## MILITARY POSTS AND STATIONS

There is shown below a list of military posts and stations located in the State of Michigan, but which are not post offices and consequently not carried in the scheme.

Units:

*Post-office address*

Percy Jones General Hospital-- Battle Creek, Mich.  
Veterans' Administration----- Battle Creek, Mich.

Refer to back portion of United States Postal Guide for complete list of military units in other States and United States possessions, United States national cemeteries, State homes for soldiers, and Navy Department and United States Marine Corps, with correct post-office address.

## NOTES OF EXPLANATION

1. The initial dispatch in each brace is the first after midnight, and the others follow in the consecutive order of the time of departure of trains.

2. The Chicago post office should use all dispatches in the order shown. Incoming lines should, in each instance, use the first dispatch with which connection is made, but may make exceptions in the case of paper mail of which there is not enough to make up for connections via closed pouch trains; such paper mail to be given the next dispatch with which direct connection is made.

3. The exceptions of a specific day in any dispatch refer to the day of departure of train from Chicago, and such dispatches on the day indicated should be successively passed over until the first one is found which does not except said day or in a note provides for a special dispatch on said day.

4. Package, pouch, and sack labels addressed to a railway post office should at all times show the proper train number and the point at which connection is made. Requests for credit for errors checked on slips which are not prepared in accordance with the provisions of this paragraph will not be favorably considered.

5. All routes shown in supply column are connected at the initial point of train unless otherwise specified under pouching directions.

6. Where a dispatch is shown to a line with which there is no direct connection and no pouching directions appear, the

current monthly schedule will show a closed pouch made by the Chicago post office.

7. Offices enclosed in the same brace with and indented under another office are supplied by that office and should be included with it for closed pouch dispatches, but at other times massed on connecting lines.

8. Closed pouch dispatches are made by the Chicago Terminal RPO or the Chicago Post Office, or both, and such dispatches are indicated by the words "Direct Pouch via" followed by line and train, or CP train as shown under line over which dispatch is made.

9. Only such directs are shown in the scheme as are necessitated by closed pouches or separation lists, but such others should be made as case room will permit and the character and quantity of the mail worked will warrant. As a partial guide for making directs, note the following cities:

#### SCHEME CORRECTIONS

1. In published scheme corrections care must be taken to distinguish between dispatches and notes.

2. Dispatches are shown in large type and notes in small type. The frequency, as shown, though in small type, is part of the dispatch. Pouching directions, special dispatches, and explanatory matter are notes.

3. In making written corrections notes should be enclosed in parentheses to distinguish them from dispatches.

4. Instructions to erase a note do not affect the dispatch. Instructions to erase a dispatch involve the erasure of all notes immediately following or dependent upon such dispatch.
