, \$352,177.73. Total net revenue, \$4,312,220.84. Payments; Interest on bonds, \$1,536,646.45; dividends (RR., \$1,588,710; canal, \$584,740), \$2,173,450; rentals, \$790,013.69; interest, dividends, etc., leased lines, \$102,752.50; transit duties and taxes, \$302,894.48—total, \$4,905,757.12. Net loss to lessee, \$593,636.28. Dividends paid by lessor quarterly, 2½ per cent. each, January, April, July, and October, at Philadelphia and New York.

Annual meeting, last Tuesday in May. Books do not close, but stock must have been held 20 days to be voted. Books close for dividends on the 20th days of March, June, September and December, and reopen on the first of the following months.

The $\frac{4}{2}$ per cent. bonds issued to provide means for the acquisition of additional property and the further development of the company's system of railroads, are free of national or State tax, and have the absolute guarantee of the Pennsylvania RR. Co. They are secured by a first lien on the leases held by the Pennsylvania Company of the Pittsburgh, Fort Wayne and Chicago, the Cleveland and Pittsburgh, and the Erie and Pittsburgh Rys., on the real estate of the company in Pittsburgh, Allegheny and Chicago, and on the stocks and bonds in its treasury of the par value of some \$24,000,000. The company is to purchase every year, at not above par, at least 1 per cent. of the then outstanding issue.

PHILADELPHIA AND READING RAILROAD.

Line of Road.—Philadelphia, Pa., to Mt. Carbon, Pa. 98.4 miles.
Branch lines owned by the company. 228.6 miles.
Branch lines leased by the company. 1,154.7 miles.
Branch lines controlled by the company. 106.6 miles.

Total length of all lines owned, leased, and controlled. 1,588.3 miles.
Gauge, 4 ft. 8½ in. Rail (steel, 951.65 miles), 56, 58, 60, 64, 68, 70 and 88 lbs.

Chartered April 4, 1833; work begun in the spring of 1835, and portions of the line opened in July, 1838. By Act of March 20, 1838, authority was given to extend the road to Mount Carbon or to Pottsville, one mile above Mount Carbon. As these two points were already connected by the Mount Carbon RR. it was decided to extend the road to connect with that line. The Mount Carbon RR., May 13, 1872, was merged into and became a part of the main line of this road. The first through trains between Philadelphia and Pottsville were run in January, 1842.

The branch from the Falls of the Schuylkill to Port Richmond, from which the shipments of coal are made, was completed in 1842. In 1850 the company bought improvements extending from Broad and Vine Streets, in Philadelphia, to and including the inclined plane on the west of the Schuylkill and the Columbia Bridge over the river. In 1858 the Lebanon Valley RR., extending from Reading to Harrisburg, was merged into the main line; and since that time the Mahanoy and Shamokin, the Lebanon and Tremont, the Northern Liberties and Penn Township, the Port Kennedy, the Schuylkill and Susquehanna, the Mount Carbon, the Moselem, and the West Reading Branch RRs. have been consolidated in the company's lines, and are now treated as portions of the road proper.

The chief business of the company is the transportation of coal from the first and second anthracite coal-fields of Pennsylvania to tidewater in the Delaware River, at Port Richmond, Philadelphia. At this eastern terminus are 23 wharves, extending from 300 to 800 feet into the river, with trestlework and shutes, allowing a direct discharge of coal from the cars into vessels. More than 35 miles of track are distributed on the wharves of the immediate neighborhood. The main line of road winds through the Schuylkill Valley, extending numerous branches east and west into the two southern coal-fields. The Broad Mountain, dividing the two coal-fields, is crossed by the the different branches at four different points, three of which lead directly into the Mahanoy coal-field, and one into the Wisconsin Basin. The Laurel Run Improvement Co. was chartered May 18, 1871; name changed December 12,

1871, to the Philadelphia and Reading Coal and Iron Co., which was organized, under the auspices of the Railroad Company, for the purpose of purchasing and operating the coal properties with which the railroad was connected. The Philadelphia and Reading RR. Company owns all the stock in the coal company, and bonds and mortgages on the coal lands to the amount of \$39,737,965.53.

The Philadelphia and Reading RR. Co. made default on the 21st of May, 1880, in the payment of its maturing obligations, and its road and property were placed in the hands of receivers appointed by the United States Circuit Court, May 24, 1880. On the 28th of February, 1883, the company resumed control of its road and property.

In May, 1879, the Philadelphia and Reading RR. Co. took a lease for 990 years of the North Pennsylvania and the Delaware and Bound Brook Railroads, agreeing to pay an annual rental equal to the fixed charges of the companies, and annual dividends of 6 per cent. for the first two years, 7 per cent. for the next two, and 8 per cent. for the remainder of the terms.

On February 4, 1882, the New York Central and Hudson River RR. Co., the Geneva and Lyons RR. Co., the Syracuse, Geneva and Corning RR. Co., the Corning, Cowanesque and Antrim Ry. Co., the Fall Brook Coal Co. (lessee of the lines of the two companies immediately preceding), the Jersey Shore, Pine Creek and Buffalo Ry. Co., the Philadelphia and Reading RR. Co., and the Philadelphia and Reading Coal and Iron Co. entered into a contract, to endure for 900 years, providing for an interchange of through and local traffic and the formation of a through line between Philadelphia and Buffalo. See MANUALS for 1883 and 1884.

Under the terms of another contract entered into in the same year by the Philadelphia and Reading RR. Co., the Philadelphia and Reading Coal and Iron Co., the Pittsburgh, McKeesport and Youghiogheny RR. Co., the Pittsburgh and Lake Erie RR. Co., the Lake Shore and Michigan Southern Ry. Co., and the Southern Pennsylvania RR. Co., under which a line is to be constructed, placing the Philadelphia and Reading RR in connection, *via* Harrisburg, with Pittsburgh, Cleveland, Chicago, and the Lakes, the *South Pennsylvania RR.* is being constructed between Harrisburg and a point on the Pittsburgh, McKeesport and Youghiogheny RR., securing for the Philadelphia and Reading RR. the desired connection.

The entire tonnage of the recently opened *Beech Creek, Clearfield and Southwestern RR.* to Philadelphia and New York and all points south and east will be thrown upon the lines of the Philadelphia and Reading RR. Co., under a contract for 900 years, which provides for a pro-rata of joint charges between the several connecting lines.

To form a connection between the railway systems of the company on the north and those on the south of the city of Philadelphia, two lines of railway have been located, known as the Schuylkill River East Side RR. Co. and the Schuylkill River West Side RR. Co., all the stock of each of which companies is held by the Philadelphia and Reading RR. Co. When constructed these lines will serve to connect all the lines of the company running north, east, and west with those running south from Philadelphia, and afford access to the large traffic expected from the lines of the Baltimore and Ohio RR. Co. and its many connections.

On May 29, 1883, the company acquired control, by a lease for 999 years, of all the railroads and property of the *Central RR. Co. of New Jersey*, at a rental equal to its fixed charges and six per cent. upon its capital stock. (See statement on Central RR. of New Jersey, MANUAL, 1884, pages 323 to 326, for details of rental charges of this line and text of supplemental agreement made between this company and the Lehigh Coal and Navigation Co., whose line of railroad was leased to the Central RR. Co. of New Jersey.)

On April 11, 1883, the company leased for a term of 999 years, from May 1st, 1883, the *Schuylkill and Lehigh RR.*, at a rental of 4½ per cent. upon its first mortgage bonds, and 6 per cent. upon its capital stock.

In addition to its lines of railroad, the Philadelphia and Reading RR. Co. leases and operates the following canals: Schuylkill Canal, 108.23 miles—leased for 999 years from January 1, 1870; Susquehanna Canal, 45.00 miles—leased for 999 years from January 1, 1872.

Rolling Stock, November 30, 1884.—Locomotive engines—passenger and special express, 229; freight and coal, 553; shifting, 143—total, 925; also 15 not in use. Cars—passenger, 834; baggage, 105; mail and baggage, 15. Freight—platform (16-wh.), gun, 1;

house (8-wh.), 4,208; (4-wh.), 28; cattle (8-wh.), 329; gondola (8-wh.), 5,844; (4-wh.), 60; lime (8-wh.), 221; (6-wh.), 47; (4-wh.), 328; ore (8-wh.), 44; (6-wh.), 700; sand and ore (4-wh.), 329; oil (8-wh.), 298; stone (4-wh.), 122—total, 12,559. Coal (8-wh.): iron, 3; wood, 10,894; (4-wh.): iron, 925; wood, 30,679—total, 42,501. In Transportation Department 161 wrecking, crane, supply, dump and sweeping cars; for signal men, 308 cars; in Roadway Department, 994 cars—total service cars, 1,463. Total cars in use, 57,477.

In addition to its rolling stock the company owns 116 stationary steam engines for workshops, pumping, etc., 4 portable engines and 9 portable pumps, 28 snow-plows, 38 carts, wagons, and drays. 120 express wagons, 260 horses and mules, 28 extra tenders, 33 lumber and stone trucks, 7 stone crushers, 26 scows and skiffs, 3 steam pile-drivers, 3 steam drills, and 2 dredging machines.

On August 26, 1882, provision was made for an issue of \$160,000,000 5 per cent. consolidated mortgage bonds, in two series of \$80,000,000 each, \$72,942,000 of the first series to be used in retiring the entire mortgage bonds of the RR. Co. and the divisional mortgages of the Coal and Iron Co., and \$69,903,910.14 of the second series to be reserved to meet certain other obligations of the Railroad and Coal and Iron Companies. (See MANUAL for 1884).

The first series bonds have priority over the second, and run for forty years from May 1, 1882, with interest payable May and November. The second series run for fifty years from February 1, 1883, interest February and August. Interest is payable in gold in Philadelphia and New York, and in sterling at the rate of 4 shillings and 1 penny to the dollar in London.

The company holds \$5,578,000 bonds of the consolidated mortgage loan of 1871-1911 to meet the \$5,246,700 bonds issued prior to that time, and \$29,990,000 of the general mortgage loans of 1874-1903 to meet the \$28,175,000 consolidated mortgage and improvement mortgage loans.

On January 5, 1883, the company issued a circular outlining a plan for the readjustment of the affairs of the company by the exchange and conversion of junior securities. (See MANUAL for 1883, page 332.) On June 27, 1883, a second circular was issued to the effect that

"The Philadelphia and Reading RR. Co. and the Philadelphia and Reading Coal and Iron Co. will resume cash payments, at maturity, of coupons and interest upon all direct obligations or guaranties of both companies maturing on and after July 1st, 1883.

"Holders of deferred coupon dollar scrip will be entitled, on and after July 2d, 1883, to receive cash for all back interest to July 1st, 1883, inclusive, and the principal of the scrip will be stamped 'Interest paid to July 1st, 1883, and payment of principal extended, at six per cent. interest, to July 1st, 1884.'

"Holders of coupons matured prior to July 1st, 1883, upon any direct obligations of, or bonds guaranteed by, either company, will be entitled to convert the same into *first series five per cent. consolidated mortgage bonds* of the Philadelphia and Reading RR. Co. at par." See MANUAL for 1884, page 314, for table showing the extent to which outstanding obligations of the Company had been funded into new securities, under the above circulars, to November 30, 1883. During the past fiscal year but small amounts of the new securities were issued.

In addition to the old obligations so funded into the new, the managers had bought for the company, on November 30, 1883, the following overdue obligations, viz.: Deferred coupon dollar scrip, etc., \$834,035; general mortgage and Perkiomen sterling scrip, \$652,050; income mortgage bonds, \$240,000; total, \$1,716,085. To supply the additional means, over earnings, required for the purchase of the above securities: for the completion of the Shamokin, Sunbury and Lewisburg RR., \$1,751,000; for the purchase of additional coal lands and collieries, and for the construction of engines and cars by the Coal and Iron Company, about \$1,200,000; for payment on account of purchase of Central RR. Co. of New Jersey stock, hereafter referred to, say, \$510,000; and for other capital accounts, the floating debt was increased, the managers believing that it was better to make temporary loans at six per cent. interest, than to sell at the then market prices the balance of the Convertible Adjustment scrip, or the unissued income mortgage bonds, or any other funded obligations, the sale of which would involve the payment of a higher rate of interest for any great length of time.

GENERAL REMARKS PERTAINING TO FLOATING DEBT, RECEIVERSHIP, DEFAULTS, AND PROPOSED SCHEME OF REORGANIZATION.

The following statement shows the floating debt and current liabilities of the two companies, on November 30, 1884, compared with 1883:

The above statement of the debt of the Reading RR. Co. for 1883 included its liability on 50,100 shares of the stock of the Central RR. Co. of N. J., which was purchased at a cost of (average, \$78.05 per share) \$3,910,776. Of this there had been paid previous to January 1, 1884, \$450,465, leaving a balance due of \$3,460,311. The stock was carried for the company by various parties in Philadelphia and New York. In consequence of the financial embarrassments that occurred in the early part of the year, this company was called upon to pay the sums due upon the said stock, and the management secured a temporary loan to the amount of \$3,263,885.20, upon the security of said shares and other collaterals. The parties so advancing the money carried the stock until in consequence of the inability of the company or the receivers to repay the loan, they caused 49,100 shares of the stock to be sold at an average price of \$55.95 per share, in all \$2,747,967.40. Expenditures on the capital accounts of the two companies and losses in operation led to an additional increase of the floating debt. The expenditures made and losses so sustained, as well as the principal items which contributed to such increase, may be thus summarized:

1. Loss in operating P. & R. RR. fiscal year 1883-84, after charging up all fixed charges.....	\$1,060,656
2. Loss in operating P. & R. C. & I. Co. fiscal year 1883-84, after charging up all fixed charges.....	800,363

"The expenditures on account of the Central Railroad Company arose under the terms of the lease. For such expenditures the Reading Company is entitled, at its election, to receive stock or bonds of the said company. The said company has been notified of the election of the Reading Company to receive the bonds of the former company in payment of the same. The Reading Company was, on December 1, 1884, entitled to bonds on the above account to the amount of \$1,516,411, it having received during the year 1883 bonds for \$600,000 on account of similar character of expenditures made by it during that year.

"To the extent that these obligations are issued to the Reading Company to replace obligations paid by the said company, there will be no increase in the fixed charges assumed by the company under the terms of the lease.

"Assuming that the lines named are to be placed under the system of the Central Railroad of New Jersey, the Reading Company is also entitled to be reimbursed for its expenditures on account of the Williamstown Railroad and the Philadelphia and Atlantic City Railroad.

"The losses sustained upon the Reading and Central systems, respectively, were mainly due to the unsettled state of the coal trade during the year. The coal trade is subject to periodical depressions, as will be seen by a glance at the table (page 312) showing the number of days during which the Reading's collieries were worked during the last seven years and the quantity of coal mined therefrom.

"This is shown, too, in the falling off of the coal tonnage in such years of depression. Thus in 1878 the Reading and Central Companies together fell 2,724,000 tons behind the tonnage of 1877; in 1880 they fell 1,863,000 tons behind the tonnage of 1879; while in 1884 they fell 1,433,166.08 tons behind the tonnage of 1883, which was a year of exceeding prosperity to the companies.

"It cannot be denied that the system of mining coal under which this company has been operated, in consequence of its relations to other mining companies, for several years, for various reasons, has deprived it of its proper share of the coal output. It is believed that under amicable arrangements with rival companies its proper share of tonnage can be alone secured by such arrangement as will give to the companies a fixed proportion of the total output, thereby enabling this company to reduce the number of its collieries and concentrate its operations at the most profitable, working them full-handed all the time. By doing this the expense of mining can be decreased so as to render this branch of the company's business a source of revenue instead of outlay."

"From the preceding review of the business of the companies during the year, the difficulties which beset the management, prior to the appointment of the receivers, will be readily apparent.

"With the floating debt necessarily increasing, and the market value of the company's securities falling, by reason of the financial crisis, and the inability of the company to meet promptly the demands upon it for new work, materials and wages, it became manifest that the appointment of receivers, who, under the direction of the court, should manage the business of the companies and preserve intact their properties until a plan for their relief should be formulated, was absolutely necessary.

"This step, however, was not taken while a single resource was left to the company, and not until after the managers, from their personal funds, had aided the company in meeting some of its pressing demands."

On the 2d of June, 1884, in view of the company's inability to meet its maturing obligations, consisting of interest due June 1st, on the consolidated mortgage loan of 1911 and the income mortgage loan of 1896, application was made for the appointment of receivers for the road and property of the company, and on the same day the Circuit Court of the United States at Philadelphia appointed Edwin M. Lewis (since deceased), George de B. Keim and Stephen Caldwell co-receivers. Meantime under arrangements perfected with Messrs. Drexel, Morgan & Co., the coupons on the consolidated mortgage bonds were purchased for account of the company. On June 17, 1884, the receivers were authorized to borrow not exceeding \$2,000,000 with which to retire these coupons and to pay off wages, etc., and to issue certificates to an amount corresponding to the sum borrowed, the same to bear interest at the

rate of 6 per cent. on amounts issued in payment of wages and 5 per cent. when issued in settlement of coupons. Authority was also granted to issue \$1,000,000 additional certificates, bearing 4 per cent. interest, with which to pay claims for materials, supplies, etc., furnished since April 1, 1884.

On July 1, 1884, the coupons on the general mortgage loan were provided for in the same manner as consolidated mortgage interest mentioned above, and interest on general mortgage scrip and Perkiomen scrip was paid from funds in hands of receivers. Interest then due on all junior obligations was defaulted. On the first of August default was made in payment of interest on second series consolidated fives; November 1, on first series consolidated fives. The interest due on Schuylkill Navigation improvement, boat and car loans was purchased by receivers at rate of five per cent. per annum. Coupon and registered interest of December 1st on consolidated mortgage bonds was provided for by purchase. Payment of interest on first mortgage sixes, general mortgage, and Perkiomen £ scrip and on American Dock and Improvement Company's (C. RR. of N. J.) bonds was made January 1, 1885; and coupons on Jersey Central consolidated loan were provided for by purchase. On all other interest maturing on that date default was made, the chief item of default being on the general mortgage 6 and 7 per cent. bonds. On Jan. 3, 1885, a bill for the foreclosure of this latter mortgage was filed by a bondholder, and since then the history of the company has been created almost wholly in the courts.

On January 30, 1885, the court ordered that receivers pay out no money without a special order providing for the same, except for running expenses, repairs, etc. Subsequently authority was granted for the payment of amounts due on car trust of 1883, such payments aggregating \$274,000; and to pay interest on floating debt subject to certain conditions. On March 15, 1885, the accruing payments on the car trust of 1883 were promptly met, and on April 1, 1884, the interest then due on the company's own obligations was paid under authority of the court. The net earnings of the Central RR. of New Jersey are now being paid to that company on account of rental.

The amounts advanced on account of June, 1884, consolidated mortgage interest and July, 1884, general mortgage interest have since been repaid.

On December 22, 1884, a committee was appointed by the bondholders to prepare a plan for the reorganization of the affairs of the two companies. At the annual meeting January 12, 1885, this committee submitted a plan of reorganization, which provided substantially for a reduction of the interest on a portion of the divisional coal and iron mortgage bonds; to defer for three years one-half the interest on the general mortgage bonds; to reduce the rentals payable to the Schuylkill Navigation and Susquehanna Canal Companies and some of the minor branch roads; to refund the junior securities into income mortgage bonds; to pay the Jersey Central whatever it earns, and to defer the funding of the floating debt until after the other provisions of the scheme have been carried out. At the time of preparing this statement this reorganization had not been carried out.

"The protection of the collaterals pledged for the company's indebtedness from sacrifice has engaged much of the attention of the managers, and since their appointment, of the receivers. The amount of their collateral securities, at their par value, so pledged, on November 30th, 1884, was about \$34,000,000.

"So successful were these efforts, made under the greatest difficulties, that except in the case of the New Jersey Central stock loan, not over one hundred and ten thousand dollars of these securities were disposed of by the holders thereof during the entire year.

"Prior to the appointment of the receivers in June, 1884, the Coal and Iron Company had constructed for the railroad company locomotive engines, passenger, freight, and coal cars to the value of \$1,138,592. These were sold to the Union Trust Company of Philadelphia and a car trust created by that company, whereby the cars were leased to the Reading RR. Co. The trust certificates are payable in ten annual instalments, and upon compliance with the terms of the trust the cars will become the absolute property of the railroad company."

PHILADELPHIA AND READING COAL AND IRON CO.

There are now on the lands of the Philadelphia and Reading Coal and Iron Company 69 collieries, exclusive of the small operators. Of these 48 have been worked by the Co., 9 have been leased, and 12 temporarily abandoned or under repairs. The company also worked 14 leased collieries. The tonnage was as follows:

Mined by company from lands owned and controlled.....	3,928,112 00
Mined by company from lands leased.....	997,875 04

Total tonnage mined by the company.....	4,925,987 04
---	--------------

Mined by tenants from land owned and controlled by company.....	746,697 06
---	------------

Total tonnage mined by company and others.....	5,672,684 10
--	--------------

The cost per ton of mining coal in 1884 was 147.8 cents, a decrease of 1.7 as compared with the cost of previous year. The collieries were worked 191.5 days, as compared with 227.5 in 1883, 205.6 in 1882, 198.3 in 1881, 173.9 in 1880, 243.5 in 1879, and 167.7 days in 1878.

During the year there was expended in improvements, such as breakers, machinery, etc., the sum of \$962,606.90, equal to 19.5 cents per ton upon the shipments of the year.

The iron-ore mines have been idle during the year, excepting the Cumberland Ore Banks, which have been worked 70 $\frac{8}{10}$ days.

The repair shops at Pottsville produced during the year 12,975,692 lbs. iron castings; 2,563,135 lbs. iron forgings; 658,307 lbs. boiler work; 167,889 lbs. brass castings; 204 new steam boilers; 474 new mine cars, 19 new mine cages, 33 steam pumps, and 10 ventilating fans.

The Reading shops produced during the year 22,735,055 lbs. iron castings; 3,131,667 lbs. iron forgings; 521,407 lbs. brass castings; 150,685 lbs. white-metal castings; 22 locomotives built, 3 extra class I tenders built, 1 locomotive rebuilt, 331 locomotives repaired; 3 twelve-wheeled parlor cars, 29 eight-wheeled passenger cars, 13 eight-wheeled 1st class combination cars, 2 eight-wheeled double crane wreck cars, 12 eight-wheeled refrigerator cars, 2 eight-wheeled carriage cars, 7 eight-wheeled merchandise cars, 6 six-wheeled merchandise cars, 5 four-wheeled merchandise cars, 701 eight-wheeled coal cars, and 1 four-wheeled coal car built; 435 eight-wheeled passenger, 5,058 eight-wheeled, 1 sixteen-wheeled, 117 six-wheeled, and 217 four-wheeled merchandise; and 446 eight-wheeled, and 119 four-wheeled coal cars repaired.

CENTRAL RAILROAD OF NEW JERSEY.—*Main Line*, Jersey City, N. J., to Phillipsburg, N. J., 72.30 miles; *Newark Branch*, Communipaw, N. J., to Newark, N. J., 6.1 miles; *Newark and Elizabeth Branch*, Elizabethport to Brills, N. J., 5.5 miles; *Elizabethport Loop Branch*, Elizabeth to Elizabethport, N. J., 3 miles; *Elizabethport and Perth Amboy Branch*, Elizabethport to Perth Amboy, N. J., 11.8 miles—total length of main line and branches, 98.7 miles. 2d track, 82.70 miles; sidings, 145.80 miles—total track (steel, 211.85 miles), 327.20 miles. Gauge, 4 ft. 8½ in. Rail—iron, 56 and 65; steel, 60, 62½ and 70 lbs. The Central RR. Co. of New Jersey was formed by the consolidation (February 22, 1849) of the Elizabeth and Somerville and the Somerville and Easton RR. Companies. Road opened to Phillipsburg, July 2, 1852. Line extended to Jersey City in 1864. Branch from Elizabeth to Newark opened in 1872. The Newark and New York RR. was opened August 1, 1869. In addition to its own lines as above, the company controlled through lease or otherwise the roads named on page 323 of MANUAL for 1884, the total length of which aggregated 650.-23 miles.

On the 29th of May, 1883, all of the lines owned and controlled as above were leased to the Philadelphia and Reading RR. Co. for a period of 999 years from June 1, 1883. Under the provisions of this lease the Philadelphia and Reading RR. Co. guarantees 6 per cent. on the capital stock of the Central Railway Company, and assumes all of the latter's interest and rental obligations, as shown in MANUAL for 1884, page 323.

In addition to the above, the company is also liable for the rental accruing under the leases of the Toms River and Waretown RR., the West End RR., and the Lehigh Coal and Navigation Co., controlling the Lehigh and Susquehanna and other railroads. Subsequent to the lease entered into as above, the Lehigh Coal and Navigation Co., the Central RR. Co. of New Jersey, and the Philadelphia and Reading RR. Co. entered into an agreement, the terms of which are as follows: The Philadelphia and Reading takes a lease of the Lehigh and Susquehanna RR. at a minimum rental of \$1,414,400, and a maximum of \$1,728,700 for any year prior to 1888; \$1,885,800 for any year from 1888 until 1893; and \$2,043,000 for any year thereafter.

The Central RR. Co. of New Jersey refused to furnish any information whatever. It was reported that shortly after making the lease the Philadelphia and Reading RR. Co. deposited with Receiver Little, to secure the floating debt of the Central Company, \$1,000,000 of its own first series new consolidated bonds and \$2,000,000 of the second series. Since the date of above balance sheet the company has made an issue of \$5,000,000 6 per cent. 20-year convertible debenture bonds, interest payable semi-annually, May 1 and November 1, in New York or London. These bonds are convertible into stock at any time after January 1, 1885, and until January 1, 1907. Of the amount provided, \$2,640,000 were issued in exchange for the outstanding income bonds (\$2,400,000) at the rate of 110 per cent. of their par value, under an agreement arrived at some time previously, whereby these bonds were to be exchanged at an advance of 10½ per cent., such advance being in lieu of all claims of income bondholders for past interest. The one half per cent. was paid in cash. The remaining \$2,360,000 after the above issue are to be used in paying floating debt, and for betterments, etc.

Statement of funded debt in detail, December 31, 1882 (latest furnished):

LEHIGH AND SUSQUEHANNA RAILROAD (THE LEHIGH COAL AND NAVIGATION Co.).—The main line of this road runs from Phillipsburg, N. J., to Union Junction, Pa., 105 miles. Branches—*Nescopee*, Nesopec Junction to Upper Lehigh, 10; *Nanticoke*, Ashley to Collieries, 20.80; *Drifton*, Leslie's Run to Drifton, 10.80; *Ashley Planes*, Solomon's Gap to Ashley, 3; *Lee*, Lee Station to Nanticoke, 2; *Pond Creek*, Sandy Run to Nescopee, 2.40; *Laubachs*, 0.80; *South Bethlehem*, 0.25—total, 50.05 miles. Leased Lines—*Nesquehoning Valley RR.*, 16.50; *Tresckow RR.*, 7.20; *Spring Brook RR.*, 10.20—total, 35.02 miles. Total length of road owned and leased, 190.07 miles. 2d track, 57; sidings, 84.7 miles. Gauge, 4 ft. 8½ in. Rail (steel, 219 miles), 60 and 62½ lbs.

These roads are the property of the Lehigh Coal and Navigation Co., chartered February 13, 1822. In 1827 this company built the Mauch Chunk (gravity) RR., and in 1831 the gravity road to the Room Run Mines. The Lehigh and Susquehanna was commenced in 1837, and opened from White Haven to Wilkesbarre in 1841. The first anthracite coal, the product of this company's mines, 365 tons, was sent to market in 1820. The extension to Phillipsburg was completed in August, 1868. The railroad was leased for 999 years from March 31, 1871, to the Central RR. Co. of New Jersey, at an annual rental of 33½ per cent. of the gross earnings.

During the past year the company constructed a link of 3½ miles, connecting the Nesquehoning Valley RR. with the East Mahonoy road, at a cost of \$58,000.

On the 29th of May, 1883, the Lehigh Coal and Navigation Company, owner of this road, entered into an agreement with the Central RR. Co. of New Jersey, lessee of its railroad, and the Philadelphia and Reading RR. Co., which had on the same day taken a lease of all the lines owned and controlled by the Central RR. Co. of New Jersey, the object being to secure a proper guarantee of this company's interest. For the terms of this agreement see MANUAL of 1884, p. 326.

Consolidation, February 5, 1838, of the Philadelphia and Delaware County, chartered in Pennsylvania April 2, 1831; the Wilmington and Susquehanna, chartered in Delaware January 18, 1832; the Delaware and Maryland, chartered in Maryland March 14, 1832; and the Baltimore and the Port Deposit, chartered March 7, 1832. The line was completed in July, 1837; the viaduct over the Schuylkill in 1838. The whole cost at the close of 1838 was \$4,185,511.

The New Castle Branch forms a link between the main line and the Delaware Railroad. It originally consisted of two lines, the New Castle and Frenchtown, chartered February 7, 1829, and opened in 1832, and the New Castle and Wilmington, chartered February 19, 1839, and opened in 1854. Both these roads were purchased by the P., W. & B. RR. Co. (the first in 1840, the latter in 1876), but were operated separately up to the close of 1875-6. The Delaware Railroad is operated under lease to terminate May 4, 1897. The Queen Anne and Kent, the Delaware and Chesapeake, the Philadelphia and Baltimore Central, and the Cambridge and Seaford Railroads are operated by this company as their agent. In 1881 the Pennsylvania RR. Company purchased a controlling interest in the Philadelphia, Wilmington and Baltimore RR. Company. Late in the same year the Philadelphia, Wilmington and Baltimore RR. Co. purchased all that portion of the Newark and Delaware City RR. which lies southerly of its main line for \$50,000, and that road is now operated as its Newark and Delaware City Branch.

In 1883 the Dorchester and Delaware RR. was purchased at foreclosure sale and reorganized under the name of the Cambridge and Seaford. It is now operated in connection with the Delaware Division. The lines are operated by divisions, as follows: Main line, Brandywine Branch, New Castle Branches and Newark and Delaware City RR., comprising the

* The train mileage of the New Castle Branch, which is operated in connection with main line, is included in figures given above for Delaware Division.

† The statements of passengers and tons of freight moved are given as they appear in the company's report. It will be observed that the total of the numbers credited to each division is in excess of the number given in the "Total" column. This is probably due to transfer passengers and freight being credited in full to each division over which they passed. The mileage of passengers and freight, and the total number of each moved, given in "Total" column, are correct.

Maryland Division; Delaware RR., Queen Anne and Kent RR., Delaware and Chesapeake Ry. and Cambridge and Seaford RR., comprising the Delaware Division; and the Philadelphia and Baltimore Central RR., operated as the Central Division. Sidings, etc., 25.1 miles. Gauges, 3 ft. and 4 ft. 8½ in. Rail (steel, 167.4 miles), 35 to 60 lbs.

Consolidation, September 25, 1883 of the Pittsburgh and Western RR. Co. (See MANUAL for 1884, page 341), and the Pittsburgh, Bradford and Buffalo Ry. Co. (See MANUAL for 1884, page 366).

The Northern Division of this road is narrow gauge, and the main line standard gauge.

The section from Callery Junction to Butler, 14.6 miles, is of both gauges, a third rail being laid for the accommodation of the narrow-gauge cars. At Allegheny the company owns terminal yards extending from Pine Creek to Jack's Run, a distance of about 7 miles, covering the entire river frontage of Allegheny City. The company acquired during the year 1882 one quarter interest in the Pittsburgh, Cleveland and Toledo RR., then under construction, and since the completion of that line has largely increased its ownership. On July 15, 1884, that road passed under the control of this company under lease for 99 years, the lessee guaranteeing the payment of interest on \$2,400,000 first mortgage bonds of that company. Subsequently the Baltimore and Ohio RR. Co. entered into an agreement with the lessee to guarantee the interest on the Pittsburgh, Cleveland and Toledo bonds, in consideration of the Pittsburgh and Western transferring to it 15,000 shares of the lessor company's stock, and binding itself to pay into the Central Trust Co. of New York, \$12,000 monthly on account of rental, default to entail a forfeiture of the lease, etc., to the Baltimore and Ohio RR. Co. On March 23, 1885, on the application of mortgage trustees, the Pittsburgh and Western RR. Co. was placed in the hands of receivers, whose authority was subsequently extended over the leased line. On the first of April, following, default was made in payment of Pittsburgh, Bradford and Buffalo bonds. Subsequently the receivers were authorized to borrow \$210,000 to pay off amounts due for wages, etc., and to issue therefor receiver's certificates bearing not more than six per cent. interest.

Rolling Stock, November 30, 1884.—Locomotive engines, 32. Cars—passenger, 35; baggage, 14; freight, 817; also one-third interest in 1,000 (or 334) Pittsburgh and Toledo Dispatch cars—total cars, 1,200.

Operations for year ending November 30, 1884.—Train service, passenger and freight movement, not reported. Earnings—passenger, \$178,047.61; freight, \$464,061.23; mail, express, etc., \$42,926.24—total (\$2,897.78 per mile), \$685,035.08. Expenses—maintenance of way, \$83,590.85; rolling stock, \$67,537.68; transportation, taxes, etc., \$333,685.49—total (\$2,050.82 per mile), \$484,814.02. Net earnings (29.23 per cent.), \$200,221.06.

Total length of lines operated.....76.4 miles.

Sidings, etc. (owned), 16.3 miles. Gauge, 4 ft. 8½ in. Rail (steel, 30.9 miles), 60 lbs.

Chartered March 20, 1865, under name of Bear Creek RR. Co.; present name adopted April 9, 1867. Road opened from Shenango to Pardoe, in 1870; to Harrisville, in 1872; to Hilliard, in January, 1876, and from Shenango to Greenville, in March, 1882. The Shenango and Allegheny RR. is operated in connection with the Mercer Mining and Manufacturing Co., which owns mining rights in 46,000 acres of coal lands located along the line of the railroad. The greater part of the capital stocks of both companies is owned in England, and the shares are deposited with trustees, Henry W. Tyler and Charles L. Young, for the purpose of keeping both properties under the same management and subject to the same control. The deficit in the railroad company's operations is ordinarily more than provided for out of the earnings of the coal company. With a view of reorganizing the affairs of both the railway and coal companies, Thomas P. Fowler was appointed receiver of both on the 15th of March, 1884, by the U. S. Circuit Court for the Western District of Pennsylvania, on the application of the English trustees.

Total length of lines owned, leased and operated. 1,711.25 miles.
Gauge, 4 feet 8½ inches. Rail—iron, 60 to 80 lbs., steel, 67 lbs.

The Baltimore and Ohio Railroad Company, was chartered in Maryland, February 28, 1827, and in Virginia, March 8, 1827. By the charter its capital stock was placed at \$5,000,000, with the right to organize on the subscription of one-fifth that amount. In the following April, the required subscription having been obtained, the company was organized and the surveys of the route at once undertaken. On the 4th of July, 1828, the road having been finally located to Point of Rocks, the construction of the road was begun with considerable ceremony. The progress of construction of the road is shown in the following statement:

The first section of road on its opening was operated by horse power. On August 30, 1830, steam power was substituted.

The Washington Branch RR. was opened August 25, 1834, and the Parkersburg Branch RR. (under the name of the Northwestern Virginia RR.), May 1, 1857. Both are substantially owned by the Baltimore and Ohio Company. The Locust Point branch, was completed about 1846; the Camden Cut-off in 1868; the Frederick City branch in 1831; the Metropolitan branch, May 28, 1873; and the Curtis Bay branch in 1883.

In 1866 the company leased the Central Ohio RR.; in January, 1871, it was connected with the main stem by completion of the bridge over the Ohio River at Benwood. In June, 1871, a second bridge over the Ohio River was completed so as to secure connection with the Marietta and Cincinnati (now Cincinnati, Washington and Baltimore) RR. with which traffic arrangements had been perfected some time previously. The various other lines are leased or controlled under terms given in their respective statements.

In addition to the above are (£1,600,000) \$7,744,000 five per cent. sterling bonds, 1877-1927, interest payable June and December, secured by similar amount of mortgage bonds of the B. & O. & C. RR. Cos., of the same date, bearing 6 per cent. interest, and placed in the hands of trustees. Also; \$3,000,000 six per cent. bonds 1879-1919, interest April and October, secured by same amount of 1st mortgage bonds of Parkersburg Branch RR. Co. of same date, bearing 6 per cent. interest, and placed in hands of trustees. The Baltimore and Ohio RR. Co. issued in April, 1883, sterling bonds of £200 each to the amount of £2,400,000, bearing 4½ per cent. interest payable semi-annually, April and October, free of all taxes, principal payable April 1, 1933. These bonds are a direct obligation of the Baltimore and Ohio RR. Co., and are specially secured by a pledge of all the first mortgage bonds of the Baltimore and Philadelphia RR.,

amounting to £1,000,000, and by a first mortgage on the Baltimore and Ohio Company's Philadelphia branch. The bonds of this issue do not appear in above statement.

The payments during the year for investments on account of the Sinking Funds for the redemption of the Sterling Loans due in 1895, 1902, 1910 and 1927, amounted to \$630,328.82, which at \$4.84 per pound sterling make £130,233 4s 5d.

In accordance with the agreement with the City of Baltimore, the ninth annual payment, namely, \$40,000 of the principal of the bond for one million dollars given for the purchase of the interest of the City in the Pittsburgh and Connellsville Railroad Company has been made, thus reducing this obligation to \$640,000.

Since the close of the fiscal year the company has issued and sold \$10,000,000 5 per cent. 40-year gold bonds, secured by pledge of an equal amount of Pittsburgh and Connellsville RR. 2d consolidated mortgage bonds, and also by the stocks of the Pittsburgh division branch lines, and on the terminal property in Pittsburgh.

IMPROVEMENTS, BETTERMENTS, ADDITIONS, Etc.

All the tracks of the main stem and of nearly all the branches east of the Ohio River are now laid with steel rails. The increased cost of steel substituted for iron rails has been uniformly charged to repair account. The condition of the road bed, tracks and engines has been maintained at a high standard. A new passenger car shop, circular in form, has been erected at Mount Clare. It was finished in February last [1884], and cost \$100,471.57. The company also purchased from the Buckeye Car Manufacturing Co. the car works at Columbus, Ohio, covered in, with the subsequent additional purchases, 25 acres. The entire cost, with some improvements added since the date of purchase, has been \$88,673.34.

During the year there were added to the company's equipment, at an aggregate cost of \$2,274,277.59, 40 locomotive engines (13 consolidation freight, each weighing 107,250 pounds; 19 mogul freight, of 98,000 pounds each, the latter for the Trans-Ohio Divisions; 8 for passenger service, weighing 91,000 pounds each) and 4,048 cars, of which 366 were built to replace that number worn out and destroyed, 3,186 were built new at Mount Clare and other shops, and 466 were purchased. The cars thus built, rebuilt and purchased include 30 8-wheel passenger, 1 officers', 7 baggage, 5 express, 1,606 house, 1,082 iron coal, 871 gondola, 312 stock, 66 flat bottom, 38 caboose, 22 side dump, 3 dump, 2 riggers, 1 refrigerator, 1 derrick, and 1 camp. All the freight and iron coal cars are eight-wheeled, and have a capacity of 40,000 pounds, being nearly double that of the cars formerly used in the service. 513 cars have received thorough repairs, 293 have been repainted, the capacity of 177 has been increased from 26,000 to 40,000 pounds, and 40 house cars have been arranged for ventilation. The cost of these repairs and improvements was \$187,660.94.

New Line Between Baltimore and Philadelphia.—The Baltimore and Ohio Railroad Company, under resolutions adopted unanimously by the stockholders, is building the Philadelphia Branch, from a point of connection with its main stem to the northern boundary line of Cecil County, in the State of Maryland, where it connects with the road which the Baltimore and Philadelphia Railroad Company is constructing through Delaware by way of Wilmington and into the City of Philadelphia, and which is being built under a contract which secures to the Baltimore and Ohio Co. all the 1st mortgage bonds of the Baltimore and Philadelphia Co. These bonds, with other securities, have been placed in trust to secure a loan of \$2,400,000, payable in 1893, interest 4 1/2 per cent. per annum, semi-annually at London, issued for the construction of the line between Baltimore and Philadelphia. Work has progressed rapidly during the year, and it is expected that the entire road will be in operation shortly. The bridge spanning the Susquehanna River will be 6,346 feet in length, 94 feet above mean low tide, and will rest on 11 granite piers (having their foundations on the bed rock of the river), of from 116 to 179 feet in height, with an area of 12 x 35 feet at the top. Large and substantial starlings, or ice-breakers, have been added to the general dimensions of the water piers. Much of the masonry for the foundations and piers has been placed, and all will be finished about the time the superstructure is ready. The superstructure will be of steel. It has been let to the Keystone Bridge Company for delivery and erection in the early spring (1885), and will consist of seven deck and two through spans. The lengths of the deck spans will be: one of 520 feet, four of 480 feet each, one of 375 feet, and one of 200 feet. The two through spans will be 520 and 375 feet respectively. There will be 2,288 feet of iron viaduct, averaging 67 feet in height, for the construction of which, in the shops of the company, arrangements have been made. All the other bridges on the line between Baltimore and Philadelphia will be of iron, and will be built at the shops of the company.

Telegraph, Express and Sleeping and Parlor Car Organizations.—The policy of the company in owning and operating its expresses, telegraphs, sleeping and parlor cars, elevators, etc., continues satisfactory. The telegraph system of the company, now entirely under its own control, represents 5,886 miles of poles, and 47,417 miles of wires, in the acquisition of which there has been expended, during the fiscal year \$2,012,000. The expenditures for the past year were made at a time when, it is claimed, material was obtained at a reduction of at least 15 per cent. below the lowest prices at which any lines were ever constructed in this country. Since the company commenced its own commercial system in 1877, its telegraph expenses, incident to its railroad business, have been reduced fully forty-three and one-half per cent., whilst its receipts from railroad business have increased fifty per cent. It is believed when the system of telegraphs created by the Baltimore and Ohio Company has been perfected, that the operating expenses of the Telegraph Department for railroad business will be further reduced.

The bonds and stock of the Baltimore and Ohio Telegraph Company, a separate corporate organization, are to be issued to the railroad company for the advances of the latter in the construction of the telegraph lines.

South Branch Railway.—Under contracts entered into on the 1st day of September, 1883, between the County Court of Hampshire County, West Virginia, and this company, and on the 12th day of October, 1883, between this company and the South Branch Railway Company, the South Branch Road has been completed and is now in operation from Green Spring (164 miles from Baltimore) to Romney, a distance of 16 miles. This line reaches the fertile valley of the South Branch of the Potomac, and opens up vast tracts of timber land. It will be an important feeder to the main line, and will also enable this company to satisfactorily handle the large cattle shipments from the Moorefield Valley.

Fairmont, Morgantown and Pittsburgh Railroad.—The Baltimore and Ohio Company is furnishing to this Company the necessary capital for the construction of its line from Fairmont, W. Va., by way of Morgantown, to the Pennsylvania State line, a distance of 34 miles, at which point it is expected to join the State Line Railroad for Uniontown, Pa., thus forming a direct connection between the Main Line and the Pittsburgh Division, via the Monongahela Valley. Construction was commenced in April last, and to September 30, 1884, the sum of \$153,104.57 had been expended. The road, including a bridge over the Monongahela River, will be completed and ready for operation in the coming spring [1885].

Valley Railroad of Virginia.—This road was completed to Lexington, November 1, 1883. Notwithstanding the general depression in the iron and coke industries, the net income of the Valley RR. was \$43,715.62 for the

past year, its fixed charges being \$45,000 per year. These results are for a period of but 11 months, thus making it reasonably certain that the road will have, during the coming year, a surplus beyond its fixed charges.

Ohio and Baltimore Short Line.—Contracts have been made for the tunnels and other portions of the heavy work on the Ohio and Baltimore Short Line, with the view of letting the lighter work at such future period as will secure the simultaneous completion of the entire road between Connellsville and Washington, Pa., a distance of 45 miles.

Pittsburgh Southern Railroad.—The Pittsburgh Southern Railroad, which was opened for traffic in August, 1883, has been placed in thorough order, and notwithstanding the depressed condition of the iron and coke industries, the business has developed to such an extent as to require the construction of a bridge over the Monongahela River at Glenwood, thus dispensing with the ferry at that point. The bridge is 3,100 feet in length, and the iron superstructure has been constructed at the Mount Clare shops of the company. A connection has been made between the Pittsburgh Southern Road and the Ohio and Baltimore Short Line at Zediker, 4 miles east of Washington, Pa., in order to shorten the distance and avoid the heavy grade and sharp curvature of the Pittsburgh Southern near Washington, as well as to utilize the superior location of the Ohio and Baltimore Short Line through Brady's tunnel.

Pittsburgh Junction, Pittsburgh and Western, and Pittsburgh, Cleveland and Toledo Railroads.—During the year the Pittsburgh Junction Road, which is controlled by this company and its allied interests, and which connects at Pittsburgh with the Pittsburgh Division, has been completed through that city by tunnel and elevated road, and thence by bridge over the Allegheny River to a junction with the Pittsburgh and Western RR. It has been built in the most permanent and substantial manner, with double track throughout. The extension of its branches is being rapidly prosecuted to the numerous manufactories along the Allegheny River front in Pittsburgh. The Pittsburgh and Western Railroad Company has leased the Pittsburgh, Cleveland and Toledo Railroad. Satisfactory relations have been established between this company and those interests, enabling it to form a most favorable route to Akron, Ohio, to the lakes at Cleveland, and to the great manufacturing districts of the Mahoning and Shenango Valleys.

Columbus and Cincinnati Midland Railroad.—This important road is 71 miles in length, is controlled by cooperative and friendly interests, and was completed and opened for traffic in November, 1884. It extends from Columbus, Ohio, through Washington Court House to Clinton Valley, on the Cincinnati, Washington and Baltimore road. It will be operated in connection with the Central Ohio, the Ohio and Baltimore Short Line, and the Pittsburgh Southern road, making a direct route for passengers and freight between Pittsburgh and the Pittsburgh and Connellsville road, and the city of Cincinnati and the Southwest.

PARKERSBURG BRANCH RAILROAD.—Grafton (294 m. west Balt.), W. Va., to Parkersburg, W. Va., 104 miles; total track (steel, 104 m.), 133 miles. Chartered as North-western Virginia, February 14, 1851, and road opened May 1, 1857. It was mainly built by the Baltimore and Ohio RR. Co., and has always been operated by them, leaving to the company simply a nominal existence. In year 1883-84 (including bridge, 105.40 m.)—Engine service, 1,025,617 miles. Gross earnings—passenger, \$213,995.02, and tonnage, \$429,168.54; total (\$6,102.12 p. m.), \$643,163.56. Operating expenses (77.96 per cent.) \$501,440.42. CUMBERLAND AND PENNSYLVANIA RAILROAD.

Line of Road.—Cumberland, Md., to Piedmont, W. Va. (and branches).....38 miles.
 Branches: { *Eckhart*: Junction to Eckhart.....14 miles.
 { *State Line*: C. & P. Junction to Pennsylvania State Line..... 3 miles.

Total length of railroad owned and operated.....55 miles.
 Sidings, etc., 10 miles. Gauge 4 ft. 8½ in. Rail (mostly steel), 50 to 60 lbs.

Chartered in 1850. In 1854 this company acquired the Mount Savage Iron Company's RR., extending from Cumberland to Frostburg, Md., and in 1863 the George's Creek Coal and Iron Company's RR., from Lonaconing to Piedmont, W. Va., building the link between these two roads, and forming the present main line of the Cumberland and Pennsylvania RR.

Since 1870 (when the Consolidation Coal Co. acquired the lands and railroads of the Cumberland Coal and Iron Co.) it has operated the Eckhart Branch RR., connecting the main line with its mines at Eckhart. Since 1872 it has operated the State Line Branch, which connects it with the Pennsylvania RR. system at the State Line, near Bridgeport, Pa.

Rolling Stock.—No report published.

Operations for year ending December 31, 1884.—Coal mined and delivered from the company's mines, 689,212 tons; total coal transported, 1,881,994 tons. The first coal transported from this region was in 1842, in which year 1,708 tons were marketed. Gross earnings

from RR., mines, etc., including value of coal on hand, year 1884, \$2,222,081.96. Operating expenses, \$1,904,603.10. Net earnings, \$317,478.86. Payments shown in

Total Debits.....	\$382,255 20	Total Credits.....	\$382,255 20

Surplus, December 31, 1884, \$168,720.80. Paid dividend for year 1884 (1 per cent. paid January 29, 1885), \$102,500; amount carried to credit of Royalty Fund, \$34,460.60—total, \$136,960.60. Balance to credit of Profit and Loss Account, \$31,760.20.

For the past four years the company has been accumulating a fund, which, for the first time, appears in the annual report for 1884, and is not included in any of the foregoing statements. This fund has been derived from sales of the coal under several small outlying pieces of the company's property adjoining, and sold to, companies which could more advantageously work them; and from the proceeds of some surface rights of way through the company's property. The moneys received from these sources have been placed to the credit of Royalty Fund, which, with interest, amounted, December 31, 1884, to \$72,737.38. To this has been added a royalty upon the output of 1884, as above, \$34,460.60, making total, \$107,197.98. This fund is invested in interest-bearing securities, and it is proposed to add to it hereafter, as a representative (in addition to the existing sinking fund) of the value of the coal which will be mined in future from the company's property. The company also holds as a cash asset, \$100,000 first mortgage bonds of the Cumberland and Pennsylvania RR. acquired in 1875 by the payment of \$98,600 in cash from earnings.

The following table shows the product of the whole Cumberland coal-field, and of the mines of the Consolidation Coal Company for twelve years:

The Worcester and Somerset RR. Co. was incorporated under special act of the Maryland Legislature, and built a road from Newtown Junction to Pocomoke City, Md., 9 miles. Consolidated in 1882 with the Peninsula RR. Co., chartered to build from Pocomoke, Md., to Cherrystone, Va., 60 miles, the consolidation assuming the title of Peninsula RR. Co. of Va. On September 17, 1881, the present company was chartered as successor of the Peninsula RR. Co. of Virginia. On January 1, 1884, the Eastern Shore RR., extending from Delmar, Del., to Crisfield, Md., 38 miles, was purchased and consolidated. That company was chartered March 23, 1853, and road completed by 1865. This purchase gave to the company a line extending from Delmar, Del., to Pocomoke, Md., with branch to Crisfield, in all 47 miles. The road was extended from Pocomoke, Md., to Accomac, Va., 28 miles, August 18, 1884; from Accomac to Belle Haven, Va., 14 miles, September 29, 1884; from Belle Haven to Cape Charles, Va., 23 miles, November 17, 1884. SOUTHERN MARYLAND RAILROAD. (In Progress.)

Line of Road.—Washington, D. C., to Point Lookout, Md.....77.01

Drum Bay Branch: California to Drum Bay, Md..... 2.50—79.51 miles.
 Gauge, 4 ft. 9 in. Rail, 56 lbs. per yard.

This road, upon which track is laid from Brandywine, on the Pope's Creek Branch of the Baltimore and Potomac RR., to Mechanicsville, Md., 20 miles, was chartered in 1868. It is

intended to connect the roads centering at Washington with Deep Water in the Lower Chesapeake. A branch of 3 miles will give it access to Drum Point Harbor. The funded debt consists of \$500,000 6 per cent. 30-year bonds. During 1884 three miles of additional track were laid from Benning's Station (B. & O. RR.) to the District line. This was done to save charter given by Congress allowing right of way through the District.

Rolling Stock.—Locomotive engine, 1. Platform cars, 20.
